This Annual Report and Audited Financial Statements (the "Reports and Accounts") may be translated into other languages. Any such translation shall only contain the same information and have the same meaning as the English language Report and Accounts. To the extent that there is any inconsistency between the English language Report and Accounts and the Report and Accounts in another language, the English language Report and Accounts will prevail, except to the extent (and only to the extent) that it is required by law of any jurisdiction where the shares are sold, that in an action based upon disclosure in a Report and Accounts in a language other than English, the language of the Report and Accounts on which such action is based shall prevail. Any disputes as to the terms of the Report and Accounts, regardless of the language of the Report and Accounts, shall be governed by and construed in accordance with the laws of Ireland.

Directors' Report

The Board of Directors (the "Directors" or the "Board") present their annual report together with the audited financial statements for the financial year ended 31 March 2023. Lazard Global Investment Funds plc (the "Company") is an open ended investment company with variable capital structured as an umbrella fund with segregated liability between sub-funds (individually referred to as the "Fund" and collectively as the "Funds"), which at the financial year-end had 20 Funds in existence, 15 of which were active (31 March 2022: 15 Funds).

The investment objectives of each Fund within the Company are set out in the Prospectus. The Company is authorised by the Central Bank as a UCITS pursuant to the UCITS Regulations and the Central Bank UCITS Regulations.

Statement of Directors' Responsibilities

The Directors are responsible for preparing the Directors' report and the financial statements in accordance with Irish applicable law and regulations.

Irish Company law requires the Directors to prepare financial statements for each financial year that gives a true and fair view of the Company's assets, liabilities and financial position as at the end of the financial year and of the profit or loss of the Company for the financial year. Under that law the Directors have prepared the financial statements in accordance with Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the United Kingdom and Republic of Ireland" ("FRS102").

Under Irish Company law, the Directors shall not approve the financial statements unless they are satisfied that they give a true and fair view of the Company's assets, liabilities and financial position as at the end of the financial year and the profit or loss of the Company for the financial year.

In preparing these financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether the financial statements have been prepared in accordance with applicable accounting standards and identify the standards in question, subject to any material departures from those standards being disclosed and explained in the notes to the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The Directors are responsible for keeping adequate accounting records that are sufficient to:

- correctly record and explain the transactions of the Company;
- enable, at any time, the assets, liabilities, financial position and profit or loss of the Company to be determined with reasonable accuracy; and
- enable the Directors to ensure that the financial statements comply with the Irish Companies Act 2014 and enable those financial statements to be audited.

The Directors are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The Directors have taken all reasonable measures to secure compliance with the Company's obligation, under Section 281 to 285 of the Companies Act 2014 to keep proper accounting records and the use of appropriate systems and procedures and the employment of competent persons. The accounting records are kept at the following address: 78 Sir John Rogerson's Quay, Dublin 2, D02 HD32, Ireland.

The measures taken by the Directors to ensure compliance with the Company's obligation to keep adequate accounting records are through the appointment of an experienced administrator, State Street Fund Services (Ireland) Limited, (the "Administrator"), and through such appointment, the use of appropriate systems and procedures. The accounting records are held at the office of the Administrator. Under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended), (the "UCITS Regulations") and the Central Bank's (Supervision and Enforcement) Act 2013 (section 48(1)) UCITS Regulations 2019 (as amended), (the "Central Bank UCITS Regulations"), the Directors are required to entrust the assets of the Company to a depositary for safe-keeping. In carrying out this duty, the Company has delegated custody of the Company's assets to State Street Custodial Services (Ireland) Limited, (the "Depositary"). Both the Administrator and the Depositary are regulated by and under the supervision of the Central Bank of Ireland (the "Central Bank").

Directors' Report (continued)

Statement of Directors' Responsibilities (continued)

Audited annual reports and unaudited interim reports are available on www.lazardassetmanagement.com. The Directors are responsible for the maintenance and integrity of the financial statements. The Manager ensures they are accurately published on the website. Information published on the internet is accessible in many countries with different legal requirements. Legislation in the Republic of Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

Statement of Directors' Compliance

The Directors acknowledge that they are responsible for securing the Company's compliance with the relevant obligations as set out in Section 225 of the Companies Act 2014 and all tax law within the Republic of Ireland (the "relevant obligations").

The Directors confirm that:

1. A compliance policy statement has been drawn up that sets out policies, which in the Directors' opinion are appropriate to the Company, respecting compliance by the Company with its relevant obligations.
2. Appropriate arrangements or structures are in place that, in the Directors' opinion, are designed to secure material compliance with the Company's relevant obligations; and
3. During the financial year, the arrangements or structures referred to in (2) have been reviewed.

Connected Person Transactions

In accordance with the requirements of the Central Bank UCITS Regulations 43(1), any transaction carried out with the Company by its management company or depositary, and the delegates or sub-delegates of such a management company or depositary (excluding any non-group company sub-custodians appointed by a depositary), and any associated or group company of such a management company, depositary, delegate or sub-delegate ("connected persons") must be carried out as if negotiated at arm's length. Such transactions must be in the best interests of the shareholders.

Therefore, having regard to confirmations from the Company's management and its relevant delegates, the Directors of the Company are satisfied that:

- (i) there are arrangements (as evidenced by written procedures documented by Lazard Fund Managers (Ireland) Limited (the "Manager")) in place to ensure that the obligations described above are applied to all transactions with connected persons; and
- (ii) transactions with connected persons entered into during the financial year complied with these obligations, as attested by the Manager and where relevant the Depositary, through regular updates to the Directors.

Details of fees paid to related parties and certain connected persons are set out in Note 3 and Note 12 to the financial statements. However, shareholders should understand that not all "connected persons" are related parties as such latter expression is defined by Section 33 of FRS 102.

Review of Business and Future Developments

The Investment Managers' Reports contain a review of the factors which contributed to the performance for the financial year. The Directors do not anticipate any changes in the structure of the Company or investment objectives of any of the Funds in the immediate future. Lazard Opportunities Fund was fully redeemed on 7 November 2016 and Lazard Global Hexagon Equity Fund was fully redeemed on 18 August 2017, as these Funds have Nil balances, they are no longer being shown on the Statement of Comprehensive Income, the Statement of Financial Position or the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders. Lazard Demographic Opportunities Fund was approved by the Central Bank on 21 December 2021 but has not yet launched. Lazard Thematic Inflation Opportunities Fund launched on 21 June 2022. Lazard Nordic High Yield Bond Fund launched on 1 November 2022. Lazard Emerging Market Bond Fund was fully redeemed on 16 November 2022. Lazard Diversified Return Fund was fully redeemed on 13 January 2023.

A notice has been issued to fund investors to close Lazard Coherence Credit Alternative Fund. The final redemptions from the Fund will be on or before 17 July 2023. The Company will continue to act as an investment vehicle as set out in its Prospectus. A review and the outlook for the Funds is included in the Investment Managers' Reports. The Financial Statements except as noted are prepared on a going concern basis.

Directors' Report (continued)

Crisis in Ukraine, Recent Market Events and effect on the Funds

On 24 February 2022, Russian troops launched an invasion of Ukraine and, as at May 2023, the countries remain in active armed conflict. As a result of the invasion, the United States, the United Kingdom, the European Union, and several other nations announced a broad array of new or expanded sanctions, export controls, and other measures against Russia, as well as upon certain banks, companies, government officials, and other individuals in or affiliated with Russia and Belarus.

The ongoing conflict and the rapidly evolving response measures has had a negative impact on the economy and business activity globally (including in the countries in which the Fund invests), and therefore could adversely affect the performance of the Fund's investments. The severity and duration of the conflict and its impact on global economic and market conditions are impossible to predict, and as a result, management is actively monitoring the situation and the impact it may have on the Fund. There is also a potential impact with respect to inflation and also a potential supply chain disruption to the underlying companies invested in.

As at 31 March 2023, none of the Funds held Russian debt securities. As at 31 March 2022, a number of Emerging Markets Funds held Russian debt securities and these securities were less than 1% on each applicable Fund.

For certain Funds, the market in which the Funds' investments were exposed to experienced significant volatility during the financial year. The absolute and relative performance numbers are included in the Investment Management Commentaries within these Financial Statements.

The collapse of Silicon Valley Bank, followed by the failure of Signature Bank and the resolution of Credit Suisse by sale to UBS shortly thereafter, has led to significant turmoil in global financial markets. The knock-on effects of these events are still evolving and at this stage it is difficult to predict the broader impact on the banking system and financial marketplace. The Manager continues to monitor the situation and assess the implications on the operations of the Funds.

Risk Management Objectives and Policies

Information in relation to the Company's risk management objectives and policies are included in Note 9 to the financial statements.

Results and Dividends

The results and distributions for the financial year are set out in the Statement of Comprehensive Income. Please see Note 14 for details of any distributions paid during the financial years ended 31 March 2023 and 31 March 2022 and Note 16 for post financial year end distributions.

Significant Events During the Financial Year and Since the Financial Year End

Please see Notes 15 and 16 for details of any significant events during the financial year and since the financial year's end.

Directors

The names of the persons who were Directors of the Company during the financial year ended 31 March 2023 are set out below:

Gavin Caldwell (Irish)*/** (Resigned 30 September 2022)
Deirdre Gormley (Irish) */** (Appointed 7 November 2022)
Andreas Hübner (German)
Daniel Morrissey (Irish) */** (Resigned 22 December 2022)
Jeremy Taylor (British)**
Samantha McConnell (Irish)*/**
Denis Faller (French)

* Independent Directors.

** Members of the Audit Committee.

All Directors are Non-Executive with the exception of Denis Faller who is an Executive Director of the Manager.

All Directors of the Company are also Directors of the Manager.

Directors' Report (continued)

Transactions Involving Directors

As contemplated by the Corporate Governance Code issued by Irish Funds (see below), Letters of Appointment have been entered into between the Company and each of the Directors, all terminable after three months notice.

Daniel Morrissey is no longer a Director of the Company effective 22 December 2022 and no longer a partner of William Fry effective 1 January 2022 (the Company's legal advisers as to Irish law, and who also provide Global Foreign Registration Services to the Company). The partners of William Fry own Wilton Secretarial Limited (the "Secretary"). Daniel Morrissey had a beneficial interest under the Companies Act 2014 in legal and secretarial fees paid to William Fry during the financial year ended 31 March 2022. The secretarial fees paid to William Fry and the Secretary during financial year ended 31 March 2023 amounted to USD 396,652 (31 March 2022: USD 498,332).

All of the current Directors are also directors of the Manager and have an interest in fees paid by the Company to the Manager.

The Directors are not aware of any other contracts or arrangements of any significance in relation to the business of the Company, other than what is disclosed above in the Directors' and Secretary's Interests section.

Directors' fees paid and payable are disclosed in Note 3 to the financial statements.

Corporate Governance Statement

Irish Funds, the association for the funds industry in Ireland, has published a corporate governance code (the "Code") that may be adopted on a voluntary basis by Irish authorised collective investment schemes. The Board of Directors has adopted the Code and the Company was in compliance with all elements of the Code during the financial year.

Audit Committee

An Audit Committee, currently consisting of Deirdre Gormley, Jeremy Taylor and Samantha McConnell, who are all non-executive directors, has been formed since 2013 and it is charged with oversight of the Company's audit and financial control functions.

The Directors acknowledge that they are required, under Section 167 of the Companies Act 2014, to consider the establishment of an Audit Committee which meets the requirements of that Section. Section 167 requires, amongst other things, that the members of such an audit committee shall include at least one independent director, meaning a person who is

- (i) a non-executive director;
- (ii) possesses the required degree of independence so as to enable the director to contribute effectively to the committee's functions (being a director who has not, or in the period of the three years preceding his or her appointment to the committee, did not have, a material business relationship with the company); and
- (iii) is a person who has competence in accounting or auditing.

In accordance with Section 332 of the Companies Act 2014 each of the persons who are Directors at the time the report is approved confirm the following:

- (i) so far as the Director is aware there is no relevant audit information of which the Company's auditors are unaware; and
- (ii) the Director has taken all the steps that he or she ought to have taken as a Director in order to make himself or herself aware of any relevant audit information and to establish that the Company's statutory auditors are aware of that information.

The audited annual financial statements of the Company are required to be approved by the Directors and filed with the Central Bank.

Disclosure of Information to the Auditors

So far as each person who was a Director at the date of approving this report is aware, there is no relevant audit information, being information needed by the auditors in connection with preparing their report, which they have not disclosed to the auditors. Each Director has taken all the steps that they are obliged to take as a Director in order to make themselves aware of any relevant audit information and to ensure that it is disclosed to the auditors.

Directors' Report (continued)

Corporate Governance Statement (continued)

Independent Auditors

The independent auditors, PricewaterhouseCoopers have indicated their willingness to remain in office in accordance with Section 383 of the Irish Companies Act 2014.

On behalf on the Board of Directors

Director: Deirdre Gormley

Date: 5 July 2023

Director: Samantha McConnell

Investment Manager's Report

Lazard Global Quality Growth Fund

Investment Review

Over the twelve-month period ending 31 March 2023, the Lazard Global Quality Growth Fund (the "Fund") returned -7.19% in US dollar terms, against the MSCI All Country World Index, which returned -7.02%¹.

Market Review

In the trailing twelve-month period that ended 31 March 2023, world equity markets fell amid a dramatic shift in the global monetary landscape.

The period was marked by high global inflation and the forceful response of central banks. The US Federal Reserve (Fed), pursued its most aggressive rate-hiking campaign in over 40 years starting in March 2022, lifting its short-term interest rate eight consecutive times during the 12-month period to its highest level since 2007.

Markets were volatile throughout the period amid speculation about the Fed's interest rate policy path, as the central bank expressed conviction in taming stubbornly high domestic inflation. A similar situation was playing out in Europe, where the protracted Russia-Ukraine conflict led to high energy prices and inflation. The European Central Bank (ECB) raised its benchmark rate six consecutive times while the Bank of England did so eight times during the period.

The global rate-hiking cycle began to yield results in late 2022 when key data indicators suggested that inflation may have finally peaked. The start of 2023 saw investors growing optimistic that a severe global economic recession could be avoided and slowing inflation would induce major central banks, especially the Fed, to moderate its monetary tightening cycles.

In March, news of two bank failures in the United States and the rescue takeover of troubled Swiss bank Credit Suisse by domestic rival UBS, stoked concerns about knock-on effects of monetary tightening. However, markets regained their footing in the closing weeks of the period, thanks to forceful actions taken by regulators to instil confidence in the banking system, and hints from the Fed that it was near the end of its rate-hiking cycle.

Against this backdrop, equities in both the developed and developing markets retreated in the 12-month period, with the former outperforming the latter. In the United States, stocks underperformed the broader global market, as rate increases by the Fed and mixed company profits weighed on stocks.

Across the Atlantic, European equities eked out a gain on optimism that the euro zone will not fall into economic recession despite the ECB's monetary tightening cycle. Japanese equities fell but outpaced the broader global market index, as the Bank of Japan's dovish interest-rate policy boosted the stock market. Meanwhile, in emerging markets, China's stock market fell but outperformed, as risk sentiment seesawed between worries about the Chinese economy during the strict pandemic-driven lockdowns of major Chinese cities, and optimism after its government abandoned its zero-COVID policy in December.

Portfolio Review

What Contributed to Returns:

- Global luxury goods maker LVMH Moët Hennessy Louis Vuitton exhibited revenue momentum and investors were optimistic for a recovery of the Chinese economy.
- Wolters Kluwer, a provider of information services for the health, accounting, and legal professionals globally, reported strong revenue growth and margins broadly.
- Amphenol, a diversified electrical connector and sensors business, exhibited strong earnings growth across end markets.

What Detracted from Returns:

- Google parent Alphabet reported disappointing quarterly results throughout the year, impacted by higher expenses and slowing revenues as advertisers pulled back on spending.
- A position in Japanese bicycle maker Shimano detracted amid expectations of a demand pullback in cycling and other leisure products.
- Computershare, an Australian-based leading provider of registry services with businesses in mortgage services, corporate trusts, and other financial services, hurt returns. Shares declined on concerns over weaker mortgage servicing volumes as mortgage originations declined amid a higher interest rate environment.
- Additionally shares were also impacted by concerns over the near-term trajectory of interest rates.

Investment Managers' Report (continued)

Lazard Global Quality Growth Fund (continued)

Outlook

Looking forward to the remainder of the year, we expect to see continued volatility as central banks seek to balance the goals of maintaining financial stability with controlling inflation. As active stock pickers, we are focused on taking advantage of this volatility to add capital to high-quality companies trading at attractive valuations that may be out of favour. We continue to focus on company fundamentals and making sure we own companies that are prepared for a range of economic scenarios.

Lazard Asset Management Limited
31 March 2023

Investment Managers' Report (continued)

Lazard Thematic Inflation Opportunities Fund*

Investment Review

Since inception on 21 June 2022 through to 31 March 2023, the Lazard Thematic Inflation Opportunities Fund (the "Fund") returned 8.39% in US dollar terms, against the MSCI All Country World Index, which returned 9.73%¹.

Market Review

In the trailing Twelve-month period that ended 31 March 2023, world equity markets fell sharply amid a dramatic shift in the global monetary landscape.

The period was marked by soaring global inflation and the forceful response of central banks to contain it. Markets were volatile throughout the period as risk appetite rose and fell on speculation about the Federal Reserve's (Fed) interest rate policy path, with stocks coming under increasing pressure when it became clear that the US central bank, through its pronouncements and actions, was determined to crush stubbornly high domestic inflation, even if it meant tipping the US economy into a recession. A similar situation was playing out in Europe, where the protracted Russia-Ukraine conflict led to soaring energy prices that resulted in rampant inflation.

The start of 2023 saw investors growing optimistic that a severe global economic recession could be avoided, and that slowing inflation would induce major central banks, especially the Fed, to moderate their monetary tightening cycles. However, the global interest-rate outlook turned cloudy in the last two months of the period, as headwinds picked up again.

Against this backdrop, equity markets in both the developed and developing worlds retreated in the period, with the former outperforming the latter.

Portfolio Review

What Contributed to Returns:

- The Intangible Assets theme contributed the most to returns, led by price increases and robust demand at Richemont and LVMH, both luxury good companies and latterly prospects for China's reopening and associated pick-up in travel.
- The Industrial Pass Thru and Energy Policy themes also contributed meaningfully to performance, with strong pricing data and demand from companies such as Deere, who manufacture machinery, Caterpillar who manufactures construction equipment and Integrated Management of Childhood Diseases (IMCD) who distribute and formulate speciality chemicals and ingredients. Deere and Caterpillar also benefited from commodities prices and with strong results and cash flow outlooks from companies such as BP, Total, Air Liquide, and Linde.

What Detracted from Returns:

- Housing & Finance detracted from returns as US bank holdings Bank of America, PNC Financial, and First Republic Bank declined on concerns over deposit flows and mark-to-market on securities portfolios.
- Holdings from other themes that detracted from returns included Live Nation in the Consumer Price Capture theme on public antitrust challenges.
- Equinor in the Energy Policy theme on the normalisation of gas prices, Armstrong World in the Industrial Pass Thru theme on weak volumes for ceiling tiles, and Newmont in the Scarce Resources theme on the announced acquisition of Newcrest.

Outlook

Overall, the team believes that the probability of a structurally higher inflationary regime is greater than consensus. That view is based on the potential for key policy changes related to, for example, national security, inequality, Environmental, Social and Governance (ESG), technology, and demographics.

Cyclical inflation has shown signs of peaking as distortions linked to COVID-19 and the Ukraine war fade. In our view, more extreme cyclicity is to be expected in a regime of high structural inflation—as in the 1970s, economies may lurch between surging inflation and recession, which is very much what we are seeing now.

Policymakers face a conundrum of reducing inflation while maintaining financial stability and minimising the damage to growth and employment. Inflation may be the lesser evil. We note that the policy reactions to recent events (e.g., banking crisis) reinforces our view that the recent bout of inflation is a precursor to a more entrenched structural inflationary environment.

Lazard Global Convertibles Investment Grade Fund

Investment Review

Over the twelve-month period ending 31 March 2023, the Lazard Global Convertibles Investment Grade Fund (the "Fund") returned -2.92% (hedged in euro) against the Refinitiv Convertible Global Focus Investment Grade Index (hedged in euro), which returned -1.38%¹.

Market Review

In the trailing Twelve-month period that ended 31 March 2023, world equity markets fell sharply amid a dramatic shift in the global monetary landscape.

The period was marked by soaring global inflation and the forceful response of central banks to contain it. At the forefront of these efforts was the US Federal Reserve (Fed), which pursued its most aggressive rate-hiking campaign in over 40 years starting in March 2022. Markets were volatile throughout the period as risk appetite rose and fell on speculation about the Fed's interest rate policy path and concerns on the US economy tipping into recession. A similar situation was playing out in Europe, where the European Central Bank (ECB) began its own hiking cycle in response to soaring energy prices from the Russia-Ukraine conflict and rampant inflation.

The global rate-hiking cycle began to yield results in late 2022 when key data indicators suggested that inflation may have finally peaked. The start of 2023 saw growing optimism that a severe global economic recession could be avoided and slowing inflation would induce major central banks to moderate their monetary tightening cycles. However, the global interest-rate outlook turned cloudy in the last two months of the period, as headwinds picked up again.

In February, a steady flow of data suggested that price pressure remained persistent. But, in March, news of two large bank failures in the United States, and the rescue takeover of troubled Swiss bank Credit Suisse by domestic rival UBS, stoked fears that the global financial system was buckling under the weight of monetary tightening.

However, markets regained their footing in the closing weeks of the period, thanks to forceful actions taken by regulators worldwide and hints from the Fed that it was near the end of its rate-hiking cycle. The flurry of interest rate increases led to a sell-off in the US government bond market during the 12-month period, pushing the yield on the benchmark 10-year US Treasury note up 113 basis points to 3.47%.

Against this backdrop, equity markets in both the developed and developing worlds retreated in the 12-month period, with the former outperforming the latter. In the United States, the S&P 500 Index underperformed, as rate increases by the Fed and lacklustre company profits weighed on stocks.

Across the Atlantic, the pan-European STOXX 600 Index eked out a gain on optimism that the euro zone would not fall into economic recession despite the ECB's monetary tightening cycle. In Japan, the TOPIX Index fell, but outpaced the broader global market index, as the Bank of Japan's dovish interest-rate policy boosted the stock market.

Meanwhile, in emerging Asia, China's stock market fell but outperformed, as risk sentiment seesawed between worries about the Chinese economy during the strict pandemic-driven lockdowns of major Chinese cities, and optimism after the government abandoned its zero-COVID policy in December.

The pace of new issuance of convertibles was subdued during the period, with 12-month issuance at \$51 billion, a decrease of 46% compared to the same period the year before.

Portfolio Review

What Contributed to Returns:

- An underweight to European real estate was additive as global interest rates continued to rise during the period.
- Security selection in Asia technology hardware was additive as these names were buoyed by stronger-than-expected results.
- An underweight to modified duration added to relative performance as interest rates in the United States and Europe continued to rise on the back of high inflation prints.

Lazard Global Convertibles Investment Grade Fund (continued)

Portfolio Review (continued)

What Detracted from Returns:

- Being overweight to US technology was a negative contributor, as high-growth names underperformed due to their interest rate sensitivity.
- Names linked to tourism, particularly online booking websites, detracted on fears surrounding weakening global economic growth.
- Security selection in European materials detracted on fears of higher input costs and slower regional economic growth.

Outlook

The interest-rate-sensitive growth sectors are likely to continue finding support in the next few quarters as the current rate-hiking cycle approaches its end. Many of these companies are expected to report resilient corporate results, which are less vulnerable to the slowing global economy.

For tourism-related companies, the persistent supply-demand constraints will likely remain a tailwind to financial performance and profitability, making the recovery names well-positioned to exploit the reopening of China, particularly in luxury goods and travel.

The convertible bonds asset class has modest exposure to banks and financials, which we believe will be advantageous in the coming quarters as the financial sector faces elevated risk in the medium term. Convertible bonds still offer attractive yields, and many "growth" convertible bonds yield more than 5% per annum. This setup means that the convertibles are relatively closer to their bond floor, which provides defence to the downside during risk-off periods or higher volatility.

Despite market volatility remaining high, the first quarter of 2023 was supportive of the asset class, and we believe these supportive factors are likely to remain relevant. A potential favourable sector mix with a bias toward interest-rate sensitive growth stocks and revenue recovery names could lead to a period of outperformance for the underlying equities in the asset class.

Additionally, the defensive credit risk profile for the asset class could help insulate it during periods of credit unease, particularly if coupled with lower overall interest rates. Finally, the structures of convertibles, with many offering both interesting yield and important equity sensitivity, create an attractive opportunity, particularly against the backdrop of still high volatility.

Lazard Global Convertibles Recovery Fund

Investment Review

Over the twelve-month period ending 31 March 2023, the Lazard Global Convertibles Recovery Fund (the "Fund") returned -5.41%, net of fees, for the A accumulation class in US dollar terms¹.

Market Review

In the trailing 12-month period that ended 31 March 2023, world equity markets fell sharply amid a dramatic shift in the global monetary landscape.

The period was marked by soaring global inflation and the forceful response of central banks to contain it. At the forefront of these efforts was the US Federal Reserve (Fed), which pursued its most aggressive rate-hiking campaign in over 40 years starting in March 2022. Markets were volatile throughout the period as risk appetite waxed and waned on speculation about the Fed's interest rate policy path and concerns about the US economy tipping into recession. A similar situation was playing out in Europe, where the European Central Bank (ECB) began its own hiking cycle in response to soaring energy prices from the Russia-Ukraine conflict and rampant inflation.

The global rate-hiking cycle began to yield results in late 2022 when key data indicators suggested that inflation may have finally peaked. The start of 2023 saw growing optimism that a severe global economic recession could be avoided, and that slowing inflation would induce major central banks to moderate their monetary tightening cycles. However, the global interest-rate outlook turned cloudy in the last two months of the period, as headwinds picked up again.

In February, a steady flow of data suggested that price pressure remained persistent. But, in March, news of two large bank failures in the United States and the rescue takeover of troubled Swiss bank Credit Suisse by domestic rival UBS stoked fears that the global financial system was buckling under the weight of monetary tightening. Markets regained their footing in the closing weeks of the period, however, thanks to forceful actions taken by regulators worldwide and hints from the Fed that it was near the end of its rate-hiking cycle.

The blizzard of interest rate increases led to a sell-off in the US government bond market during the 12-month period, pushing the yield on the benchmark 10-year US Treasury note up 113 basis points to 3.47%.

Against this backdrop, equity markets in both the developed and developing worlds retreated in the 12-month period, with the former outperforming the latter. In the United States, the S&P 500 Index underperformed, as rate increases by the Fed and lacklustre company profits weighed on stocks. Across the Atlantic, the pan-European STOXX 600 Index eked out a gain on optimism that the euro zone would not fall into economic recession despite the ECB's monetary tightening cycle.

In Japan, the TOPIX Index fell but outpaced the broader global market index, as the Bank of Japan's dovish interest-rate policy boosted the stock market. Meanwhile, in emerging Asia, China's stock market fell but outperformed, as risk sentiment seesawed between worries about the Chinese economy during the strict pandemic-driven lockdowns of major Chinese cities, and optimism after the government abandoned its zero-COVID policy in December.

The pace of new issuance of convertibles was subdued during the period, with 12-month issuance at \$51 billion, a decrease of 46% compared to the same period the year before.

Portfolio Review

What Contributed to Returns:

- Exposure to European convertibles was additive. A recovery in air passenger travel as well as elevated ticket pricing lifted the performance of most European airlines in the portfolio. The exposure to e-commerce in Europe—increased in the second half of 2022—showed some recovery and added to returns.
- The proposed nationalisation by the French State of an electricity utility present in the Fund activated specific clauses for the bond and contributed to elevated returns.
- The partial hedging of interest rate risk helped insulate the Fund from the impact of rising interest rates.

Lazard Global Convertibles Recovery Fund (continued)

Portfolio Review (continued)

What Detracted from Returns:

- North American issuers, in particular the cruise operators, costed during the period as the deteriorating macro conditions and rising financing costs weighed on investor sentiment.
- Exposure to real estate costed during the period. In China, a significant slowdown of real estate induced by a more restrictive policy stance negatively impacted a position in the area that we eventually sold.
- The strength of the dollar versus other currencies hurt performance. Around a third of the convertible bonds held are denominated in a foreign currency, which detracted from absolute performance.

Outlook

The interest-rate sensitive growth sectors are likely to continue finding support in the next few quarters as the current rate-hiking cycle approaches its end, in our view. Many of these companies are expected to report resilient corporate results, which are less vulnerable to the slowing global economy. For tourism-related companies, the persistent supply-demand constraints will likely remain a tailwind to financial performance and profitability, making the recovery names well-positioned to exploit the reopening of China, particularly in luxury goods and travel.

The convertible bonds asset class has modest exposure to banks and financials, which we believe will be advantageous in the coming quarters as the financial sector faces elevated risk in the medium term. Convertible bonds still offer attractive yields, and many "growth" convertible bonds yield more than 5% per annum. This setup means that the convertibles are relatively closer to their bond floor, which provides defence to the downside during risk-off periods or higher volatility.

Despite market volatility remaining high, the first quarter of 2023 was supportive of the asset class, and we believe these supportive factors are likely to remain relevant. A potential favourable sector mix with a bias toward interest-rate sensitive growth stocks and revenue recovery names could lead to a period of outperformance for the underlying equities in the asset class.

Additionally, the defensive credit risk profile for the asset class could help insulate it during periods of credit unease, particularly if coupled with lower overall interest rates. Finally, the structures of convertibles, with many offering both interesting yield and important equity sensitivity, create an attractive opportunity, particularly against the backdrop of still high volatility.

Lazard Emerging Markets Bond Fund*

Investment Review

Over the period between 1 April 2022 and liquidation on 17 November 2022, the Lazard Emerging Markets Bond Fund (the "Fund") returned -15.71% in US dollar terms, against the J.P. Morgan EMBI Global Diversified Index, which returned 10.68%¹.

Market Review

In the period between 1 April 2022 and 17 November 2022, hard currency emerging markets debt returned -10.89%, driven by the sharp increase in US Treasury yields and credit spread widening. Not only did Treasury yields rise significantly, but they were extremely volatile. In a span of less than two months during parts of August and September, the 10-year Treasury traded in an intra-day range of 2.5% to 4.0%, reaching a psychological threshold not breached since 2008. Yields retreated slightly late in the period, but the 10-year still ended nearly 150 basis points higher. Spreads on the JPMorgan EMBI Global Diversified Index were also volatile, trading in a range of 390-600 basis points. Ultimately, spreads ended the period just under 100 basis wider at 490 basis points.

Portfolio Review

What Contributed to Returns:

- Being overweight Angola contributed as the country benefited from the strength in crude oil prices.
- The Fund's off-index position in corporate credit also helped, as a bias towards shorter-dated issues was beneficial amid the rising rate environment.

What Detracted from Returns:

- From a top-down perspective, the Fund's general overweight in high yield countries detracted as these countries underperformed investment grade countries by over 1% during the period.
- Underweight positions in the highest quality countries including China and the United Arab Emirates detracted as these markets benefited from "flight to safety" characteristics.
- Transaction costs related to the Fund's liquidation on 17 November 2022 also detracted.

All data contained herein is sourced by Lazard Asset Management Limited unless otherwise noted as at 31 March 2023.

Lazard Emerging Markets Local Debt Fund

Investment Review

Over the twelve-month period ending 31 March 2023, the Lazard Emerging Markets Local Debt Fund (the "Fund") returned -0.18% in US dollar terms, against the J.P. Morgan GBI-EM Global Diversified Index, which returned -0.72%¹.

Market Review

In the trailing 12-month period ending 31 March 2023, local currency emerging markets debt returned -0.72% (measured in US dollar terms), primarily driven by local currency depreciation. Emerging markets currencies fell 5.4% on a spot basis in the face of broad US dollar strength underpinned by the Federal Reserve's aggressive rate hike cycle. Meanwhile, local yields rose by just over 35 basis points, significantly less than the increase in core rates. to end the period at 6.59%.

Portfolio Review

What Contributed to Returns:

- Bottom-up positioning in both local rates and currencies contributed to relative performance.
- Overweight duration in Brazil contributed. Brazil was among the top performers in rates on expectations that Banco Central do Brasil may soon begin to ease rates as inflation is falling and growth is expected to slow.
- Underweight Egypt also contributed, as the central bank devalued the pound on two separate occasions during the period, contributing to a spot depreciation of nearly 70%.

What Detracted from Returns:

- Underweight Turkish rates detracted. Turkish local yields outperformed based on government policy support despite surging inflation pressure during the period.
- Among the low yielders, the overweight position in Peru versus Thailand detracted as political uncertainty weighed on bond price performance in Peru.

Outlook

Despite current market uncertainty, we see the broader trends supporting local currency debt intact over the medium-term as growth differentials are increasingly in favour of emerging markets, inflation appearing to have peaked, and the scope for monetary easing.

The growth differential between emerging and developed markets is forecast to widen in favour of developing nations for the first time in nearly a decade in 2023 and 2024. Meanwhile, inflation has peaked in both the United States and emerging markets, and the majority of emerging markets' central banks has reached their terminal rates, providing scope for easing in select markets. Finally, investor positioning is light due to significant fund outflows in recent years.

All data contained herein is sourced by Lazard Asset Management LLC unless otherwise noted as at 31 March 2023.

Investment Managers' Report (continued)

Lazard Emerging Markets Total Return Debt Fund

Investment Review

Over the twelve-month period ending 31 March 2023, the Lazard Emerging Markets Total Return Debt Fund (the "Fund") returned -6.71% in US dollar terms¹.

Market Review

In the trailing 12-month period ending 31 March 2023, emerging markets debt returned -3.83% (measured in US dollar terms), as hard currency debt returned -6.92%, while local currency debt returned -0.72%. Sovereign credit spreads widened over 80 basis points and ended the period at 484 basis points, while yields rose over 200 basis points to 8.51%. Emerging markets currencies fell 5.4% on a spot basis in the face of broad US dollar strength underpinned by the Federal Reserve's aggressive rate hike cycle. Meanwhile, local yields rose by just over 35 basis points—significantly less than the increase in core rates—to end the period at 6.59%.

While we are disappointed with the absolute performance of the fund during the period, we believe it is important to view performance with a longer-term focus. The market environment since the start of 2020 has been particularly challenging with the broader asset class suffering a cumulative loss of -13.1%. Over the same period, the Fund has delivered on its objective of outperformance with significantly less volatility. The Fund has helped to preserve capital with a cumulative loss of just over 3% while realising a volatility that is around 20% lower than that of the index.

Portfolio Review

What Contributed to Returns:

- Positioning in local rates contributed to absolute returns.
- Long positions in select high yielders including South Africa, Mexico, and Brazil were notable contributors within this allocation.

What Detracted from Returns:

- The main drivers of the absolute decline during the period were sovereign and corporate credit positions, consistent with our emphasis on hard currency while remaining cautious on local currency.
- On a bottom-up basis, diversified exposure to high yield countries (e.g., Ecuador, Egypt, Kenya, and South Africa) was the main detractor.
- Within the Fund's corporate credit allocation, small exposure to the Chinese real estate sector also weighed on returns.

Outlook

We maintain a constructive medium-term outlook on emerging markets debt, supported by global growth differentials shifting in favour of emerging markets, peak inflation now appearing to be behind us, and scope for monetary easing in both emerging and developed markets. Importantly, we expect dispersion to remain heightened as regional variations are likely to create differentiation and select opportunities.

In sovereign credit, we see value in quality sovereign credits that offer attractive carry relative to fundamentals. In local debt, we see several attractive opportunities, primarily in the high yielders such as South Africa, Mexico, and Brazil. In currencies, we see select value primarily in central and eastern European currencies (such as the Polish zloty, Hungarian Forint, and Czech koruna), in which we expect hawkish policy stances to support currencies, as well as select high yielders such as the Mexican peso and Brazilian real.

All data contained herein is sourced by Lazard Asset Management LLC unless otherwise noted as at 31 March 2023.

Lazard Emerging Markets Debt Blend Fund

Investment Review

Over the twelve-month period ending 31 March 2023, the Lazard Emerging Markets Debt Blend Fund (the "Fund") returned -5.90% in US dollar terms, against the 50% J.P. Morgan EMBI Global Diversified ex CCC/50% J.P. Morgan GBI-EM Global Diversified Index, which returned -2.84%¹.

Market Review

In the trailing 12-month period ending 31 March 2023, emerging markets debt (ex-CCC) returned -2.84% (measured in US dollar terms). Sovereign credit spreads widened over 80 basis points and ended the period at 484 basis points, while yields rose over 200 basis points to 8.51%. Emerging markets currencies fell 5.4% on a spot basis in the face of broad US dollar strength underpinned by the Federal Reserve's aggressive rate hike cycle. Meanwhile, local yields rose by just over 35 basis points—significantly less than the increase in core rates—to end the period at 6.59%.

Portfolio Review

What Contributed to Returns:

- Bottom-up positioning in local debt contributed to relative performance. Within this allocation, overweight duration in Brazil was beneficial as the country was among the top performers in rates on expectations that Banco Central do Brasil may soon begin to ease rates as inflation is falling and growth is expected to slow.
- Underweight Egypt local debt also contributed as the central bank devalued the pound on two separate occasions during the period, contributing to a spot depreciation of nearly 70%.

What Detracted from Returns:

- Sovereign credit positioning was the main detractor from relative performance. Within this allocation, the Fund's general overweight in high yield countries detracted as these countries underperformed investment grade countries by over 2% during the period.
- The portfolio's overweight position in the long end of the curve for a handful of investment grade countries was also a key detractor as Treasury yields rose.
- Underweight positions in the highest quality countries including China and the United Arab Emirates detracted as these markets benefited from "flight to safety" characteristics.

Outlook

Considering the uncertain market environment, we pared risk during the first quarter of 2023, primarily by reducing high yield sovereign credit and currency exposure. Over the medium-term, we expect a supportive environment for emerging markets debt as growth differentials increasing in favour of emerging markets. Inflation has peaked globally and we see scope for monetary easing in some markets.

In hard currency debt, we rotated exposure from more vulnerable high yield credits to quality credits that offer attractive yields and resilient balance sheets. Specifically, we added exposure in borderline investment grade countries that offer an attractive mix of carry and balance sheet strength to withstand a slowdown in global growth, particularly within central and eastern Europe. In local debt, we see several attractive bottom-up opportunities, primarily in high yielding countries such as Mexico, South Africa, Brazil, and Colombia.

We are currently taking a selective approach to currency positioning. During the quarter, we reduced or eliminated overweight positions in emerging Asian currencies because we believe that valuations already reflect the stronger cyclical position of emerging Asia. Meanwhile, we added overweight positions in central and eastern European currencies, including the Hungarian forint and the Czech koruna, against the euro, where valuations remain attractive amid central bank hawkishness.

Lazard Emerging Markets Corporate Debt Fund

Investment Review

Over the twelve-month period ending 31 March 2023, the Lazard Emerging Markets Corporate Debt Fund (the "Fund") returned -2.43% in US dollar terms, against the J.P. Morgan CEMBI Broad Diversified Index, which returned -1.62%¹.

Market Review

In the trailing 12-month period ending 31 March 2023, emerging markets corporate debt returned -1.62%, driven by the sharp increase in US Treasury yields and credit spread widening. Persistent and elevated inflation contributed to significant monetary policy tightening by the Federal Reserve. As a result, US Treasury yields moved significantly higher, and the yield curve became deeply inverted. The 2-year Treasury yield rose 170 basis points to 4.03% while the 10-year yield rose 130 basis points to 3.47%. Corporate credit spreads widened roughly 45 basis points to end the period at 347 basis points, much of which was driven by the Chinese real estate sector.

Portfolio Review

What Contributed to Returns:

- The Fund's overweight to high yield issuers contributed as high yield outperformed investment grade by over 3% for the period owing to shorter duration.
- From a sector standpoint, overweight financials contributed as the sector benefited from relatively defensive characteristics.

What Detracted from Returns:

- Exposure in subordinated paper of select financial issuers detracted as most bond prices sold off in reaction to the issues with Silicon Valley Bank and Credit Suisse.
- From a sector standpoint, a modest overweight position in oil & gas detracted as recession concerns weighed on the outlook for the sector.
- To a lesser extent, the lack of positions in Ukraine detracted as bond prices rallied from severely distressed levels.

Outlook

Emerging markets corporate yields remain attractive relative to fundamentals, in our view. While the global growth outlook is muted, emerging markets corporate balance sheets are in good shape to weather a moderate decline and we do not foresee material credit issues. While there may be some volatility through the remainder of the year, we expect this market environment to provide opportunities rather than widespread fundamental concerns considering solid credit metrics.

As always, we seek to identify idiosyncratic stories and issuers that trade wide relative to fundamentals due to investor segmentation or other reasons unrelated to credit fundamentals. New issuance volumes have been lower than recent history and focused on investment grade, which should be beneficial in terms of technical, as investors need to reinvest coupon payments, amortisations, and maturities.

We expect emerging markets corporate default rates to moderate this year after being elevated in 2022, driven by China property and the Russia-Ukraine war. We continue to favour higher quality high yield issuers in the BB-rated space, which tend to have credit metrics similar to weaker investment grade companies in developed markets with valuations often punished because of sovereign rating ceilings or sovereign risk, rather than standalone credit risk. We are closely watching upcoming elections, possible capital market transactions, and new issues, as rates look to have stabilised.

Investment Managers' Report (continued)

Lazard Nordic High Yield Bond Fund*

Investment Review

Over the period since inception on 1 November 2022 to the end of 31 March 2023, the Lazard Nordic High Yield Bond Fund (the "Fund") returned 3.29% in euro terms¹.

Market Review

2022 was a challenging year for global capital markets due to the war in Ukraine and central banks' continued campaign to counter inflation with the steepest interest rate increase seen in decades. Risk sentiment improved during November, as the US Federal Reserve's comments of moderating the pace of rate increases in its December meeting added tailwinds to both credit and equity markets globally.

While longer duration assets, such as long-dated fixed income, came under severe pressure at the end of 2022 on the back of further rising market yields, the Nordic High Yield bond market benefitted from having lower duration risk paired with generally higher credit spread protection versus other international corporate bond markets.

After a strong start to 2023, driven by improved growth prospects due to China reopening and Europe's energy relief, global credit markets again saw elevated volatility during March, following the collapse of Silicon Valley Bank and the forced merger between Credit Suisse and UBS. The stress in the banking sector fuelled a rally in "risk free" market yields and shifted interest rate expectations downwards.

Again, due to its characteristics of shorter legal maturities and higher credit spread protection versus other international corporate markets, the Nordic High Yield market managed to keep stable during the first quarter of 2023.

Portfolio Review

What Contributed to Returns:

- In a rising rates environment, the high allocation to floating rate notes and the very high coupon carry had a very positive impact on the Fund's overall performance.
- Our investment in Seapeak LLC, one of the largest owner and operators of LNG transportation assets with 90 vessels, benefitted from a moderate balance sheet paired with a significant revenue backlog, which contributed positively to the Fund's overall performance.
- Another strong contributor to performance was our position in the consumer-focused investment firm Jordanes Investments AS. The company has a diversified exposure to resilient and well-recognised non-discretionary consumer brands in the Scandinavian market, with a strong and proven management team focusing on resilient cash flow and strong cash conversion.

What Detracted from Returns:

- On the back of the volatility associated with the default of Silicon Valley Bank and the rescue of Credit Suisse by UBS in March 2023, our exposure to subordinated debt made a negative contribution to performance. On a positive note, we had no exposure to Credit Suisse.
- The Fund's exposure to Nordic debt collector Intrum AB negatively impacted Fund performance slightly, due to weaker claim collections as extreme food price inflation eroded consumers' disposable incomes across Europe.

Outlook

The yield level of the bond portfolio is currently above 9% (euro hedged), which represents an attractive spread premium over euro high yield and global high yield markets. Furthermore, our fundamental bottom-up selection process continues to focus on companies with strong debt servicing capacity and sustainable capital structures, meaning that the overall credit quality of the portfolio is robust and resilient. In addition, the portfolio's very low duration profile gives less sensitivity to changes in interest rates.

Current bond price/yield levels combined with the robust credit quality of the portfolio are compelling and, in our view, more than compensate the Fund for recession risks in the current market environment.

Investment Managers' Report (continued)

Lazard Scandinavian High Quality Bond Fund

Investment Review

Over the twelve-month period ending 31 March 2023, the Lazard Scandinavian High Quality Bond Fund (the "Fund") returned -4.97% in euro terms¹.

Market Review

At the beginning of the reporting period the economic recovery in Scandinavia continued despite the war in Ukraine and inflationary pressures progressed. Norway benefited from its position as the main gas supplier for Europe. In addition, Sweden turned out to be Europe's largest exporter of electricity thanks to a clever energy mix and a conscious reduction in Russian energy dependency in previous years.

However, growth has moderated somewhat due to a combination of capacity bottlenecks, price pressure, and rising interest rates. As a result of the continuing inflationary pressures, all the Scandinavian central banks raised their interest rates sharply. Sweden's Riksbank reacted too late in particular, as core inflation picked up sharply, resulting in the central bank hiking rates by 100 basis points in September.

Norway is in a somewhat contrary position. Although inflation continues to pick up, driven by a robust economy and tight labour market, the Norwegian central bank is still expected to raise interest rates slightly this year, but could then be one of the first central banks to end its current rate hike cycle. The Danish central bank's policy is limited to defending the currency peg of the Danish krone to the euro.

The steady and immense interest rate hikes in Scandinavia within the last 12 months broadly weighed on the performance of the fixed income sector, and the Fund was not immune to the negative market sentiment as well. However, due to the Fund's high level of diversification and distinct duration hedges, the investment strategy was, nevertheless, able to distance itself from the historically weak market environment in Danish krone callable bonds.

Portfolio Review

What Contributed to Returns:

- The Fund's approach to active duration management and monitoring, in particular duration hedging, had a positive impact on the Fund's performance as rates increased.
- During the reporting period, the Norwegian krone weakened versus the euro. Therefore, the Fund's currency hedges added to performance.
- Our exposure to Norwegian rates contributed somewhat positively to performance as these bonds performed better in the current environment relative to their European counterparts.

What Detracted from Returns:

- The largest detractor from performance during the reporting period were Danish krone denominated covered bonds, due to increasing interest rate volatility and widening risk premiums, which weighed on our position in Danish covered bonds with call options.
- Another detractor from performance during the reporting period were rising risk-free rates, both globally but also in Denmark, Norway, and Sweden. However, the Fund's relative defensive duration positioning could moderate the negative impact of the strong rise in yields.
- Our exposure to corporate bonds from Scandinavian issuers contributed negatively to performance due to widening credit spreads and rising risk aversion.

Outlook

Interest rate normalisation remains the dominant theme for global capital markets. In our view, bond markets have priced interest rate normalisation, making current entry levels for high-quality investments in Scandinavia particularly attractive. In particular, the market for Danish covered bonds with call options appears to be significantly undervalued, in our view, as the priced interest rate volatility is trading at elevated levels. At the same time, the fundamental credit quality continues to be AAA-rated, convexity risks are at historically low levels, and risk premia are significantly higher than in other asset classes, while the rating is even better.

Investment Managers' Report (continued)

Lazard Commodities Fund

Investment Review

Over the twelve-month period ending 31 March 2023 Lazard Commodities Fund (the "Fund") returned -15.99% in US dollar terms, against the Bloomberg Commodity Total Return Index (BCOMTR), which returned -12.49%¹.

Market Review

The energy sector drove a stronger performance in commodities through to July, though oil and natural gas prices started to decline as it became apparent that Europe would not have the expected supply shortages due to stockpiling and a warmer-than-expected winter climate.

Industrial metals had been consistently weak throughout the 12-month period due to weak demand from China and general concerns about a downturn in global manufacturing activity. However, they recovered somewhat from November to January with China's reopening, although performance remained subdued.

The agriculture subindex sold off in June after initial strength, as the feared shortages in wheat from Ukraine did not materialise due to an export arrangement from the country brokered by Turkey with the Russian administration.

Precious metals rallied late in the period as recession fears were further aggravated by the Silicon Valley Bank failure. Despite persistent inflation, a lower real rate environment provided ongoing support for gold through to the end of the period.

Portfolio Review

We deploy a blended approach to commodity investing between commodities and commodity-related equities. We use this blended approach to identify and exploit the best way to express the respective commodity view for both listed and non-listed commodity exposure.

What Contributed to Returns:

The top performing sectors that contributed positively to performance were:

- Precious Metals: small underweight positions in gold and silver.
- Livestock: our underweight position in live cattle.

What Detracted from Returns:

The following three sectors detracted from performance:

- Energy: our overweight positions in natural gas and oil products.
- Industrial Metals: an overweight to aluminium and underweight positions in zinc and copper.
- Agriculture: our overweight to wheat and an underweight to cotton.

Outlook

We remain positive on commodities as an asset class as the fundamentals have not changed. Our main overweight positions are in the energy sector, primarily oil and refined product. Our overweight position in natural gas is under review, not because the long-term fundamentals are not very robust as natural gas remains far below the marginal cost of production, but because the contango position in gas contracts presents more significant holding/rolling cost for the specific contract.

In grains, we continue to remain positive on corn, soy, and wheat, where we believe the weather-related supply disruption i.e., drought in parts of the United States, and South America (mainly Argentina) will work to support the grain complex as we progress through the spring/summer in the northern hemisphere and autumn harvest in South America. Grain inventory levels remain depressed, which should continue to support grain prices at current levels.

Investment Managers' Report (continued)

Lazard Commodities Fund (continued)

Outlook (continued)

More broadly, our positive sentiment results from the fact that supply discipline remains robust. Within energy, that discipline is further reinforced as the return on invested capital and the weighted average cost of capital becomes increasingly positive. Within the energy sector, we do not see new supply coming in response to high prices over the near term. Energy inventory levels remain tight, and China reopened. Grain inventory levels are also at a five- to seven-year low and China reopened. For industrial metals, we believe the window for investment in new capacity may have already passed us by and if the trends toward increased decarbonisation and electrification continue, demand for conductive base metals will only intensify and inventories will draw further.

Despite our bullish long-term view, we have become increasingly concerned about credit growth, which is one of the main reasons we significantly reduced our underweight position in gold and precious metals. We believe that over the near term, monetary policy, especially in the United States, may have got ahead of itself, i.e., they may have raised rates too far and too fast. This could likely force the Federal Reserve to pause rate hikes, which we believe will likely result in greater pressure on the US dollar, as yields may stop rising and could stay negative if input cost inflation remains stickier than initially perceived. It is our opinion, that supply discipline in the commodity space will likely lead to a longer-term elevation in input costs which could result in real interest rates remaining below inflation which would be negative for the US dollar but provide a tailwind for dollar-denominated commodities.

Lazard Asset Management LLC

31 March 2023

Investment Managers' Report (continued)

Lazard Diversified Return Fund*

Investment Review

The Lazard Diversified Return Fund (the "Fund") was closed in January 2023. The Fund returned -8.82% in US dollar terms over the nine-month period to 28 December 2022 compared to the Secured Overnight Financing Rate Index, which returned 1.65%¹.

Market Review

Global markets fell sharply from April to December of 2022, as supply chain bottlenecks, rising energy prices, a tight labour market, and sustained consumer demand combined to drive US inflation to its highest level in 40 years. As a result, the US Federal Reserve (Fed) reversed its ultra-low interest rate policy and embarked on an aggressive rate-hiking campaign, resulting in its benchmark rate ending December at its highest level in 15 years.

Stocks were volatile throughout the year as investors grappled with two competing sentiments—relief that the Fed was taking aggressive actions to rein in rising prices, and concerns that these same actions could slow economic growth. Investors were encouraged towards the end of the year and in January 2023 that domestic inflation was showing signs of moderating.

The Fed's actions were part of a larger wave of monetary tightening prescribed by central banks globally in 2022. In Europe, where the protracted Russia-Ukraine conflict led to soaring energy prices, the European Central Bank raised its benchmark rate four times while the Bank of England did so eight times. The Bank of Japan was one of the few major central banks to swim against this global tide by maintaining an ultra-loose monetary policy. Yet, by doing so, the yen depreciated significantly against the US dollar.

Meanwhile, in emerging Asia, China's stock market fell sharply on bearish sentiment about the country's economic outlook amid COVID-driven lockdowns, a beleaguered real estate sector, and news that Xi Jinping had secured an unprecedented third term as president. In the last two months of 2022, however, the Chinese stock market staged a strong rally after the government announced that it was abandoning its stringent zero-COVID policy.

Portfolio Review

What Contributed to returns

- Stock selection in the information technology, consumer discretionary, consumer staples, and communication services sectors within equity.
- Below-benchmark exposure to the euro zone, Japan, the United Kingdom, and South Korea within fixed income.
- Exposure to the Fundamental European long/short, Global ex-US and Global Thematic High Conviction baskets within the diversifiers.

What Detracted from returns

- Stock selection in the industrials, utilities, and health care sectors within equity.
- Overweight exposure to Australia, Canada, New Zealand, Norway, Singapore, the Czech Republic, Hungary, Mexico, Peru, and Colombia within fixed income.
- Exposure to Global Commodities, as well as the health care and US baskets within the diversifiers.

Investment Managers' Report (continued)

Lazard European Alternative Fund

Investment Review

Over the twelve-month period ending 31 March 2023, the Lazard European Alternative Fund (the "Fund") returned 2.00% net of fees in the 'C' Acc Euro share class, against the MSCI Europe Net Total Return Index, which returned 3.82%¹.

Market Review

In the trailing 12-month period ending 31 March 2023, European equity markets delivered positive returns. However, it has been a story of two halves. The first half of the year saw an almost 15% drawdown in European equity markets, as Russia invaded Ukraine and central banks across the globe started to raise interest rates to fight inflation. Furthermore, the threat around energy security in Europe created worries around a recession there. The combination of these factors created a risk-off environment in Europe during the first six months to September.

As we approached winter, Germany had filled its gas storage to record levels, and corporates and consumers worked hard to cut down their energy consumption. This, combined with a relatively mild winter, helped Europe to avert the worst of an energy crisis and thereby a recession. Meanwhile, some consumers still had money left over from the excess savings they had accumulated during the COVID 19 pandemic, which helped to keep demand intact. This better-than-expected economic performance helped the European equity market to recover the entirety of its losses during the second-half of the year.

Portfolio Review

What Contributed to Returns:

- Stock selection in consumer discretionary contributed to performance as shares in sporting goods company Adidas and Spanish clothing retailer Inditex rose during the period.
- Stock selection in Information technology contributed to performance, as shares rose in Prosus, holding company Chinese internet business Tencent, and Aixtron, a semiconductor capex manufacturing company.
- Stock selection in materials helped as the shares of European cement company Heidelberg did well.

What Detracted from Returns:

- Stock selection in technology detracted from performance, as shares in meal kit company HelloFresh, and music company Universal Music Group, suffered.
- Stock selection in financials detracted, as shares in U.K. motor insurance Group Admiral and French stock exchange group Euronext suffered.
- In terms of country exposure, the Fund lost money in Italian stocks.

Outlook

Despite aggressive interest rate increases by central banks, the global economy has been holding up better than we might have expected so far. However, we would argue that the collapse of some American regional banks and the takeover of Credit Suisse in the past few weeks alone is revealing cracks in the façade that things are operating as "business as usual".

We can hardly conclude anymore that these corporate events are purely idiosyncratic, in our view. We believe that they all have their roots in the rapid removal of liquidity by central banks. The transmission effect of tighter monetary policy to the economy has suddenly manifested itself in the collapse of these banks, and the global economy is now very likely to slow, achieving central banks' desired effect. The recent decision by OPEC to cut oil production by one million barrels a day is probably another sign that the global economy is cooling. The only country where we see room for improvement remains China. This would be a very positive outcome as it should mitigate the impact of a slowing US economy, in our view.

Lazard Asset Management LLC
31 March 2023

Investment Managers' Report (continued)

Lazard Rathmore Alternative Fund

Investment Review

Over the twelve-month period ending 31 March 2023, the Lazard Rathmore Alternative Fund (the "Fund") returned -2.42%¹.

Market Review

Across what was a notably difficult market environment for most traditional asset classes, the Lazard Rathmore Alternative Fund delivered meaningful downside risk mitigation, outperforming most major market indices on an absolute and risk-adjusted basis.

Portfolio performance across the period was primarily impacted by basis cheapening, associated with long-only selling, in response to the dramatic rebasing of the short-end of the Treasury curve, the significant repricing of equities across the convertible securities marketplace, and the widening of corporate credit spreads.

To be more specific, over the period, equities across the convertible securities marketplace repriced -25%, as compared to -8% for the S&P 500 Index and -12% for the Russell 2000 Index. The US 2-year (which best matches the duration of the asset class) yield recorded an increase of 72% (547% in 2022), and the spread on the ICE BofA US High Yield Index widened by 32% (from +362 bps to +478 bps).

In response to these dynamics, long-only convertible bondholders, who are unhedged and therefore long equities, credit, and rates, made accelerated sales. Based on the team's proprietary, extrapolated data, long-only market participants seemingly sold approximately 33% of total holdings since the beginning of 2022. Broadly speaking, it is very difficult to effectively hedge out the "basis risk" of the asset class, given that this dynamic is largely related to other investors electing to make accelerated sales at dislocated prices.

While the impact from basis cheapening across the marketplace, associated with the above outlined dynamics, was significant, increased equity volatility and an increased focus on liability management by convertible issuers were supportive of return generation.

The notable pickup in equity volatility observed in 2022 (which at points in time led to a doubling of the VIX), caused realised volatility across underlying stocks in the convertible securities marketplace to increase by approximately +50% to +75% on average. Standard deviation bands associated with gamma trading widened +50% to +100% across the year to take advantage of this dynamic, leading to a more than doubling of volatility yield across the portfolio when compared to the start of the year.

Special Situations activity, while muted for much of the period, accelerated into year-end 2022 and continued at a heightened pace into the first quarter of 2023, with issuers largely focused on repurchasing debt and/or extending maturities (i.e., buybacks and exchange offers).

Portfolio Review

What Contributed to Returns:

- Carry, macro equity hedges and Special Situations activity contributed positively to returns across the period.
- Coupa Software 0.125% and 0.375% convertibles gained following market speculation that the company could be acquired by Thoma Bravo, which it eventually was.
- Royal Caribbean Cruises 6% convertibles which were issued in August 2022 contributed positively to returns and benefitted from elevated levels of volatility in the fourth quarter of 2022.

What Detracted from Returns:

- Amyris 1.5% (AMRS) detracted from returns as the convertible basis cheapened due to weakening company fundamentals.
- Avaya 8% detracted from returns as fundamentals weakened. The company underwent in-court restructuring, which it exited from recently.

Outlook

The absolute value proposition, associated with the various sources of return to the strategy, remains compelling, both on a relative and absolute basis. The near-term outlook on credit is largely contingent upon the broader economic backdrop, which remains subject to a wide range of outcomes. Due to market uncertainty, the Fund continues to target a duration of approximately 1 year, with a particular focus on higher grade/stronger balance sheets, while reducing exposures to lower-tier issuers.

Investment Managers' Report (continued)

Lazard Rathmore Alternative Fund (continued)

Outlook (continued)

Equities remain subject to many of the same challenges which have weighed on valuations for the last several quarters, including less certainty surrounding corporate margins, higher funding costs and the broader economic backdrop, among other things. The Fund remains delta-neutral on equities and is positioned to benefit from an uptick in volatility. We believe that the macro backdrop is going to continue to provide elevated levels of equity volatility, January and February 2023 notwithstanding.

Special Situations activity accelerated across the first quarter of 2023, running at nearly twice the rate from a year ago. Numerous discussions remain ongoing. With a significant maturity calendar in the 2025-2026 period, Special Situations should continue to provide a tailwind to returns. We expect to see more than \$50 billion of paper issued in the first half of 2023, of which approximately \$25 billion has priced year-to-date. We expect returns from the primary market to contribute anywhere from +100 basis points to +200 basis points, on a forward-looking twelve-month basis.

Liquidity remains very supportive of the broader opportunity set, with approximately \$3.0 billion in paper trading per day, globally. With a marketplace that is now approximately \$400 billion in size, this means that the entire asset class rolls approximately every six months or so.

Outright/directional capital flows into the space accelerated in January 2023, but reversed in February and March. Any sustained stabilisation (if not a reversal) in flows could have a material, positive impact on basis, particularly should interest from newer cross-over buyers, including a handful of new hedge fund entrants into the space, continue.

Lazard Asset Management LLC
31 March 2023

Investment Managers' Report (continued)

Lazard Coherence Credit Alternative Fund

Investment Review

Over the twelve-month period ending 31 March 2023 Lazard Coherence Credit Alternative Fund (the "Fund") returned 2.50% against the HFRX Fixed Income Credit Index, which returned -5.46%¹.

Market Review

It was certainly a year to forget by any measure, especially in terms of returns. Markets suffered across the board. Equities and fixed income massively underperformed led by higher interest rates. The consistent rate hikes by the Federal Reserve forced revaluations across all markets and the war in Ukraine as well as continued China lockdowns stressed global supply chains, energy markets, and generally kept tensions high. Additional rumblings from North Korea and its aggressive nuclear tactics, along with the China/Taiwan hostilities, kept geo-political pressure on the markets.

As we entered the end of this period we faced the ninth consecutive Federal Funds rate hike in the US, the result of which was significant pressure on the banking sector and three major financial institutions needing some form of government intervention (Silicon Valley Bank, Signature Bank, and Credit Suisse).

Credit spreads were under pressure for most of the year although we did see some signs of investor enthusiasm in the last quarter of 2022. However, the stress in the banking sector erased most of that enthusiasm during February and March of 2023.

Portfolio Review

What Contributed to Returns:

- The names with the most positive impact on performance were Royal Caribbean and Carnival Cruises as the reopening theme and collateral provided by the issuers to refinance their capital structure offered great opportunities for positive return generation.
- Our short position in Post Holdings, a Consumer packaged goods holding Company, performed well as the issuer struggled most of the year with increased costs from labour and materials as well as foreign exchange headwinds.

What Detracted from Returns:

- Given that we were positioned defensively for most of the period in high-quality short-dated holdings, we did not experience significant drags on performance. Deutsche Bank was one of the few names as the bank struggled during the Credit Suisse crisis.

Outlook

Lazard Coherence Credit Alternative Fund will be closing on 17 July 2023.

All data contained herein is sourced by Lazard Asset Management unless otherwise noted as at 31 March 2023.

Depository's Report

Report of the Depository to the Shareholders

We have enquired into the conduct of Lazard Global Investment Funds plc ("the Company") for the financial year ended 31 March 2023, in our capacity as Depository to the Company.

This report including the opinion has been prepared for and solely for the shareholders in the Company in accordance with Regulation 34, (1), (3) and (4) in Part 5 of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended, ('the UCITS Regulations'), and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depository

Our duties and responsibilities are outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations. One of those duties is to enquire into the conduct of the Company in each annual accounting period and report thereon to the shareholders.

Our report shall state whether, in our opinion, the Company has been managed in that period in accordance with the provisions of the Company's Constitution and the UCITS Regulations. It is the overall responsibility of the Company to comply with these provisions. If the Company has not so complied, we as Depository must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Depository Opinion

The Depository conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations and to ensure that, in all material respects, the Company has been managed (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of the Company's Constitution and the UCITS Regulations and (ii) otherwise in accordance with the Company's constitution documentation and the appropriate regulations.

Opinion

In our opinion, the Company has been managed during the financial year, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the Constitution, the UCITS Regulations and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (as amended) ('the Central Bank UCITS Regulations'); and
- (ii) otherwise in accordance with the provisions of the Constitution, the UCITS Regulations and the Central Bank UCITS Regulations.

Ireland

Date: 5 July 2023

Independent Auditors' Report

Independent auditors' report to the members of Lazard Global Investment Funds plc

Report on the audit of the financial statements

Opinion

In our opinion, Lazard Global Investment Funds plc's financial statements:

- give a true and fair view of the Company's and Funds' assets, liabilities and financial position as at 31 March 2023 and of their results for the year then ended;
- have been properly prepared in accordance with Generally Accepted Accounting Practice in Ireland (accounting standards issued by the Financial Reporting Council of the UK, including Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" and Irish law); and
- have been properly prepared in accordance with the requirements of the Companies Act 2014 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended).

We have audited the financial statements, included within the Annual Report and Audited Financial Statements, which comprise:

- the Statement of Financial Position as at 31 March 2023;
- the Statement of Comprehensive Income for the year then ended;
- the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders for the year then ended;
- the Portfolio of Investments for each of the Funds as at 31 March 2023; and
- the notes to the financial statements for the Company and for each of its Funds, which include a description of the significant accounting policies.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) ("ISAs (Ireland)") and applicable law.

Our responsibilities under ISAs (Ireland) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, which includes IAASA's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Emphasis of matter – financial statements prepared on a basis other than going concern

In forming our opinion on the financial statements, which is not modified, we draw attention to note 2 to the financial statements which describes the reasons why the financial statements of Lazard Emerging Markets Bond Fund, Lazard Diversified Return Fund and Lazard Coherence Credit Alternative Fund have been prepared on a basis other than going concern.

Conclusions relating to going concern

With the exception of Lazard Emerging Markets Bond Fund, Lazard Diversified Return Fund and Lazard Coherence Credit Alternative Fund where a basis of accounting other than going concern has been adopted as set out in the Emphasis of matter - financial statements prepared on a basis other than going concern above, based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's and Funds' ability to continue as a going concern for a period of at least twelve months from the date on which the financial statements are authorised for issue.

With the exception of Lazard Emerging Markets Bond Fund, Lazard Diversified Return Fund and Lazard Coherence Credit Alternative Fund where a basis of accounting other than going concern has been adopted as set out in the Emphasis of matter - financial statements prepared on a basis other than going concern above, in auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Independent Auditors' Report (continued)

Independent auditors' report to the members of Lazard Global Investment Funds plc (continued)

Conclusions relating to going concern (continued)

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the Company's and Funds' ability to continue as a going concern.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Reporting on other information

The other information comprises all of the information in the Annual Report and Audited Financial Statements other than the financial statements and our auditors' report thereon. The directors are responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon. In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

With respect to the Directors' Report, we also considered whether the disclosures required by the Companies Act 2014 have been included.

Based on the responsibilities described above and our work undertaken in the course of the audit, ISAs (Ireland) and the Companies Act 2014 require us to also report certain opinions and matters as described below:

- In our opinion, based on the work undertaken in the course of the audit, the information given in the Directors' Report for the year ended 31 March 2023 is consistent with the financial statements and has been prepared in accordance with applicable legal requirements.
- Based on our knowledge and understanding of the Company and its environment obtained in the course of the audit, we have not identified any material misstatements in the Directors' Report.

Responsibilities for the financial statements and the audit

Responsibilities of the directors for the financial statements

As explained more fully in the Statement of Directors' Responsibilities set out on page 6, the directors are responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view.

The directors are also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Company's and Funds' ability to continue as going concerns, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Our audit testing might include testing complete populations of certain transactions and balances, possibly using data auditing techniques. However, it typically involves selecting a limited number of items for testing, rather than testing complete populations. We will often seek to target particular items for testing based on their size or risk characteristics. In other cases, we will use audit sampling to enable us to draw a conclusion about the population from which the sample is selected.

Independent Auditors' Report (continued)

Independent auditors' report to the members of Lazard Global Investment Funds plc (continued)

Responsibilities for the financial statements and the audit (continued)

Auditors' responsibilities for the audit of the financial statements (continued)

A further description of our responsibilities for the audit of the financial statements is located on the IAASA website at:

https://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8f-a98202dc9c3a/Description_of_auditors_responsibilities_for_audit.pdf

This description forms part of our auditors' report.

Use of this report

This report, including the opinions, has been prepared for and only for the Company's members as a body in accordance with section 391 of the Companies Act 2014 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Other required reporting

Companies Act 2014 opinions on other matters

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the Company were sufficient to permit the financial statements to be readily and properly audited.
- The financial statements are in agreement with the accounting records.

Companies Act 2014 exception reporting

Directors' remuneration and transactions

Under the Companies Act 2014 we are required to report to you if, in our opinion, the disclosures of directors' remuneration and transactions specified by sections 305 to 312 of that Act have not been made. We have no exceptions to report arising from this responsibility.

Notes to the Financial Statements

1. General

Lazard Global Investment Funds plc (the “Company”) was incorporated on 3 February 2009 as an open-ended investment company with variable capital structured as an umbrella fund and with segregated liability between its sub-funds (individually referred to as the “Fund” and collectively the “Funds”) organised under the laws of Ireland. The Company qualifies and is authorised in Ireland by the Central Bank of Ireland (the “Central Bank”) as an Undertaking for Collective Investment in Transferable Securities under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the “UCITS Regulations”) and the Central Bank’s (Supervision and Enforcement) Act 2013 (section 48(1)) UCITS Regulations 2019 (as amended), (the “Central Bank UCITS Regulations”). The Company is structured as an umbrella fund in that the Share capital of the Company may be divided into different classes of Shares with one or more classes representing a separate Fund of the Company.

The Company currently has twenty Funds in existence, fifteen of which are active as at 31 March 2023. As at 31 March 2023, Lazard Global Quality Growth Fund, Lazard Thematic Inflation Opportunities Fund (launched on 21 June 2022), Lazard Global Convertibles Investment Grade Fund, Lazard Global Convertibles Recovery Fund, Lazard Emerging Markets Local Debt Fund, Lazard Emerging Markets Total Return Debt Fund, Lazard Emerging Markets Debt Blend Fund, Lazard Emerging Markets Debt Unrestricted Blend Fund, Lazard Emerging Markets Corporate Debt Fund, Lazard Nordic High Yield Bond Fund (launched on 1 November 2022), Lazard Scandinavian High Quality Bond Fund, Lazard Commodities Fund, Lazard Diversified Return Fund, Lazard European Alternative Fund, Lazard Rathmore Alternative Fund and Lazard Coherence Credit Alternative Fund were funded. The investment objectives of each Fund within the Company are set out in the Prospectus and relevant Supplements for the Funds.

Lazard Opportunities Fund closed on 7 November 2016 and Lazard Global Hexagon Equity Fund closed on 18 August 2017. Lazard Emerging Markets Bond Fund closed on 16 November 2022. Lazard Diversified Return Fund closed on 13 January 2023. Lazard Demographic Opportunities Fund was approved by the Central Bank on 21 December 2021 but has not yet launched.

2. Significant Accounting Policies

The significant accounting policies and estimation techniques adopted by the Company in the preparation of the financial statements are set out below. All references to net assets throughout the financial statements refer to net assets attributable to holders of Redeemable Participating Shares unless otherwise stated.

Statement of compliance

The financial statements for the financial year ended 31 March 2023 have been prepared in accordance with Financial Reporting Standard 102 “The Financial Reporting Standard applicable in the UK and Republic of Ireland” (“FRS 102”), Irish statute comprising the Companies Act 2014, UCITS Regulations and the Central Bank UCITS Regulations.

Basis of preparation

The financial statements are prepared under the historical cost convention as modified by the revaluation of financial assets and financial liabilities held at fair value through profit or loss. The financial statements have been prepared on a going concern basis and in accordance with accounting standards generally accepted in Ireland, the provisions of the Companies Act 2014, UCITS Regulations and the Central Bank UCITS Regulations. Accounting standards generally accepted in Ireland in preparing financial statements giving a true and fair view are those accounting standards issued by the Financial Reporting Council (Generally Accepted Accounting Practice in Ireland).

The Company’s management has made an assessment of the Company’s ability to continue as a going concern and is satisfied that the Company has the resources to continue in business for the foreseeable future. Furthermore, the management is not aware of any material uncertainties that may cast significant doubt upon the Company’s ability to continue as a going concern. Therefore, the financial statements of the Company and Funds (with the exception of the closed Funds noted below) continue to be prepared on a going concern basis.

Lazard Emerging Markets Bond Fund and Lazard Diversified Return Fund were closed during the financial year ended 31 March 2023. Subsequent to the financial year end, the Company intend to close Lazard Coherence Credit Alternative Fund. As a result, the financial statements of these Funds have been prepared on a non-going concern basis.

The Company has availed of the exemption available to open-ended investment funds under FRS 102, Section 7 “Statement of Cash Flows” not to prepare a cash flow statement on the basis that substantially all of the Company’s investments are highly liquid and carried at fair value, and the Company provides a Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders.

During the financial year and prior financial year, a number of the Funds invested in other Funds in the Company (the “Cross-Investments”). The fair value of these investments as of 31 March 2023 is disclosed within each relevant Fund’s Schedule of Investments. For the purposes of producing the Company’s consolidated financial statements these Cross Investments must be eliminated in order to prevent double counting. The total amount of the adjustment made to the combined financial statements in respect of the Cross-Investments is disclosed in the Cross-Investment section of Note 13.

Notes to the Financial Statements (continued)

2. Significant Accounting Policies (continued)

Foreign Exchange Translation

(a) Functional and presentation currency: Items included in the Company's financial statements are measured using the currency of the primary economic environment in which it operates (the "functional currency"). This is US Dollar ("USD") except for Lazard Global Convertibles Investment Grade Fund, Lazard European Alternative Fund, Lazard Nordic High Yield Bond Fund and Lazard Scandinavian High Quality Bond Fund in which cases it is Euro ("EUR"). The Company has adopted the functional currency of each Fund as the presentation currency for these financial statements. The functional currency has been adopted as the presentation currency at Fund level and at Company level, USD is the presentational currency.

For the purpose of combining the financial statements of each Fund to arrive at the consolidated figures, the financial assets and financial liabilities in the financial statements have been translated to USD at the exchange rate at the respective financial year end dates. The amounts in the Statement of Comprehensive Income and in the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders have been translated to USD using an average rate for the financial year as an approximation for actual. This has no effect on the Net Asset Value "NAV" per Share attributable to the individual Fund. All exchange rates are disclosed in Note 7.

The foreign currency translation adjustment of USD (21,009,626) (31 March 2022: USD (55,942,572)) included in the "Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders" reflects the movement in exchange rates for the financial year. This is a notional amount which has no impact on the results of the individual Funds.

(b) Assets and liabilities other than those denominated in the functional currency of each Fund are translated into the functional currency at the exchange rate ruling at the financial year end. Transactions in foreign currencies are translated into the functional currency at the exchange rates ruling at the dates of the transactions. The resulting gain or loss arising on translation of securities and other assets and liabilities is included in net movement in unrealised gains and losses on investments/currency. Forward currency contracts which are outstanding at the financial year end are valued at financial year end forward rates. The resulting unrealised gain or loss is included in net movement in unrealised gains and losses on investments/currency. Realised gains and losses arising between the transaction and settlement dates on purchases or sales of securities denominated in the non-base currencies and on settled forward foreign currency exchange contracts are included in net realised gains and losses on investments/foreign currency.

Accounting estimates and judgements

The preparation of the financial statements, in accordance with accounting standards generally accepted in Ireland, requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the financial year. Actual results could differ from those estimates.

Financial instruments

(i) Classification

The Company classifies its financial instruments as financial assets or financial liabilities at fair value through profit or loss. These financial assets and financial liabilities are classified as held for trading or designated by the Directors at fair value through profit or loss at inception. Financial assets and financial liabilities designated at fair value through profit or loss at inception are those that are managed and their performance evaluated on a fair value basis in accordance with the Company's documented investment strategy. The Company's policy is for the Investment Managers and the Directors to evaluate the information about these financial assets and liabilities on a fair value basis together with other related financial information.

(ii) Recognition and Derecognition

Purchases and sales of investments are recognised on trade date – the date on which the Company commits to purchase or sell the asset. Investments are initially recognised at fair value, and transaction costs for all financial assets carried at fair value through profit or loss are expensed as incurred. Investments are derecognised when the rights to receive cash flows from the investments have expired or the Company has transferred substantially all risks and rewards of ownership.

(iii) Measurement

Financial assets and financial liabilities at fair value through profit or loss are initially recognised at fair value. Subsequent to initial recognition, all financial assets and financial liabilities at fair value through profit or loss are measured at fair value. Gains and losses arising from changes in the fair value of the financial assets or financial liabilities at fair value through profit or loss category are presented in the Statement of Comprehensive Income in the financial year in which they arise.

Notes to the Financial Statements (continued)

2. Significant Accounting Policies (continued)

Financial instruments (continued)

(iv) Fair Value Estimation

In accordance with FRS 102, the Company has elected to apply the recognition and measurement provisions of International Accounting Standards 39 “Financial Instruments: Recognition and Measurement” as adopted for use in the European Union and the disclosure requirements of Sections 11 and 12 of FRS 102. Accordingly, the fair valuation input utilised for both financial assets and financial liabilities is the last traded price where the investment is an equity security and mid-market price where the investment is a fixed income security. During the financial year and previous financial year, the Company applied fair value factors on the market price of securities for certain Funds.

Securities listed on a recognised stock exchange or traded on any other organised market are valued at the last traded price where the investment is an equity security and where the investment is a fixed income security, at the mid-market price on the stock exchange or market which constitutes the principal market for such securities. If for specific assets the last traded price or mid-market price does not, in the opinion of the Directors, reflect their fair value or are not available, the value shall be the probable realisable value estimated with care and in good faith by the competent person who has been appointed by the Directors and approved by the Depositary.

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. The Company uses a variety of methods and makes assumptions that are based on market conditions existing at each Statement of Financial Position date. Valuation techniques used include the use of comparable recent arm’s length transactions, discounted cash flow analysis, option pricing models and other valuation techniques commonly used by market participants. Unlisted securities and thinly traded securities are valued in good faith by the competent person who has been appointed by the Directors and approved by the Depositary, based on quotations received from third parties including relevant brokers, however no securities were valued in this manner as at 31 March 2023 with the exception of four securities held on Lazard Emerging Markets Total Return Debt Fund and two securities held on Lazard Rathmore Alternative Fund which were classified at level 3 during the financial year ended 31 March 2023 (31 March 2022: four securities held on Lazard Emerging Markets Total Return Debt Fund, one security held on Lazard Diversified Return Fund and three securities held on Lazard Rathmore Alternative Fund). These securities were fair valued at USD Nil as at 31 March 2023 (31 March 2022: USD 930,151). Please refer to Note 9.

Investments in open-ended investment funds are valued at fair value at the latest available unaudited NAV for the Shares or units obtained from the relevant administrator. The change in the daily NAV of these Shares is recognised as net gain/(loss) on investments and foreign currency in the Statement of Comprehensive Income.

Fair Value Adjustment Factors were applied, where applicable, on a daily basis to manage the risk of potential market timing due to the closure of non-US exchanges prior to US exchanges. The application of Fair Value Adjustment Factors provides an estimate of the pricing divergence between local exchange closing prices and what the same securities are estimated to be worth at the valuation point of the NAV. Fair Value Adjustments Factors have not been applied to any of the Fund as at 31 March 2023 and 31 March 2022.

Each of the Funds may employ investment techniques and financial derivative instruments for efficient portfolio management and/or investment purposes subject to the conditions and within the limits laid down by the Prospectus and the Central Bank and these are as follows:

Futures Contracts

Initial margin deposits are made upon entering into futures contracts and are generally made in cash or cash equivalents. The fair value of futures contracts is based upon their current quoted daily settlement prices on the relevant exchange as of the Statement of Financial Position date. Changes in the value of open futures contracts are recognised as unrealised gains or losses on futures contracts until the contracts are terminated, at which time realised gains and losses are recognised. For each relevant Fund, gains or losses on open futures contracts are shown in the Portfolio of Investments of each relevant Fund and as appropriate, on the Statement of Financial Position as financial assets or liabilities at fair value through profit or loss. Realised gains and losses are reported within net realised gains/(losses) on investments in the Statement of Comprehensive Income.

Forward foreign currency exchange contracts

The unrealised appreciation or depreciation on open forward foreign exchange contracts is calculated by reference to the difference between the contracted rate and the forward rate to close out the contract as at the financial year end. Unrealised appreciation or depreciation on forward contracts is reported in the Statement of Financial Position and the Statement of Comprehensive Income. Realised gains and losses are reported with all other foreign currency gains and losses in the Statement of Comprehensive Income.

Notes to the Financial Statements (continued)

2. Significant Accounting Policies (continued)

Financial instruments (continued)

(iv) Fair Value Estimation (continued)

Options

The premium on purchased put options exercised is subtracted from the proceeds of the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on purchased call options exercised is included in determining initial fair value of the securities or foreign currency purchased. Premiums paid from the purchase of options which expire unexercised are treated as realised losses. The premium on written call options exercised is added to the proceeds from the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on written put options exercised is included in determining initial fair value of securities or foreign currencies purchased. Premiums received from written options which expire unexercised are treated as realised gains. The over-the-counter (“OTC”) options are valued at close of business daily. The valuation is based off a comparison of three sources agreed with Lazard in the Price Source Agreement (the “PSA”): the vendor (the Primary Source), the counterparty (the Secondary Source) and the Investment Manager (the Tertiary Source). The differences in the prices are reviewed against the tolerances outlined in the PSA to determine the price to be applied. Exchange traded options are valued at settlement price.

Credit default swaps

Credit default swaps involve, to varying degrees, elements of credit and counterparty risk in excess of the amount recognised in the Statement of Financial Position. Valuation of the credit default swap is an estimate of a credit default event happening at a particular point in time. Notional principal amounts are used to express the extent of involvement in these transactions, but the amounts potentially subject to credit risk are much smaller. The fair values of credit default swaps are calculated using standard net present value methodologies whereby all future cashflows of the fixed side of the swap are discounted to their present value using the appropriate interest rate and whereby all future cashflows of the default side of the swap are discounted to their present value based on the cost of default to the default payer. This cost is determined by the recovery rate, notional amount of the contract, and default probability among other factors.

Credit default swap contracts are valued at close of business daily. The valuation is based off a comparison of three sources agreed with Lazard in the PSA: the vendor (the Primary Source), the counterparty (the Secondary Source) and the Investment Manager (the Tertiary Source). The differences in the prices are reviewed against the tolerances outlined in the PSA to determine the price to be applied. Payments received or made as a result of a credit event or termination of the contract are recognised, net of a proportional amount of the upfront payment, as realised gains or losses. The fair value of the swaps as at the financial year end are recognised in the relevant Fund's Portfolio of Investments and included in Financial Assets at fair value through profit or loss or Financial liabilities at fair value through profit or loss on the Fund's Statement of Financial Position. Movement in unrealised gains/(losses) since the prior financial year end and realised gains/(losses) during the financial year are recognised within Net realised gains/(losses) in the Statement of Comprehensive Income. Interest income and interest expenses are accrued for and recognised in the Statement of Comprehensive Income.

Interest rate swaps

The fair value of interest rate swaps is calculated using standard net present value methodologies whereby all future cash flows of the interest rate swaps are discounted to their present value using the appropriate interest rate. Interest rate swap contracts are valued at close of business daily. The valuation is based off a comparison of three sources agreed with Lazard in the PSA: the vendor (the Primary Source), the counterparty (the Secondary Source) and the Investment Manager (the Tertiary Source). The differences in the prices are reviewed against the tolerances outlined in the PSA to determine the price to be applied. Payments received or made are recorded as realised gains or losses.

The fair value of the swaps as at the financial year end are recognised in the relevant Fund's Portfolio of Investments and included in Financial Assets at fair value through profit or loss or Financial liabilities at fair value through profit or loss on the Fund's Statement of Financial Position. Movement in unrealised gains/(losses) since the prior financial year end and realised gains/(losses) during the financial year are recognised within Net realised gains/(losses) in the Statement of Comprehensive Income. Interest income and interest expenses are accrued for and recognised in the Statement of Comprehensive Income.

2. Significant Accounting Policies (continued)

Financial instruments (continued)

(iv) Fair Value Estimation (continued)

Total return swaps

A total return swap is an agreement in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset. The total return swap may be applied to any underlying asset but is most commonly used with equity indices, single stocks, bonds and defined portfolios of loans and mortgages. The fair value of the swap is reported as an asset or liability as appropriate on the Statement of Financial Position and movements in the fair value are recorded in the Statement of Comprehensive Income as part of net gain/(loss) on financial assets and financial liabilities at fair value through profit or loss and foreign currencies. Total return swaps are marked-to market daily based upon a Bloomberg valuation (the Primary Source) and validated against quotations received from the counterparty (the Secondary Source). The Bloomberg valuation is applied (provided it is in line with the counterparty). The pricing source hierarchy for each derivative instrument is outlined in the PSA.

The fair value of the swaps as at the financial year end are recognised in the relevant Fund's Portfolio of Investments and included in Financial Assets at fair value through profit or loss or Financial liabilities at fair value through profit or loss on the Fund's Statement of Financial Position. Movement in unrealised gains/(losses) since the prior financial year end and realised gains/(losses) during the financial year are recognised within Net realised gains/(losses) in the Statement of Comprehensive Income. Interest income and interest expenses are accrued for and recognised in the Statement of Comprehensive Income.

Cash at Bank, Bank Overdrafts and Margin Cash

Cash at bank and bank overdrafts are valued at face value, with interest accrued where applicable at the relevant valuation point on the relevant business day. Cash is also deposited by or on behalf of the Funds for initial margin purposes with brokers for options, open futures contracts and swaps and as such cash is restricted it is reported separately as Margin Cash (asset) on the Statement of Financial Position. Margin cash may also be payable by a Fund to a broker at the financial year end. Such amounts are recognised as a liability on the Statement of Financial Position.

Collateral

Counterparty cash received by a Fund as collateral for financial derivative instrument transactions is recorded as an asset on the Statement of Financial Position within "Broker cash held as collateral for financial derivative instrument transactions" and a related liability to repay the collateral is disclosed within "Broker cash due to counterparties for financial derivative instrument transactions". Cash pledged by a Fund as collateral is recognised as an asset on the Statement of Financial Position within "Broker cash held with counterparties for financial derivative instrument transactions".

Investments pledged by a Fund as collateral are recognised at fair value in the relevant Fund's Portfolio of Investments and as Financial assets at fair value through profit and loss on the relevant Fund's Statement of Financial Position. Such investments are referenced accordingly at the base of the Portfolio of Investments.

Non-cash collateral pledged by a Fund does not form part of the NAV of the Fund and is recorded at the base of each relevant Portfolio of Investments for reference purposes only.

Receivables and payables

Receivables and payables for investments sold and purchased awaiting settlement represent receivables for securities sold and purchased. Receivables and payables for subscriptions and redemptions represent Shares subscribed or redeemed that have been contracted for but not yet settled on the Statement of Financial Position. These amounts are recognised initially at fair value and subsequently measured at amortised cost.

Accrued income and expenses

Accrued income and expenses comprise of investments income receivable, other assets, distribution payable and expenses payable. These amounts are recognised initially at fair value and subsequently measured at amortised cost.

The Funds may be subject to taxes imposed by certain countries on capital gains on the sale of investments. Taxes may be imposed by countries including Bangladesh, Brazil, India, Indonesia, Colombia and Pakistan. Capital gains taxes are accounted for on an accruals basis for these countries and are shown as a separate item in the Statement of Comprehensive Income.

Notes to the Financial Statements (continued)

2. Significant Accounting Policies (continued)

Realised and unrealised gains and losses on investments

Realised gains and losses are calculated based on a first in first out (“FIFO”) basis. Realised and unrealised gains and losses arising from changes in the fair value of financial assets and financial liabilities at fair value through profit or loss category are included in the Statement of Comprehensive Income in the financial year in which they arise.

Interest income and expense

Interest income and expense are recognised in the Statement of Comprehensive Income for all debt instruments using the effective interest method. The effective interest method is a method of calculating the amortised cost of a financial asset or financial liability and of allocating the interest income or interest expense over the relevant financial year. Bond interest income is reported gross of irrecoverable withholding tax, which is disclosed separately in the Statement of Comprehensive Income, and net of any tax credits.

The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts throughout the expected life of the financial instrument, or a shorter period where appropriate, to the net carrying amount of the financial asset or financial liability.

Dividend income

Dividend income is recognised through profit and loss on an ex-dividend basis. Dividend income is shown gross of any non-recoverable withholding taxes, which are disclosed separately in the Statement of Comprehensive Income.

Expenses

Expenses are accounted for on an accruals basis.

Offsetting financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position where there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

Distributions

Distributions, if declared, will only be paid out of a Fund’s net investment income return.

Distributions with an ex date during the financial year are included as a finance cost in the Statement of Comprehensive Income. Dividends will not be paid in respect of any class of Share which is an accumulating class. Income and profits, if any, attributable to an accumulating Share class will be accumulated, reinvested in the relevant Fund on behalf of the Shareholders of that class and will be reflected in the NAV of the relevant accumulating Share class. Please see Note 14 for details of any distributions paid during the financial year ended 31 March 2023 and 31 March 2022.

Equalisation

Income equalisation arrangements apply to each Fund. The arrangements are intended to ensure that the income per Share which is distributed in respect of the distribution period is not affected by changes in the number of Shares in issue during the period. The arrangements have no effect on the NAV of any Share class. The calculation of equalisation is based on total accumulated undistributed net income.

Swing Pricing and Anti-Dilution Levy

Up to 13 May 2021 an anti-dilution levy was paid to the Funds and was used to defray the cost related to the associated purchase or sale of securities within the Funds as a result of shareholder transactions. Anti-dilution levies are included in the movement in net assets resulting from share transactions in the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders for the financial year ended 31 March 2022.

Notes to the Financial Statements (continued)

2. Significant Accounting Policies (continued)

Swing Pricing and Anti-Dilution Levy (continued)

Effective 13 May 2021, swing pricing mechanism were implemented to some of the Funds of the Company. Swing pricing, where applied, aims to ensure that the burden of the costs associated with dealing in a Fund's Shares are borne by the investors that actually request those Share deals on a particular Dealing Day, and not by the Shareholders in a Fund who are not trading in the Shares on the relevant Dealing Day. In this way, swing pricing aims to mitigate the adverse effects of dilution on Fund assets and to preserve and protect the value of shareholdings. As at 31 March 2023, swing prices were only applied to Lazard Emerging Markets Local Debt Fund and Lazard Emerging Markets Total Return Debt Fund however, there were swing adjustments applied across various Funds during the financial year. As at 31 March 2022 there were no swing prices applied to any of the Funds however, there were swing adjustments applied across various Funds during the financial year.

Transaction costs

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument. When a financial asset or financial liability is recognised initially, an entity shall measure it at its fair value through profit or loss plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability. Transaction costs on the purchase and sale of fixed income securities, money market instruments, forward foreign exchange currency contracts and swaps are included in the purchase and sale price of the investment and are not separately identifiable. Transaction costs on purchases and sales of equities, futures contracts, options contracts and investment funds are included in net gains/(losses) on financial instruments at fair value through profit or loss in the Statement of Comprehensive Income for each Fund.

Depository transaction costs include transaction costs paid to the depository and the sub-custodian. Purchases and sales transaction costs include identifiable brokerage charges, commissions, transaction related taxes and other market charges. Depository transaction costs are included in depository fees as disclosed in Note 3. These costs are separately identifiable transaction costs and the total costs incurred by each Fund during the financial year and prior financial year are disclosed in Note 3.

3. Fees

Management Fees

The Manager has responsibility for the management and administration of the Company's affairs and the distribution of the Shares, subject to the overall supervision and control of the Directors.

The Manager is entitled to a charge per annum of the NAV attributable respectively to each of the following Share classes.

Such fees as detailed below shall accrue daily and be payable monthly in arrears. The Manager shall also be entitled to be reimbursed by the Funds for its reasonable out-of-pocket expenses.

* Lazard Thematic Inflation Opportunities Fund launched on 21 June 2022.

** Lazard Nordic High Yield Bond Fund launched on 1 November 2022.

*** Lazard Emerging Markets Bond Fund fully redeemed on 16 November 2022.

**** Lazard Diversified Return Fund fully redeemed on 13 January 2023.

See Note 15 for information on the launch and termination dates of the above Share classes.

Investors are only permitted to hold units in the X Share class where Lazard or an affiliate are appointed as the investment managers to carry out investment management or advisory services on their behalf. Shareholders in the class will be subject to a fee with regard to their investment in the Fund based on the Investment Management Agreement between themselves and the investment managers or a Lazard affiliate. Shares in the M Classes are available only to other Funds managed or advised by an affiliate or to such other persons as the Manager may determine from time to time.

The Manager has delegated the performance of the investment management function in respect of the Funds to the Investment Managers. The Manager will be responsible for discharging the fees and expenses of the Investment Managers, the Promoter and the Distributor out of its fee. For the financial year ended 31 March 2023, management fees of USD 34,881,388 (31 March 2022: USD 33,732,801) were charged of which USD 4,604,259 (31 March 2022: USD 2,927,226) remained payable at the financial year end.

Performance Fees

The Manager is entitled to receive a performance fee in respect of Lazard Emerging Markets Total Return Debt Fund, Lazard Coherence Credit Alternative Fund, Lazard European Alternative Fund and Lazard Rathmore Alternative Fund. Below is a description of how this fee is calculated for each Fund.

Lazard Emerging Markets Total Return Debt Fund

The Manager is entitled to receive a performance fee (the "Performance Fee"), accrued daily and which crystallises and becomes payable only once annually (or otherwise on redemption of the relevant Shares), in respect of each of the Share classes in the Fund excluding the D Classes, the X Classes and the M Classes, equal to 20% of the Net Gain, if any, during the relevant Performance Period (the "Performance Period"). No Performance Fee shall be charged to the assets of the D Classes, the X Classes or the M Classes. A Performance Fee in respect of each relevant Share class shall accrue and become due and payable only in the event that both of the conditions below are met:

- i) the Ending NAV per Share for any Performance Period has exceeded the Hurdle NAV per Share; and
- ii) the Ending NAV per Share for the applicable Performance Period, (or as at the date the relevant Shares are redeemed), exceeds the High Water Mark.

Performance Period

The first Performance Period for each relevant Share class shall commence as of the first Business Day following the closure of the Initial Offer Period for that class and not earlier than 12 months later on the last Valuation Point of the then current calendar year. Each subsequent Performance Period shall commence immediately on the end of the prior Performance Period and end on the last Valuation Point of the next following calendar year (or otherwise on the date by reference to which the last NAV for the relevant Share class is calculated).

Ending NAV per Share

With respect to each class of Shares apart from the Unhedged Share Classes, the Ending NAV per Share is the Net Asset Value per Share of the relevant class as at the Valuation Point immediately prior to the accrual of any applicable Performance Fee.

With respect to each Unhedged Share Class, the Ending NAV per Share is the NAV per Share of the relevant class as described in the preceding paragraph, but expressed in the Fund Base Currency as calculated using the Prevailing Exchange Rate on the relevant date.

Notes to the Financial Statements (continued)

3. Fees (continued)

Performance Fees (continued)

Lazard Emerging Markets Total Return Debt Fund (continued)

Hurdle NAV per Share

The Hurdle NAV per Share is calculated by applying an annualised hurdle rate of 5% as at the date of accrual of the Performance Fee (the "Hurdle Rate") to:

- i) the opening NAV per Share of the relevant class for the then current Performance Period or, where the relevant class is an Unhedged Share Class, to the opening NAV per Share of the relevant class for the then current Performance Period as expressed in the Fund Base Currency (using the Prevailing Exchange Rate on the relevant date) (the "Opening NAV per Share"), or
- ii) where the current Performance Period is the first Performance Period for the relevant class, to the Initial Offer Price per Share for the relevant Shares or, where the relevant class is an Unhedged Share Class, to the Initial Offer Price per Share for the relevant Shares as expressed in the Fund Base Currency (using the Prevailing Exchange Rate on the relevant date).

The Hurdle Rate will be prorated for Performance Periods less than one year.

The Hurdle NAV per Share will be adjusted for any appropriate dividend paid.

High Water Mark

With respect to each class of Shares apart from the Unhedged Share Classes, the High Water Mark is the greater of: (i) the previous highest NAV per Share of the relevant Share class (after deduction of any applicable Performance Fee and any applicable dividend) on the last Valuation Point for any previous Performance Period for which a Performance Fee was paid or accrued; or (ii) the Initial Offer Price per Share of the relevant Share class.

With respect to each Unhedged Share Class, the High Water Mark is the greater of (i) or (ii) above each as expressed in the Fund Base Currency using the Prevailing Exchange Rate on the relevant date.

The High Water Mark will be adjusted for any appropriate dividend paid.

A Performance Fee is only ever payable or paid on the increase of the relevant Share classes' Net Asset Value over the relevant High Water Mark or the relevant Hurdle NAV per Share, whichever is higher. Excess performance is calculated net of all costs before any performance fee accrual.

"Prevailing Exchange Rate" means the exchange rate prevailing as between the currency in which the relevant Unhedged Share Class is denominated and the Fund Base Currency.

Net Gain

With respect to each relevant Share class, the "Net Gain per Share" is the difference between the Ending NAV per Share and the higher of (1) the Hurdle NAV per Share and (2) the High Water Mark. "Net Gain" is the Net Gain per Share multiplied by the average number of Shares of the relevant class in issue during the period commencing on the date on which the then current Performance Period began and ending on the accrual date. The average number of Shares will be adjusted to take account of redemptions during the relevant period.

General

For each Share class (excluding the D Classes, the X Classes and the M Classes) the Performance Fee will be calculated by taking the Net Gain for the relevant class for the applicable Performance Period and multiplying the resultant figure by 20%. Each Share shall bear its pro-rata share of the Performance Fee, if any, payable in respect of the relevant class. The Performance Fee will be accrued daily and, provided the relevant Shares have not been redeemed, will crystallise and be credited to the Manager once annually on the last Business Day of each calendar year and will be paid to the Manager by the 20th Business Day following the crystallisation date. For newly launched Share classes, any Performance Fee due (otherwise than on redemption of the relevant Shares) will crystallise not earlier than 12 months following closure of the Initial Offer Period for the relevant class on the last Valuation Point for the then current calendar year. Any Performance Fee accrued in respect of Shares redeemed during a Performance Period shall crystallise in due proportions and become payable at the point of redemption. The Performance Fee shall be calculated independently by the Administrator and verified by the Depositary and is not open to the possibility of manipulation.

For the financial year ended 31 March 2023, performance fees of USD Nil (31 March 2022: USD Nil) were charged and USD Nil (31 March 2022: USD Nil) were payable at the financial year end.

Notes to the Financial Statements (continued)

3. Fees (continued)

Performance Fees (continued)

Lazard Coherence Credit Alternative Fund

The Manager is entitled to receive a performance fee (the “Performance Fee”), accrued daily and payable annually (or otherwise on redemption of the relevant Shares), in respect of each of the Share classes in the Fund (excluding the EA Classes, the M Class, the X Class and the LA Class), equal to 20% of the Net Gain, if any, during the relevant Performance Period. The Manager is also entitled to receive a Performance Fee, accrued daily and payable annually (or otherwise on redemption of the relevant Shares), in respect of each of the EA Classes equal to 10% of the Net Gain, if any, during the relevant Performance Period. No Performance Fee shall be charged to the assets of the M Class and the X Class. A Performance Fee shall accrue and become due and payable in respect of Shares of any relevant class only in the event that the Ending NAV per Share for the applicable Performance Period (or as at the date the relevant Shares are redeemed) exceeds the High Water Mark.

Performance Period

The first “Performance Period” for each relevant Share class shall commence as of the first Business Day following the closure of the Initial Offer Period for that class and end not earlier than 12 months later on the last Valuation Point of the then current calendar year. Each subsequent Performance Period shall commence immediately on the end of the prior Performance Period and end on the last Valuation Point of the next following calendar year (or otherwise on the date by reference to which the last NAV for the relevant Share class is calculated).

Ending NAV per Share

With respect to each class of Shares apart from the Unhedged Share Classes, the Ending NAV per Share is the NAV per Share of the relevant class, prior to the accrual of any applicable Performance Fee and deduction of any applicable dividend, as at the last Valuation Point for the relevant Performance Period (or otherwise on the date by reference to which the price at which the relevant Shares are redeemed is calculated).

With respect to each Unhedged Share Class, the Ending NAV per Share is the NAV per Share of the relevant class as described in the preceding paragraph, but expressed in the Fund Base Currency as calculated using the Prevailing Exchange Rate on the relevant date.

High Water Mark

With respect to each class of Shares apart from the Unhedged Share Classes, the High Water Mark is the greater of: (i) the highest NAV per Share of the relevant Share class (after deduction of any applicable Performance Fee and any applicable dividend) on the last Valuation Point for any previous Performance Period for which a Performance Fee was payable; or (ii) the Initial Offer Price per Share of the relevant Share class. With respect to each Unhedged Share Class, the High Water Mark is the greater of (i) or (ii) above each as expressed in the Fund Base Currency using the Prevailing Exchange Rate on the relevant date.

The High Water Mark will be adjusted for any appropriate dividend paid.

A Performance Fee is only ever payable or paid on the increase of the relevant Share classes’ Net Asset Value over the relevant High Water Mark.

Excess performance is calculated net of all costs before any performance fee accrual.

“Prevailing Exchange Rate” means the exchange rate prevailing as between the currency in which the relevant Unhedged Share Class is denominated and the Fund Base Currency.

Net Gain

With respect to the Shares of each relevant class, the Net Gain per Share is the difference between the Ending NAV per Share and the High Water Mark. “Net Gain” is the Net Gain per Share multiplied by the average number of Shares of the relevant class in issue during the period commencing on the date on which the then current Performance Period began and ending on the accrual date. The average number of Shares will be adjusted to take account of redemptions during the relevant period.

Notes to the Financial Statements (continued)

3. Fees (continued)

Performance Fees (continued)

Lazard Coherence Credit Alternative Fund (continued)

General

For each Share class of the Fund (excluding the EA Classes, the M Classes, the X Classes and the LA Classes) the Performance Fee will be calculated by taking the Net Gain for the relevant Share class for the applicable Performance Period and multiplying the resultant figure by 20%. For each of the EA Classes the Performance Fee will be calculated by taking the Net Gain for the relevant EA Class for the applicable Performance Period and multiplying the resultant figure by 15%. For each of the LA Classes the Performance Fee will be calculated by taking the Net Gain for the relevant LA Class for the applicable Performance Period and multiplying the resultant figure by 10%. Each Share shall bear its pro-rata share of the Performance Fee, if any, payable in respect of the relevant class. The Performance Fee will be accrued daily and, provided the relevant Shares have not been redeemed, will crystallise once annually on the last Business Day of each calendar year will be paid/credited to the Manager 10 Business Days following the crystallisation date. Any Performance Fee accrued in respect of Shares redeemed during a Performance Period shall crystallise in due proportions and become payable at the point of redemption. The Performance Fee shall be calculated independently by the Administrator and verified by the Depositary and is not open to the possibility of manipulation.

For the financial year ended 31 March 2023, performance fees of USD 2,910 (31 March 2022: USD Nil) were charged and USD 2,112 (31 March 2022: USD Nil) were payable at the financial year end.

Lazard European Alternative Fund

The Manager is entitled to receive a performance fee (the "Performance Fee"), accrued daily and payable annually (or otherwise on redemption of the relevant Shares), in respect of each of the Share classes in the Fund (excluding the EA Classes, the M Class and the X Class), equal to 20% of the Net Gain, if any, during the relevant Performance Period. The Manager is also entitled to receive a Performance Fee, accrued daily and payable annually (or otherwise on redemption of the relevant Shares), in respect of each of the EA Classes equal to 10% of the Net Gain, if any, during the relevant Performance Period. No Performance Fee shall be charged to the assets of the M Class and the X Class. A Performance Fee shall accrue and become due and payable in respect of Shares of any relevant class only in the event that both of the conditions below are met:

- the Ending NAV per Share for any Performance Period has exceeded the Hurdle NAV per Share; and
- the Ending NAV per Share for the applicable Performance Period (or as at the date the relevant Shares are redeemed) exceeds the High Water Mark.

Lazard Rathmore Alternative Fund

The Manager is entitled to receive a performance fee (the "Performance Fee"), accrued daily and payable annually (or otherwise on redemption of the relevant Shares), in respect of each of the Share classes in the Fund (excluding the EA Classes, the M Classes and the X Class), equal to 20% of the Net Gain, if any, during the relevant Performance Period. The Manager is also entitled to receive a Performance Fee, accrued daily and payable annually (or otherwise on redemption of the relevant Shares), in respect of each of the EA Classes equal to 15% of the Net Gain, if any, during the relevant Performance Period. No Performance Fee shall be charged to the assets of the M Class and the X Class. A Performance Fee shall accrue and become due and payable in respect of Shares of any relevant class only in the event that both of the conditions below are met:

- the Ending NAV per Share for any Performance Period has exceeded the Hurdle NAV per Share; and
- the Ending NAV per Share for the applicable Performance Period (or as at the date the relevant Shares are redeemed) exceeds the High Water Mark.

Lazard European Alternative Fund and Lazard Rathmore Alternative Fund

Performance Period

The first "Performance Period" for each relevant Share class shall commence as of the first Business Day following the closure of the Initial Offer Period for that class and end not earlier than 12 months later on the last Valuation Point of the then current calendar year. Each subsequent Performance Period shall commence immediately on the end of the prior Performance Period and end on the last Valuation Point of the next following calendar year (or otherwise on the date by reference to which the last NAV for the relevant Share class is calculated).

Notes to the Financial Statements (continued)

3. Fees (continued)

Performance Fees (continued)

Lazard European Alternative Fund and Lazard Rathmore Alternative Fund (continued)

Ending NAV per Share

With respect to each class of Shares apart from the Unhedged Share Classes, the Ending NAV per Share is the Net Asset Value per Share of the relevant class as at the Valuation Point immediately prior to the accrual of any applicable Performance Fee.

With respect to each Unhedged Share Class, the Ending NAV per Share is the NAV per Share of the relevant class as described in the preceding paragraph, but expressed in the Fund Base Currency as calculated using the Prevailing Exchange Rate on the relevant date.

Hurdle NAV per Share

The Hurdle NAV per Share is calculated by applying the prevailing 3 month Euribor rate and 3 month US Dollar Libor rate for Lazard European Alternative Fund and Lazard Rathmore Alternative Fund (but see below) respectively (provided such rate is not a negative number and subject to a cap of 5%) as at the date of accrual of the Performance Fee (the "Hurdle Rate") to:

- (i) the opening NAV per Share of the relevant class for the then current Performance Period or, where the relevant class is an Unhedged Share Class, to the opening NAV per Share of the relevant class for the then current Performance Period as expressed in the Fund Base Currency (using the Prevailing Exchange Rate on the relevant date) (the "Opening NAV per Share"), or
- (ii) where the current Performance Period is the first Performance Period for the relevant class, to the Initial Offer Price per Share for the relevant Shares or, where the relevant class is an Unhedged Share Class, to the Initial Offer Price per Share for the relevant Shares as expressed in the Fund Base Currency (using the Prevailing Exchange Rate on the relevant date).

Where the 3 month Euribor rate prevailing at the relevant time is a negative number, the Hurdle NAV per Share shall, as the case may be, be the Opening NAV per Share or the Initial Offer Price per Share for the relevant class (such price being, where the class in question is an Unhedged Share Class, the Initial Offer Price per Share of the relevant class as expressed in the Fund Base Currency (using the Prevailing Exchange Rate on the relevant date).

The Hurdle Rate will be prorated for Performance Periods less than one year.

High Water Mark

With respect to each class of Shares apart from the Unhedged Share Classes, the High Water Mark is the greater of: (i) the previous highest NAV per Share of the relevant Share class (after deduction of any applicable Performance Fee and any applicable dividend) on the last Valuation Point for any previous Performance Period for which a Performance Fee was paid or accrued; or (ii) the Initial Offer Price per Share of the relevant Share class. With respect to each Unhedged Share Class, the High Water Mark is the greater of (i) or (ii) above each as expressed in the Fund Base Currency using the Prevailing Exchange Rate on the relevant date.

The High Water Mark will be adjusted for any appropriate dividend paid.

A Performance Fee is only ever payable or paid on the increase of the relevant Share classes' Net Asset Value over the relevant High Water Mark or the relevant Hurdle NAV per Share, whichever is higher. Excess performance is calculated net of all costs before any performance fee accrual.

"Prevailing Exchange Rate" means the exchange rate prevailing as between the currency in which the relevant Unhedged Share Class is denominated and the Fund Base Currency.

Net Gain

With respect to the Shares of each relevant class, the Net Gain per Share is the difference between the Ending NAV per Share and the higher of (1) the Hurdle NAV per Share and (2) the High Water Mark. "Net Gain" is the Net Gain per Share multiplied by the average number of Shares of the relevant class in issue during the period commencing on the date on which the then current Performance Period began and ending on the accrual date. The average number of Shares may be adjusted to take account of redemptions during the relevant period.

Notes to the Financial Statements (continued)

3. Fees (continued)

Performance Fees (continued)

Lazard European Alternative Fund and Lazard Rathmore Alternative Fund (continued)

General

For each Share class (excluding the EA Classes, the M Classes and the X Class) the Performance Fee will be calculated by taking the Net Gain for the relevant Share class for the applicable Performance Period and multiplying this by the average number of Shares of the relevant class in issue and multiplying the resultant figure by 20% for Lazard European Alternative Fund and Lazard Rathmore Alternative Fund. For each of the EA Classes the Performance Fee will be calculated by taking the Net Gain for the relevant EA Class for the applicable Performance Period and multiplying the resultant figure by 10% and 15% for Lazard European Alternative Fund and Lazard Rathmore Alternative Fund respectively. Each Share shall bear its pro-rata Share of the Performance Fee, if any, payable in respect of the relevant class. The Performance Fee will be accrued daily and, provided the relevant Shares have not been redeemed, will crystallise and be credited to the Manager once annually on the last Business Day of each calendar year and will be paid to the Manager by the 20th Business Day following the crystallisation date. For newly launched Share classes, any Performance Fee due (otherwise than on redemption of the relevant Shares) will crystallise not earlier than 12 months following closure of the Initial Offer Period for the relevant class on the last Valuation Point for the then current calendar year. Any Performance Fee accrued in respect of Shares redeemed during a Performance Period shall crystallise in due proportions and become payable at the point of redemption. The Performance Fee shall be calculated independently by the Administrator and verified by the Depositary and is not open to the possibility of manipulation.

Lazard European Alternative Fund, for the financial year ended 31 March 2023, performance fees of EUR 1,720,501 (USD 1,791,902) (31 March 2022: EUR 718,877 (USD 835,695)) were charged and EUR 1,885,637 (USD 2,048,650) (31 March 2022: EUR 520,217 (USD 578,820)) were payable at the financial year end.

Lazard Rathmore Alternative Fund, for the financial year ended 31 March 2023, performance fees of USD 557,146 (31 March 2022: USD 11,193,111) were charged and USD 121,145 (31 March 2022: USD 15,557) were payable at the financial year end.

There is no performance fee charged in relation to any of the other Funds.

Reimbursement from Manager

Each class of Shares of each Fund shall bear its attributable portion of the other expenses of the Company, (as set out in detail under the heading "Other Expenses" in the section of the Prospectus entitled "Fees and Expenses") is subject to a appropriate cap per annum of the NAV of the Fund. The cap for each Fund is disclosed in the table below.

Fund Name	Cap %
Lazard Global Quality Growth Fund	0.30
Lazard Thematic Inflation Opportunities Fund	0.30
Lazard Global Convertibles Investment Grade Fund	0.30
Lazard Global Convertibles Recovery Fund	0.30
Lazard Emerging Markets Bond Fund	0.23
Lazard Emerging Markets Local Debt Fund	0.23
Lazard Emerging Markets Total Return Debt Fund	0.23
Lazard Emerging Markets Debt Blend Fund	0.23
Lazard Emerging Markets Debt Unrestricted Blend Fund	0.23
Lazard Emerging Markets Corporate Debt Fund	0.23
Lazard Nordic High Yield Bond Fund	0.23
Lazard Scandinavian High Quality Bond Fund	0.23
Lazard Commodities Fund	0.15
Lazard Diversified Return Fund	0.25
Lazard European Alternative Fund	0.30
Lazard Rathmore Alternative Fund	0.30
Lazard Coherence Credit Alternative Fund	0.30

As at the 31 March 2023, the above caps on expenses are in effect on Lazard Emerging Markets Bond Fund, Lazard Emerging Markets Debt Blend Fund, Lazard Emerging Markets Corporate Debt Fund, Lazard Nordic High Yield Fund, Lazard Commodities Fund, Lazard Diversified Return Fund and Lazard Coherence Credit Alternative Fund.

Notes to the Financial Statements (continued)

3. Fees (continued)

Reimbursement from Manager (continued)

The Manager will be responsible for any such expenses in excess of this limit with the exception of the expenses of acquiring and disposing of Investments (including brokerage expenses, custodial and sub-custodial transaction charges, stamp duties and other relevant taxes). For Lazard Diversified Return Fund and Lazard European Alternative Fund, the custodial and sub-custodial transactions charges are included in the cap. For the avoidance of doubt, the Manager will not be responsible for the costs of hedging the currency exposure for the benefit of any particular Share class of the Fund, which costs shall be attributable exclusively to the relevant Share class.

For the financial year ended 31 March 2023, reimbursement from the Manager was USD 155,172 (31 March 2022: USD 359,727) of which USD 49,272 (31 March 2022: USD 76,975) remained receivable at the financial year end.

Administration, Transfer Agency and Depositary Fees

The Administrator is entitled to an annual administration fee payable by the Funds of up to 0.02% of the Funds' NAV. Such fees shall accrue daily and be payable monthly in arrears. The Administrator shall also be entitled to recover from the Funds its reasonable out-of-pocket expenses.

The Depositary is entitled to an annual depositary fee payable by the Fund of up to 0.0075% of the Funds' NAV. Such fees shall accrue daily and be paid by the Funds monthly in arrears. The Depositary is also entitled to charge the Funds transaction costs, which shall be at normal commercial rates, and to be reimbursed by the Funds for the fees and transactions charges of any sub-custodian (which shall also be at normal commercial rates), together with its reasonable, out-of-pocket expenses.

For the financial year ended 31 March 2023, administration, transfer agency and depositary fees of USD 1,992,780 (31 March 2022: USD 4,299,025) were charged of which USD 1,115,154 (31 March 2022: USD 983,915) remained payable at the financial year end.

For twelve months from the date of launch of each Fund, fees payable to State Street for provision of Administration and Depositary services shall be subject to a cap of 23 basis points. Custodial fees related to safekeeping and related transaction costs are excluded from this cap, as are all relevant out of pocket expenses, whether payable to the Depositary, Administrator or other third party.

Currency Manager's Fees

The Funds shall pay State Street Bank Europe Limited (the "Currency Manager") an annual fee, calculated and accrued daily and payable quarterly in arrears, not in excess of 0.05% per annum of the NAV of each hedged Share class in issue, such fee to accrue solely to the hedged Share class in respect of which it is incurred. The foregoing fee is subject to the Currency Manager being entitled to a minimum annual service fee, calculated and accrued daily and payable quarterly in arrears, of USD 75,000 charged pro rata to all relevant hedged Share classes in issue per Fund. For the financial year ended 31 March 2023, Currency Manager's fees of USD 659,371 (31 March 2022: USD 758,207) were charged of which USD 216,147 (31 March 2022: USD 341,562).

Directors' Fees

Directors' fees charged over the financial year were USD 129,327 (31 March 2022: USD 115,703), of which USD 519 (31 March 2022: USD 10,579) were outstanding at 31 March 2023.

Auditors' Fees

Fees and expenses paid to the statutory auditors, PricewaterhouseCoopers (Ireland), in respect of the financial year, relate to the audit of the financial statements of the Company and to the provision of non-audit services. There were also tax advisory services provided by PricewaterhouseCoopers (Ireland), for the financial year ended 31 March 2023. There were no fees and expenses paid in respect of other assurance services provided by PricewaterhouseCoopers (Ireland), for the financial year ended 31 March 2023 and no fees and expenses paid in respect of other assurance or tax advisory services provided by PricewaterhouseCoopers (Ireland), for the financial year ended 31 March 2022.

Auditors' remuneration in respect of the statutory audit for the financial year was USD 163,258 (31 March 2022: USD 147,275), of which USD 163,258 was outstanding at 31 March 2023 (31 March 2022: USD 147,275). Fees paid in respect of non-audit services for the financial year were USD 1,086 (31 March 2022: USD 1,113), of which USD 1,086 was outstanding at 31 March 2023 (31 March 2022: USD 1,113) and fees paid in respect of tax advisory services for the financial year were USD 69,624 (31 March 2022: USD 67,009), of which USD 69,624 was outstanding at 31 March 2023 (31 March 2022: USD 67,009). These fees include out of pocket audit expenses and are exclusive of VAT.

Notes to the Financial Statements (continued)

3. Fees (continued)

Transaction Costs

As disclosed in Note 2, transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of the financial asset or financial liability. Under purchases and sales transaction costs detailed below are the transaction costs on the purchase and sales of equities, futures contracts, options contracts and investment funds. Commission/brokerage costs on the purchase and sale of fixed income securities, money market instruments, forward foreign exchange currency contracts and swaps, transaction costs on these instruments cannot be separately identified. They are included in the purchase and sale price of the investment, and therefore not disclosed separately in this note.

The following tables show the transaction costs including the amounts for depositary transaction costs for the financial year ended 31 March 2023 and 31 March 2022:

Notes to the Financial Statements (continued)

4. Taxation

Under current law and practice, the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis the Company will not be liable to taxation in respect of its income and gains, other than on the occurrence of a chargeable event. Generally a chargeable event arises on any distribution, redemption, repurchase, cancellation, transfer of Shares or on the ending of a 'relevant period', a 'relevant period' being an eight year period beginning with the acquisition of the Shares by the shareholders and each subsequent period of eight years beginning immediately after the preceding relevant period.

A chargeable event does not include:

- a) any transactions in relation to Shares held in a recognised clearing system as designated by order of the Revenue Commissioners of Ireland: or
- b) an exchange of Shares representing a Fund for another Fund: or
- c) an exchange of Shares arising on a qualifying amalgamation or reconstruction of a Fund with another Fund: or
- d) certain exchanges of Shares between spouses and former spouses.

A chargeable event will not occur in respect of shareholders who are neither resident nor ordinarily resident in Ireland and who have provided the Company with a relevant declaration to that effect.

In the absence of an appropriate declaration, the Company will be liable to Irish Tax on the occurrence of a chargeable event. There were no chargeable events during the financial year or prior financial year under review.

Capital gains, dividends and interest received may be subject to withholding taxes imposed by the country of origin and such taxes may not be recoverable by a Fund or its shareholders.

Withholding Tax Refunds

During the financial year ended 31 March 2023 and financial year ended 31 March 2022, a number of Funds received withholding tax refunds which were not previously recognised due to uncertainty around their recoverability. Upon receipt of these refunds, these amounts are included in the Net Asset Value of the Funds and are recorded in the Statement of Comprehensive Income. These refunds would generally have a positive impact on the performance of the relevant Funds which received them.

5. Capital and Reserves

The Company has a variable share capital.

Management Shares

The authorised share capital of the Company is two subscriber shares of par value of £1.00 each. The two subscriber shares are held by the Manager and the Promoter. The subscriber Shares do not form part of the NAV of the Company.

Redeemable Participating Shares

The Company also has an authorised share capital of 5,000,000,000,000 Shares of no par value which are available for issue as fully paid participating shares in each of the Company's Funds ("Redeemable Participating Shares"). They may be redeemed by the Company at the request of the shareholder. The value of Shares issued and redeemed during the financial year is set out in the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders. Each Fund issues Redeemable Participating Shares, which are redeemable at the holder's option and are classified as financial liabilities. Redeemable Participating Shares can be put back to the Fund at any time for cash equal to a proportionate share of the Fund's NAV. The Redeemable Participating Share is carried at the redemption amount that is payable at the Statement of Financial Position date if the holder exercises the right to put the Share back to the Fund.

Certain costs are customarily incurred when a Fund has to buy or sell portfolio assets in order to satisfy or give effect to requests for subscription or redemption of its Shares. The incurring of such dealing costs by a Fund can result in a Fund's value being diminished or 'diluted' over time and can therefore have a disadvantageous effect on Shareholders' interests in a Fund if counteracting steps are not taken. With a view to offsetting the effects of dilution to the extent deemed appropriate in the interests of Shareholders, the Directors may determine at their discretion, to adjust ("Swing") the Net Asset Value per Share when calculating the Share Price on any particular Dealing Day.

Notes to the Financial Statements (continued)

5. Capital and Reserves (continued)

Redeemable Participating Shares (continued)

Swing pricing, where applied, aims to ensure that the burden of the costs associated with dealing in a Fund's Shares are borne by the investors that actually request those Share deals on a particular Dealing Day, and not by the Shareholders in a Fund who are not trading in the Shares on the relevant Dealing Day. In this way swing pricing aims to mitigate the adverse effects of dilution on Fund assets and to preserve and protect the value of shareholdings.

The swing factors applied during the financial year ended 31 March 2023 ranged from 0.01 bps to 69.36 bps on both subscriptions and redemptions (March 2022: 0.02 bps to 59.09 bps).

The activity on Redeemable Participating Shares for the financial year ended 31 March 2023 and 31 March 2022 is as follows:

Lazard Global Quality Growth Fund	Shares	31/03/2023	Shares	31/03/2022

* Lazard Thematic Inflation Opportunities Fund launched on 21 June 2022, therefore there are no comparatives for this Fund.

** Lazard Nordic High Yield Bond Fund launched on 1 November 2022, therefore there are no comparatives for this Fund.

*** Lazard Emerging Markets Bond Fund fully redeemed on 16 November 2022.

**** Lazard Diversified Return Fund fully redeemed on 13 January 2023.

See Note 15 for information on the launch and termination dates of the above Share classes.

6. Net Asset Value

The NAV per share of any class of Shares in a portfolio is determined by dividing the value of net assets of the Fund by the total number of Redeemable Participating Shares in issue at 31 March 2023, 31 March 2022 and 31 March 2021. The information disclosed in the following tables for all of the Lazard Funds as at 31 March 2023, 31 March 2022 and 31 March 2021 is in line with the information as calculated in accordance with the Prospectus (published NAV). The NAV and NAV per share in the following tables are stated in the currency of the relevant class.

Effective 13 May 2021, swing pricing was implemented on the Funds, replacing the previous Anti-Dilution Levy mechanism. As at 31 March 2023 swing prices were applied to the NAV's valuation of Lazard Emerging Markets Local Debt Fund and Lazard Emerging Markets Total Return Debt Fund.

Notes to the Financial Statements (continued)

6. Net Asset Value (continued)

Shares are issued and redeemed at a single price, being the NAV per Share of the relevant class, which may be adjusted as described below.

Certain costs are customarily incurred when a Fund has to buy or sell portfolio assets in order to satisfy or give effect to requests for subscription or redemption of its Shares. The incurring of such dealing costs by a Fund can result in a Fund's value being diminished or 'diluted' over time and can therefore have a disadvantageous effect on Shareholders' interests in a Fund if counteracting steps are not taken. With a view to offsetting the effects of dilution to the extent deemed appropriate in the interests of Shareholders, the Directors may determine at their discretion, to adjust ("swing") the NAV per Share when calculating the Share Price on any particular Dealing Day.

Swing pricing, where applied, aims to ensure that the burden of the costs associated with dealing in a Fund's Shares are borne by the investors that actually request those Share deals on a particular Dealing Day, and not by the Shareholders in a Fund who are not trading in the Shares on the relevant Dealing Day. In this way swing pricing aims to mitigate the adverse effects of dilution on Fund assets and to preserve and protect the value of shareholdings.

US Dollar	1.0864	1.1127

The following average exchange rates have been used to translate the Statement of Comprehensive Income and Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders balances in other currencies to EUR:

Average Exchange Rates against EUR	31 March 2023	31 March 2022
US Dollar	1.0415	1.1625

8. Cash, Cash Equivalents and Cash Collateral

Cash at bank, bank overdrafts (if any) and cash equivalents as at 31 March 2023 and 31 March 2022 comprises cash at bank. The Depositary may utilise one or more sub-custodians for holding cash of the Funds. Substantially all of the cash and bank overdrafts are held with the Depositary's global sub-custodian, State Street Bank and Trust Company. Cash collateral is subject to the counterparty risk of those entities. Cash is also deposited by or on behalf of the Funds for initial margin purposes with brokers for options, open futures contracts and total return swaps. Please refer to Note 9, Counterparty/Issuer Risk and Credit Risk for additional details.

Cash collateral is subject to the counterparty risk of those entities. Cash is also deposited by or on behalf of the Funds for initial margin purposes with brokers for options, open futures contracts and total return swaps. Please refer to Note 9, Counterparty/Issuer Risk and Credit Risk for additional details.

Cash collateral may also be received by the Funds in respect of financial derivative instruments held by the Funds at the respective financial year end. Such cash is held with State Street and recognised as a liability on the relevant Fund's Statement of Financial Position. Margin cash may also be payable by Funds to brokers at the respective financial year end and is reported as a liability on the relevant Fund's Statement of Financial Position.

Cash account arrangements are in place in respect of the Company and the Funds as a consequence of the requirements relating to the subscription and redemption collection accounts pursuant to the Central Bank of Ireland (Supervision and Enforcement) Act 2013 (Section 48 (i)) Investor Money Regulations 2015 for Fund Service Providers (the 'Investor Money Regulations').

These cash accounts, held with Bank of America for collection of subscriptions, payment of redemptions and dividends for the Company are deemed assets of the Company and are included in the Statement of Financial Position.

9. Risk Management Policies and Procedures

The Funds' investment activities expose them to the various types of risk which are associated with the financial instruments and markets in which they invest. The following information is not intended to be a comprehensive summary of all risks and investors should refer to the Prospectus and Supplements for a more detailed discussion of the risks inherent in investing in the Funds.

The Directors review reports from the Investment Managers on a quarterly basis and more frequently as required in relation to the Funds' performance and risk profile. The Investment Managers are also responsible for ensuring that the Funds are managed within the terms of the Funds' investment guidelines and limits set out in the Prospectus' and Supplements as well as the Investment Managers' own internal investment guidelines and limits. The Directors delegate to the Manager who in turn delegates to the Investment Managers responsibility for the monitoring and managing of risk for the Funds.

There is a Risk Management Team responsible for overseeing the risk management process of the Investment Managers. Risk Management is delegated to the respective risk team in either the country of operation of the relevant Investment Manager or where not available, Lazard Asset Management LLC. The Chief Risk Officer along with various relevant committees review and monitor all Funds to ensure that they remain consistent with their stated goals and objectives in terms of product characteristics, performance and risk, meaning that the Funds are managed in line with client expectations and their legal and constitutional regulations.

Notes to the Financial Statements (continued)

9. Risk Management Policies and Procedures (continued)

The following paragraphs outline procedures undertaken to manage the market, credit and liquidity risks of the Funds. These are consistent with the risks that existed at 31 March 2022.

Market Risk

Market risk arises mainly from uncertainty about future values of financial instruments held specifically from price, currency and interest rate movements. It represents the potential loss the Funds might suffer through holding market positions in the face of market movements.

The global exposure will be calculated using an advanced risk measurement approach. The investment management team use value-at-risk ("VaR") and commitment approach as an integral part of their ongoing monitoring and management of the Funds' market risk. For Lazard Global Quality Growth Fund, Lazard Thematic Inflation Opportunities Fund, Lazard Global Convertibles Investment Grade Fund, Lazard Global Convertibles Recovery Fund, Lazard Nordic High Yield Bond Fund, Lazard Scandinavian High Quality Bond Fund and Lazard Commodities Fund use the commitment approach to measure global exposure. The Company uses the commitment approach to measure global exposure. VaR is used for monitoring the risk for the remaining Funds.

Each Fund's global exposure will be calculated daily by way of an absolute VaR model using the Bloomberg Alpha Portfolio Analytics and Risk application. Bloomberg Alpha is used for all the required calculations and reporting for VaR. VaR is a category of risk measures which, unlike market risk metrics such as the Greeks, duration and convexity, can be applied to all asset types and can cover all sources of market risk. VaR summarises the maximum expected loss over a target horizon with a given level of confidence. VaR is a useful measure in that it can summarise the maximum loss in a single monetary value or a percentage of the overall portfolio. The Investment Managers will also be using Algorithmics system for VaR calculations and risk analyses. Analytics from Algorithmics are also used in Bloomberg Alpha. The VaR model will use the following quantitative standards:

- The confidence level should be 99%;
- The holding period should be 1 trading day; and
- The historical observation period should not be less than 1 year; however, a shorter observation period may be used if justified, for example, as a result of significant recent changes in price volatility.

There are three popular approaches for calculating VaR, namely Historical Simulation, analytical Variance-Covariance method and Monte Carlo Simulation. The investment management team uses the simple yet powerful approach of the historical simulation method which assumes that historical return distribution is a good representation of future returns. The Investment Managers believe that this method is one of the more reliable methods as it requires making the minimum number of assumptions. It also incorporates the volatilities and correlations explicitly by using the real market returns. As the VaR reports generated by Bloomberg Alpha are based on 99% confidence interval and 1 day holding period, the 20% 20-day limit is scaled down according to appropriate factors. The absolute 1-day 99% VaR limit is $20\% / \sqrt{20} = 4.47\%$.

In case the VaR for certain holdings does not get calculated by the system due to data errors or modelling limitation, the Risk Management Team will assess the VaR impact of those holdings and incorporate that figure as an add-on to the VaR. This approach may ignore possible diversification benefits, and will provide a conservative VaR level for the portfolio.

Stress testing will be performed on a monthly and as required basis. Back testing results will be recorded daily and analysed monthly. The data in the VaR model is updated on a daily basis and contains one year's market data.

Bloomberg Alpha is used for stress testing to evaluate the market risk inherent in the portfolio under abnormal market conditions. The risk methodology used in stress tests is similar to the one used in calculating VaR. The portfolio Profit and Loss (P&L) or % return is generated by calculating a projected portfolio market value, based on a change in Risk Factors. To generate the market value, a "Full Valuation Methodology" is used to theoretically value every security within the Fund or the sensitivities to rates and spreads are used to assess the impact of larger market moves.

Since VaR cannot incorporate all possible scenarios, stress testing helps capture sudden and dramatic changes in the portfolio's value given atypical market circumstances. Stress testing is utilised monthly and on an ad hoc basis. Daily monitoring of the sensitivities to interest rates, FX and credit spreads gives a better picture of how the portfolio might react to sudden market moves.

Notes to the Financial Statements (continued)

9. Risk Management Policies and Procedures (continued)

Market Risk (continued)

Some limitations of VaR are:

- the models are based on historical data and cannot take account of the fact that future market price movements, correlations between markets and levels of market liquidity in conditions of market stress may bear no relation to historical patterns;
- the market price risk information is a relative estimate of risk rather than a precise and accurate number;
- the market price information represents a hypothetical outcome and is not intended to be predictive (in the case of probability-based methods, such as VaR, profits and losses are almost certain to exceed the reported amount with a frequency depending on the confidence interval chosen); and
- future market conditions could vary significantly from those experienced in the past.

The tables below for 31 March 2023 and 31 March 2022 detail the lowest, the highest and the average VaR and also the utilisation of the VaR limit calculated during the financial year of the daily VaR limit (4.47%) of each of the Funds. The utilisation of the VaR limit is calculated as the VaR divided by the daily VaR limit.

For the financial year ended 31 March 2023

Portfolio Fund	Lowest VaR (%)	Lowest utilisation of VaR Limit (%)	Highest VaR (%)	Highest utilisation of VaR Limit (%)	Average VaR (%)	Average utilisation of VaR Limit (%)	Year-end VaR (%)

* Lazard Emerging Markets Bond Fund fully redeemed on 16 November 2022.

** Lazard Diversified Return Fund fully redeemed on 13 January 2023.

Lazard Global Quality Growth Fund, Lazard Thematic Inflation Opportunities Fund, Lazard Global Convertibles Investment Grade Fund, Lazard Global Convertibles Recovery Fund, Lazard Nordic High Yield Bond Fund, Lazard Scandinavian High Quality Bond Fund and Lazard Commodities Fund use the commitment approach to measure global exposure. The commitment approach converts any Fund's derivative financial positions into an equivalent position of the underlying asset based on the market value of the underlying asset. The unrealised appreciation/(depreciation) value of any derivatives held is disclosed on the Statement of Financial Position for the applicable Funds.

The average level of leverage figures provided below are calculated as the sum of the absolute value of notionals of the derivatives used as is required by the UCITS Regulations. This figure does not take into account any netting and hedging arrangements that the Funds may have in place at any time even though these netting and hedging arrangements are used for risk reduction purposes. As these netting and hedging arrangements, if taken into account, may reduce the level of leverage, this calculation may not provide an accurate measure of the Funds' actual leverage position.

Notes to the Financial Statements (continued)

9. Risk Management Policies and Procedures (continued)

Market Risk (continued)

Below is the daily average level of leverage for each Fund during the one year period ending 31 March 2023 and 31 March 2022.

Level of Leverage Fund Name	Average Level of Leverage (%)	Average Level of Leverage (%)
	31 March 2023	31 March 2022
Lazard Global Convertibles Investment Grade Fund	72	71
Lazard Global Convertibles Recovery Fund	41	0
Lazard Emerging Markets Bond Fund*	72	99
Lazard Emerging Markets Local Debt Fund	185	208
Lazard Emerging Markets Total Return Debt Fund	135	143
Lazard Emerging Markets Debt Blend Fund	144	155
Lazard Emerging Markets Debt Unrestricted Blend Fund	144	173
Lazard Emerging Markets Corporate Debt Fund	92	99
Lazard Diversified Return Fund**	192	191
Lazard European Alternative Fund	110	156
Lazard Rathmore Alternative Fund	425	455
Lazard Coherence Credit Alternative Fund	113	117

* Lazard Emerging Markets Bond Fund fully redeemed on 16 November 2022.

** Lazard Diversified Return Fund fully redeemed on 13 January 2023.

(i) Market Price Risk

Market price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting similar financial instruments traded in the market. The Funds are exposed to market price risk arising from their investments in securities. By diversifying the portfolio, the risk that a price change of a particular investment will have a material impact on the Funds is minimised. The Investment Managers and the Manager's Designated Person for Fund Risk Management manage the Funds' market risk on a daily basis in accordance with the respective Fund's investment objective, policies and core philosophy. The core philosophy of total performance measurement entails the active management of return, risk and cost. Relative-to-benchmark risk is controlled through the construction of diversified portfolios where exposures to certain market features (such as capitalisation or industry) are limited. As at 31 March 2023 and 31 March 2022 all of the securities (excluding derivatives) were designated at fair value through profit or loss.

Refer to the Portfolio of Investments for details of the fair value of the securities held on each Fund.

The table below presents a scenario analysis, in which a +5% change is applied to each of the benchmarks against which Lazard Global Quality Growth Fund, Lazard Thematic Inflation Opportunities Fund, Lazard Global Convertibles Investment Fund, Lazard Global Convertibles Recovery Fund, Lazard Nordic High Yield Bond Fund, Lazard Scandinavian High Fund and Lazard Commodities Fund are managed. Based on the BETA values and Funds' valuations as at 31 March 2023 and 31 March 2022, estimated monetary impacts are provided:

Fund	Currency	Relevant Beta	Estimated Portfolio	Estimated	Relevant Beta	Estimated Portfolio	Estimated
		Calculation as at 31 March 2023	return based on 5% relevant market increase as at 31 March 2023	monetary impact as at 31 March 2023	Calculation as at 31 March 2022	return based on 5% relevant market increase as at 31 March 2022	monetary impact as at 31 March 2022
Lazard Global Quality Growth Fund	USD	1.030	5.15%	4,467,539	1.010	5.05%	4,098,518
Lazard Thematic Inflation Opportunities Fund*	USD	1.010	5.05%	3,768,178	-	-	-
Lazard Global Convertibles Investment Grade Fund	EUR	0.990	4.95%	5,996,186	0.950	4.75%	7,438,697
Lazard Global Convertibles Recovery Fund	USD	0.583	2.92%	11,968,980	0.503	2.52%	10,098,743
Lazard Nordic High Yield Bond Fund**	EUR	1.000	5.00%	1,423,770	-	-	-
Lazard Scandinavian High Quality Bond Fund	EUR	1.230	6.15%	18,415,729	1.220	6.10%	26,547,370
Lazard Commodities Fund	USD	1.010	5.05%	3,372,099	0.881	4.41%	4,710,562

* Lazard Thematic Inflation Opportunities Fund launched on 21 June 2022, therefore there are no comparatives for this Fund.

** Lazard Nordic High Yield Bond Fund launched on 1 November 2022, therefore there are no comparatives for this Fund.

A -5% change would have an equal but opposite effect.

Notes to the Financial Statements (continued)

9. Risk Management Policies and Procedures (continued)

Market Risk (continued)

(ii) Foreign Currency Risk

The Funds may invest in securities denominated in currencies other than its functional currency (or, indeed, the currency of the investor). Furthermore, the Funds may invest in forward foreign currency exchange contracts for the purpose of implementing investment views as well as hedging. Consequently, the Funds are exposed to risks that the exchange rate of its reporting currency relative to other currencies may change in a manner that has an adverse effect on the value of the portion of a Fund's assets that are denominated in currencies other than its own currency. Currencies may also move in such a way as to cause losses on currency forward foreign currency exchange contracts.

For the Funds in which currency risk is hedged out, the currency risk is managed by regular rebalancing of the forward foreign currency exchange contracts to maintain zero (or close to zero) currency exposure. For those Funds for which currency exposure is a critical source of return, exposures are managed relative to the appropriate benchmark. For other Funds, there is no explicit currency-management policy.

Investments amounts represented below primarily relate to non-monetary assets which include equities and investment funds, and to monetary assets which include fixed income securities. All other amounts represented below relate to monetary assets and monetary liabilities.

The tables immediately below provide the exposure to different currencies as at 31 March 2023 and 31 March 2022. Lazard Thematic Inflation Opportunities Fund launched on 21 June 2022 and Lazard Nordic High Yield Bond Fund launched on 1 November 2022, therefore there are no comparatives for those Funds. Lazard Emerging Markets Bond Fund fully redeemed on 16 November 2022 and Lazard Diversified Return Fund fully redeemed on 13 January 2023. All of the assets and liabilities of Lazard Emerging Markets Corporate Debt Fund were denominated in USD as at 31 March 2022, therefore there are no comparatives for this Fund.

* Lazard Thematic Inflation Opportunities Fund launched on 21 June 2022, therefore there are no comparatives for this Fund.

** Lazard Nordic High Yield Bond Fund launched on 1 November 2022, therefore there are no comparatives for this Fund.

A 5% weakening of the base currency (against the other currencies) would be expected to have an equal and opposite impact on the numbers shown in the previous tables, on the basis that all other variables remain constant.

The scenarios used in this section are hypothetical, and provided only to illustrate potential losses that could be caused through currency movements. All sensitivities are based on historical information.

Notes to the Financial Statements (continued)

9. Risk Management Policies and Procedures (continued)

Market Risk (continued)

(iii) Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in prevailing interest rates. The Funds are exposed to interest rate risk through investments in securities with fixed and floating rates of interest, held within the Funds and their respective cash balances. The Investment Managers manage the Funds' interest rate risk on a daily basis in accordance with the respective Fund's investment objective, policies and core philosophy. Lazard Emerging Markets Bond Fund and Lazard Diversified Return Fund were fully redeemed as at 31 March 2023, therefore they are no longer exposed to interest rate risk.

The interest rate profile of the financial assets and liabilities of the Funds at 31 March 2023 and 31 March 2022 was as follows:

2023	Up to 1 year	1 - 5 years	Over 5 years	Non-Interest Bearing	Total

Lazard Commodities Fund	USD	105,956,582	13.28	14,071,034	120,027,616

* Lazard Thematic Inflation Opportunities Fund launched on 21 June 2022, therefore there are no comparatives for this Fund.

** Lazard Nordic High Yield Bond Fund launched on 1 November 2022, therefore there are no comparatives for this Fund.

A 1% decrease would have an equal but opposite effect.

Above is a simplistic approximation of an important factor, with changes in steepness and twists in the yield curve also likely, which will have additional impacts on asset prices. Furthermore, this analysis is intended only to be used to estimate the impact of small movements in bond yields. This sensitivity analysis is hypothetical and not intended to be predictive. All sensitivities are based on historical information.

Notes to the Financial Statements (continued)

9. Risk Management Policies and Procedures (continued)

Credit Risk

Credit risk is the risk that the counterparty or issuer to a financial instrument will fail to discharge an obligation or commitment that it has entered into with a Fund. The Funds' main credit risk concentrations arise from trading equity and debt securities, investment funds and financial derivative instruments ("FDIs") in addition to cash balances held at the Depository. Refer to the Portfolio of Investments on pages 138 to 196 for details of the monetary values relating to the above.

All transactions involving transferable securities are settled upon delivery using approved brokers. The risk of default is considered minimal, as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker. The trade will fail if either party fails to meet their obligations.

The tables below detail the Portfolio of Investments by rating category for the Funds which invest in fixed-income securities and money market instruments as at 31 March 2023 and 31 March 2022:

* Moody's credit rating.

** Lazard Nordic High Yield Bond Fund launched on 1 November 2022, therefore there are no comparatives for this Fund.

Substantially all of the cash and securities held by the Funds are held via the Depositary except for the FDI that are held with counterparties as disclosed on the Portfolio of Investments. State Street Bank and Trust Company act as the Global Sub-Custodian for the Depositary.

While cash held by the global sub-custodian and the Depositary is identifiable as belonging to the Funds, the Funds will be exposed to the credit risk of the financial institution where cash is deposited. In the event of insolvency of the financial institution, the Funds will be treated as a general creditor of the financial institution in relation to cash holdings of the Funds.

In circumstances such as the insolvency of a sub-custodian or registrar, or retro-active application of legislation, the Funds may not, in all cases, be able to establish title to investments made and may suffer losses as a result. The Funds may find it impossible to enforce their rights against third parties. In addition, as the Funds may invest in markets where custodial and/or settlement systems are not fully developed, there is a transaction and custody risk involved in dealing in such markets. In certain circumstances, a Fund may not be able to recover some of its assets. Such circumstances may include any acts or omissions or the liquidation, bankruptcy or insolvency of a sub-custodian, retroactive application of legislation and fraud or improper registration of title. The costs borne by a Fund in investing and holding investments in such markets will generally be higher than in organised securities markets.

The Funds' securities are always separately identified on the accounting records of State Street Bank and Trust Company, therefore the rights, with respect to those securities, are preserved. Thus in the event of insolvency or bankruptcy of the Depositary, the Funds' assets are segregated and protected and this further reduces counterparty risk.

Bankruptcy or insolvency by the Depositary may cause the Funds' rights with respect to the cash and the securities held by the Depositary to be delayed or limited. The Funds monitor their risk by monitoring the credit quality and financial position of the Depositary that the Funds use. The long term credit rating of the parent company of the Depositary and Global Sub-Custodian, State Street Corporation, is A1 (31 March 2022: A1) based on the Moody's Rating Agency. The Depositary has a general lien in the normal course of business over the assets of the Funds.

The extent of the Funds' exposure to credit risk in respect of the financial statements approximates the carrying value as recorded in the Statement of Financial Position. There were no past due or impaired assets as of 31 March 2023 or 31 March 2022.

Notes to the Financial Statements (continued)

9. Risk Management Policies and Procedures (continued)

Counterparty/Issuer Risk

The Funds are exposed to a credit risk to parties with whom they trade and will bear the risk of settlement default. Counterparty/issuer risk is monitored and managed by a formal counterparty or issuer exposure management program within the Investment Managers. The Investment Managers' approved list of counterparties is generally limited to the most highly rated and recognised dealers in their sectors. The Investment Managers perform ongoing monitoring of this list. Counterparty/issuer risk is monitored on an ongoing basis in the following manner:

- Approved broker selection - the trading system only permits trading with approved brokers. New brokers are added, subject to a formal review process that includes a review of the broker's creditworthiness, financial strength, ability to enter into legally enforceable arrangements and standing in the financial community.
- Broker monitoring - performed through a variety of ongoing activities, including the assessment of certain regulatory filings and financial statements.
- Measurement and monitoring of counterparty or issuer trade exposure - a daily review of outstanding positions is performed.

A Fund is exposed to a credit risk on the over the counter ("OTC") counterparties with whom it trades, that these counterparties may not perform their obligations and that settlement of transactions may not occur. All OTC counterparties must meet the following criteria as set out in the UCITS Regulations namely:

- A credit institution in accordance with Central Bank UCITS Regulations, or
- Have a minimum credit rating of A2 or equivalent, or in the opinion of the Investment Managers, an implied credit minimum rating of A2 or equivalent.

Exposures to individual counterparties are limited to 10% of NAV in the case of (i) above and 5% of NAV in the case of (ii) above.

Cash collateral is held with Bank of America Merrill Lynch, Barclays Bank Plc, CIBC World Markets, Citibank NA, JP Morgan Chase and Company, Morgan Stanley, Standard Chartered Bank, State Street Bank and Trust Company and UBS AG. Counterparty cash received by a Fund as collateral for financial derivative instrument transactions is recorded as an asset on the Statement of Financial Position within "Broker cash held as collateral for financial derivative instruments" and a related liability to repay the collateral is disclosed within "Broker cash due to counterparties for financial derivative instruments". A Fund's assets may be deposited by or on behalf of a Fund for collateral purposes with counterparties for financial derivative instruments held on the Fund. Such assets remain in the ownership of the relevant Fund and are recorded as an asset on the Statement of Financial Position. Cash pledged by a Fund as collateral is recognised on the Statement of Financial Position within "Broker cash held as collateral for financial derivative instrument transactions". Non cash collateral pledged forms part of the NAV of the Fund and is recorded at the base of each relevant Portfolio of Investments for reference purposes only (please refer to the Portfolio of Investments for Lazard European Alternative Fund, Lazard Rathmore Alternative Fund and Lazard Coherence Credit Alternative Fund respectively).

Cash is also deposited by or on behalf of the Funds for initial margin purposes with brokers for options, open futures contracts and total return swaps, this cash is held with Bank of America Merrill Lynch, Barclays Bank Plc, BNP Paribas, CIBC World Markets, Goldman Sachs, Morgan Stanley, Nomura, Societe Generale and UBS AG at the financial year end and is subject to the credit risk of the relevant broker.

Investments pledged by the Funds as collateral are recognised at fair value in the relevant Fund's Portfolio of Investments and such investments are referenced accordingly at the base of the Portfolio of Investments. See the following for details of OTC counterparty exposure for the Funds as at 31 March 2023 and 31 March 2022.

** The net exposure represents the unrealised of the mark-to-market value with the counterparty as at financial year end.

The Funds have an ISDA agreement and/or Credit Support Annex in place with all the counterparties. The Portfolio of Investments includes details of the open forward foreign currency exchange contracts and the counterparties as at the financial year end.

Notes to the Financial Statements (continued)

9. Risk Management Policies and Procedures (continued)

Liquidity Risk

The Funds' assets comprise mainly realisable securities which can be readily sold. Please note that the Funds abide by the ESMA liquidity guidelines. Certain securities held by a Fund may be difficult (or impossible) to sell at the time and at the price the relevant Investment Manager would like. A Fund may have to hold these securities longer than it would like and may forego other investment opportunities. There is the possibility that a Fund may lose money or be prevented from earning capital gains if it cannot sell a security at the time and price that is most beneficial to that Fund. Funds that invest in certain small company securities, high-yield bonds, mortgage-backed securities or foreign or emerging market securities, which have all experienced periods of illiquidity, maybe subject to liquidity risks.

The main liability of the Funds is the redemption of any Shares that investors wish to sell. Shareholders have the right to require the Funds to redeem their Shares in the Funds on any business day subject to restrictions set out in the Prospectus. If total requests for redemption and/or switching on any dealing day for any Fund exceed 10% of the NAV of that Fund, each redemption or switching request in respect of Shares in such Fund may, at the discretion of the Directors, be reduced pro rata so that the total number of Shares of such Fund for redemption or switching on that dealing day shall not exceed 10% of the NAV of that Fund. Any redemption or switching request so reduced shall be carried forward to the next dealing day and effected to subsequent redemption or switching requests on the following dealing day(s). No redemption requests were reduced pro-rata in the financial year (and in the preceding financial year). The Funds have the ability to borrow in the short term to ensure settlement. No such borrowings have arisen during the financial years ended 31 March 2023 or 31 March 2022.

The Funds' financial liabilities due for payment within one month relate in the most part, to security purchases awaiting settlements, redemptions of Redeemable Participating Shares and payment of expenses and bank overdraft interest. Details of these amounts where relevant, can be found in the Statement of Financial Position. There are no financial liabilities that fall due over 3 months except for the FDIs whose maturity dates are outlined on the Portfolios of Investments at 31 March 2023 or at 31 March 2022.

Concentration Risk

The Funds may be exposed to concentration risk when a shareholder holds a significant portion of the issued share capital of the Funds as disclosed in Note 12.

Fair Value Measurement

The Company has classified fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1 inputs are unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the valuation date. An active market for the asset or liability is a market in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2 inputs are inputs other than quoted prices in active markets included within level 1 that are observable for the asset or liability, either directly or indirectly. Fair value is determined through the use of models or other valuation methodologies. Level 2 inputs include the following:

- a) Quoted prices for similar assets or liabilities in active markets.
- b) Quoted prices for identical or similar assets or liabilities in markets that are not active, that is, markets in which there are few transactions for the asset or liability, the prices are not current, or price quotations vary substantially either over time or among market makers, or in which little information is released publicly.
- c) Inputs other than quoted prices that are observable for the asset or liability (e.g. interest rate and yield curves observable at commonly quoted intervals, volatilities, prepayment speeds, loss severities, credit risks and default rates).
- d) Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 inputs are unobservable inputs for the asset or liability. Unobservable inputs reflect the Company's own assumptions about how market participants would be expected to value the asset or liability. Unobservable inputs are developed based on the best information available in the circumstances, other than market data obtained from sources independent of the Company and might include the Company's own data.

An investment is always categorised as level 1, 2 or 3 in its entirety. In certain cases, the fair value measurement for an investment may use a number of different inputs that fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement requires judgment and is specific to the investment.

* Lazard Thematic Inflation Opportunities Fund launched on 21 June 2022, therefore there are no comparatives for this Fund.

** Lazard Nordic High Yield Bond Fund launched on 1 November 2022, therefore there are no comparatives for this Fund.

*** There are level 3 securities held on Lazard Emerging Markets Total Return Debt Fund during the financial year ended 31 March 2023 and 31 March 2022. These level 3 securities had a fair value of USD Nil as at 31 March 2023 and as at 31 March 2022.

**** There are level 3 securities held on Lazard Rathmore Alternative Fund during the financial year ended 31 March 2023 and 31 March 2022. These level 3 securities had a fair value of USD Nil and USD 924,588 as at 31 March 2023 and as at 31 March 2022 respectively.

Investments, whose values are based on quoted market prices in active markets, and therefore classified within level 1, include active listed equities and exchange traded derivatives. The Funds do not adjust the quoted price for these instruments.

Financial instruments that do not have quoted market prices but are valued based on market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2, these include bonds and over-the-counter derivatives.

There were no level 3 securities held on the Funds with the exception of securities held on Lazard Emerging Markets Total Return Debt Fund, Lazard Diversified Return Fund and Lazard Rathmore Alternative Fund during the financial year ended 31 March 2023 and the financial year ended 31 March 2022 as outlined in the paragraphs below.

There were Level 3 securities held on Lazard Rathmore Alternative Fund at 31 March 2023. These securities are warrants incorporated in the United States, Benson Hill Inc and Esperion Therapeutics Inc, which were priced using unobservable inputs. The fair value of these Level 3 securities at 31 March 2023 was USD Nil. There were also Level 3 securities held on the Fund at 31 March 2022. These securities were common stock incorporated in the United States, Benson Hill Inc and warrants incorporated in the United States, Benson Hill Inc and Esperion Therapeutics Inc. These securities were priced using unobservable inputs. The fair value of these Level 3 securities at 31 March 2022 was USD 924,588 and USD Nil for common stock and warrants respectively.

There were Level 3 securities held on Lazard Emerging Markets Total Return Debt Fund at 31 March 2023 and 31 March 2022. These securities are corporate bonds incorporated in the Cayman Islands, G3 Exploration Ltd. and were priced using unobservable inputs. The fair value of these Level 3 securities at 31 March 2023 and 31 March 2022 was USD Nil.

There were Level 3 security held on Lazard Diversified Return Fund at 31 March 2022. This security was a common stock incorporated in South Korea, Osstem Implant Company Ltd. and was priced using unobservable inputs. The fair value of this Level 3 security at 31 March 2022 was USD 5,563.

10. Credit Facility

On 27 October 2020, the Company entered into an unsecured credit facility ("Line of Credit") with State Street, to be utilised on a temporary basis for short-term liquidity purposes. The maximum amount of the Line of Credit available is USD 25,000,000 and the amount utilised by any Fund may not exceed 10% of that Fund's adjusted net assets. Each Fund will pay a commitment fee at the rate of 0.20% per annum on its pro-rata portion of the Line of Credit, which will be reflected as an expense in the Statement of Comprehensive Income. Interest on borrowings is charged at the applicable rate for the respective interest period plus a margin. The Line of Credit was renewed in August 2022.

There were no amounts drawn down from the Line of Credit during the financial year ended 31 March 2023 and 31 March 2022.

11. Soft Commission Arrangements

In relation to Lazard Diversified Return Fund and Lazard European Alternative Fund, the Investment Managers, in accordance with common market practice for investment managers, entered into dealing arrangements with brokers whereby part of the dealing commissions paid to them is used to discharge the cost of investment related services supplied to them by the broker or by third parties. These services may be either market research or be related to the execution of trades on behalf of clients.

Notes to the Financial Statements (continued)

11. Soft Commission Arrangements (continued)

The Investment Managers places business with these counterparties including transactions relating to the investments of Lazard Diversified Return Fund and Lazard European Alternative Fund. The Investment Managers will endeavour at all times to obtain best execution on all transactions for all clients including these Funds, and is satisfied that these arrangements are of benefit to these Funds. For the other Funds, there were no soft commission arrangements during the financial year ended 31 March 2023 or 31 March 2022.

12. Related Party Transactions

The authorised share capital of the Company is two subscriber shares of par value of £1.00 each. The two subscriber shares are held by the Manager and the Promoter. All material related party transactions with the Manager and Directors are included in Note 3 to the financial statements. The fees and expenses of the Investment Managers, the Promoter and the Distributors are paid by the Manager out of its fee.

Directors Andreas Hübner, Jeremy Taylor and Denis Faller are full time executives of the Lazard group as well as Directors of the Company and also directors of the Manager. Andreas Hübner, Jeremy Taylor and Denis Faller are not entitled to any Directors' fees. Directors' fees charged over the financial year were USD 129,327 (31 March 2022: USD 115,703), of which USD 519 (31 March 2022: USD 10,579) were outstanding at 31 March 2023.

Daniel Morrissey is no longer a Director of the Company effective 22 December 2022 and no longer a partner of William Fry effective 1 January 2022 (the Company's legal advisers as to Irish law). The partners of William Fry own Wilton Secretarial Limited (the "Secretary"). Daniel Morrissey had a beneficial interest under the Companies Act 2014 in legal and secretarial fees paid to William Fry during the financial year ended 31 March 2022. The secretarial fees paid to William Fry and the Secretary during financial year ended 31 March 2023 amounted to USD 396,652 (31 March 2022: USD 498,332).

Related Party Shareholders

Notes to the Financial Statements (continued)

15. Significant Events During The Financial Year (continued)

Effective 5 April 2022, the Company's Supplements for Lazard Emerging Markets Total Return Debt Fund, Lazard European Alternative Fund and Lazard Rathmore Alternative Fund were amended to reflect changes of performance fee crystallization.

Samantha McConnell was appointed to the Audit Committee on 14 June 2022.

Lazard Thematic Inflation Opportunities Fund launched on 21 June 2022.

Gavin Caldwell resigned as a Director of the Company and also resigned from the Company's Audit Committee effective 30 September 2022.

Lazard Nordic High Yield Bond Fund launched on 1 November 2022.

Deirdre Gormley was appointed as a Director of the Company, director of the Manager and a member of Company's Audit Committee effective 7 November 2022.

Lazard Emerging Bond Fund was fully redeemed on 16 November 2022.

Effective 1 December 2022, the Company's Prospectus and Supplements were amended for the following:

- (a) an amendment of Sustainable Financing Disclosure Regulation disclosure;
- (b) amendments to the Management and Administration section;
- (c) an amendments to the taxes on income and capital gains under The Shareholders section;
- (d) update to list of entitles to whom safekeeping duties of the Depositary may be delegated or sub-delegated.

Effective 12 December 2022, the Company's Supplement for Lazard Coherence Credit Alternative Fund was amended.

Daniel Morrissey resigned as a Director of the Company and also resigned from the Company's Audit Committee effective 22 December 2022.

Lazard Diversified Return Fund was fully redeemed on 13 January 2023.

Crisis in Ukraine, Recent Market Events and effect on the Funds

On 24 February 2022, Russian troops launched an invasion of Ukraine and, as at May 2023, the countries remain in active armed conflict. As a result of the invasion, the United States, the United Kingdom, the European Union, and several other nations announced a broad array of new or expanded sanctions, export controls, and other measures against Russia, as well as upon certain banks, companies, government officials, and other individuals in or affiliated with Russia and Belarus.

The ongoing conflict and the rapidly evolving response measures has had a negative impact on the economy and business activity globally (including in the countries in which the Fund invests), and therefore could adversely affect the performance of the Fund's investments. The severity and duration of the conflict and its impact on global economic and market conditions are impossible to predict, and as a result, management is actively monitoring the situation and the impact it may have on the Fund. There is also a potential impact with respect to inflation and also a potential supply chain disruption to the underlying companies invested in.

As at 31 March 2023, none of the Funds held Russian debt securities. As at 31 March 2022, a number of Emerging Markets Funds held Russian debt securities and these securities were less than 1% on each applicable Fund.

For certain Funds, the market in which the Funds' investments were exposed to experienced significant volatility during the financial year. The absolute and relative performance numbers are included in the Investment Management Commentaries within these Financial Statements.

The collapse of Silicon Valley Bank, followed by the failure of Signature Bank and the resolution of Credit Suisse by sale to UBS shortly thereafter, has led to significant turmoil in global financial markets. The knock-on effects of these events are still evolving and at this stage it is difficult to predict the broader impact on the banking system and financial marketplace. The Manager continues to monitor the situation and assess the implications on the operations of the Funds.

There were no other significant events affecting the Company during the financial year.

Notes to the Financial Statements (continued)

16. Significant Events Since The Financial Year End

Distributions will not be paid in respect of any class of Share which is an accumulating class. Income and profits, if any, attributable to an accumulating Share class will be accumulated and reinvested in the relevant Fund on behalf of the Shareholders of that class and will be reflected in the NAV of the relevant accumulating Share class. Distributions were declared on the below share classes in respect of the financial year from 1 April 2022 to 31 March 2023. These were paid to the Shareholders of that class in the relevant Fund on 11 and 12 April 2023 and details of these distributions are as follows:

Notes to the Financial Statements (continued)

16. Significant Events Since The Financial Year End (continued)

In order to comply with the requirements of the Commission Delegated Regulation (EU) 2023/363 supplementing the Sustainable Finance Disclosures Regulation (EU) 2019/2088 (“SFDR Level 2”) applicable to the Company from 1 January 2023, an Addendum to the Prospectus relating to some of the Company’s sub-funds has been filed with the Central Bank for noting on 20 April 2023 via the SFDR self-certification filing process.

Effective 28 April 2023, the Company’s Supplements for Lazard Emerging Markets Debt Blend Fund, Lazard Emerging Markets Local Debt Fund and Lazard Emerging Markets Debt Unrestricted Blend Fund, have been updated to reflect the replacement of the JPM GBI-EM Global Diversified Index to the tax adjusted version of the same index, that being the: J.P. Morgan Government Bond Index-Emerging Markets Global Diversified Index, Tax Adjusted.

A notice has been issued to fund investors to close Lazard Coherence Credit Alternative Fund. The final redemptions from the Fund will be on or before 17 July 2023.

There were no other significant events affecting the Company since the financial year end.

17. Reconciliation Of Financial Statements NAV To Published NAV

All fees and expenses of establishing Lazard Thematic Inflation Opportunities Fund, Lazard Nordic High Yield Fund, Lazard Commodities Fund and Lazard Coherence Credit Alternative Fund at 31 March 2023, and Lazard Global Convertibles Investment Grade Fund, Lazard Global Quality Growth Fund, Lazard Coherence Credit Alternative Fund and Lazard Commodities Fund at 31 March 2022 are borne by the Fund.

The counterparty for the open futures contracts is JP Morgan Chase and Company.										
The counterparty for the open forward foreign currency exchange contracts is State Street Bank and Trust Company.										
The counterparty for the total return swaps is Morgan Stanley.										
* A portion of these securities is pledged as collateral in connection with the collateral requirements for total return swaps held by the Fund. The amount of collateral that is pledged is USD 4,368,386.										
Equities are primarily classified by the country of incorporation of the entity in which the Fund holds shares. Fixed income securities are primarily classified by the country of incorporation of the issuer for corporate fixed income securities and country of issuer for government type fixed income securities.										

Statement of Major Changes in Investments (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, a statement of largest changes in the composition of the Portfolios of Investments during the reporting period is provided to ensure that shareholders can identify changes in the investments held by the Funds. These are defined as the aggregate purchases and sales of an investment (including maturities but excluding repurchase agreements, overnight discount notes and time deposits, which are employed chiefly as a means of seeking to ensure efficient portfolio management) exceeding 1.00% of the total value of purchases and sales for the financial period. At a minimum the largest 20 purchases and sales are listed.

* There were no other disposals during the year ended 31 March 2023.

Securities Financing Transactions Regulation Appendix (Unaudited)

Securities Financing Transactions Regulation (Regulation (EU) 2015/2365) ("SFTR") came into force on 12 January 2016 and, amongst other requirements, introduced new disclosure requirements in the Company's financial statements, detailing the Fund's use of securities financing transactions ("SFTs") and total return swaps.

Article 13 of Regulation (EU) 2015/2365 on transparency of SFTs and of reuse and amending Regulation (EU) No 648/2012, requires UCITS investment companies to provide the following information on the use made of SFTs.

Below is the market value of assets engaged in SFTs as at 31 March 2023. The assets which are engaged in SFTs at this date are total return swaps, which are settled tri-party respectively.

Fund	Currency	Fair Value	% of Net Assets Value
Lazard Commodities Fund	USD	(3,749,672)	(5.61)
Lazard European Alternative Fund	EUR	(2,287,016)	(0.46)
Lazard Rathmore Alternative Fund	USD	(135,028,902)	(6.21)
Lazard Coherence Credit Alternative Fund	USD	112,152	0.69

The following table details the counterparties used for each type of total return swaps as at 31 March 2023.

Fund	Currency	Counterparty Name	Country of Establishment	Fair Value
Lazard Commodities Fund	USD	CIBC World Markets	Canada	(1,874,836)
	USD	UBS AG	Switzerland	(1,874,836)
Lazard European Alternative Fund	EUR	Bank of America Merrill Lynch	United Kingdom and Wales	(2,367,131)
	EUR	Morgan Stanley	United Kingdom and Wales	80,115
Lazard Rathmore Alternative Fund	USD	Bank of America Merrill Lynch	United Kingdom and Wales	(516,115)
	USD	BNP Paribas	France	(59,306,543)
	USD	Nomura	Japan	(60,654,497)
	USD	Societe Generale	France	(14,551,747)
Lazard Coherence Credit Alternative Fund	USD	Morgan Stanley	United Kingdom and Wales	112,152

The following table provides an analysis of maturity tenor of the total return swaps as at 31 March 2023.

Fund	Currency	Less than 1 day	1 day to 1 week	1 week to 1 month	1 to 3 months	3 months to 1 year	Greater than 1 year	Open Maturity*
Lazard Commodities Fund	USD	-	-	-	-	-	-	(3,749,672)
Lazard European Alternative Fund	EUR	-	-	-	-	-	-	(2,287,016)
Lazard Rathmore Alternative Fund	USD	-	-	-	-	-	-	(135,028,902)
Lazard Coherence Credit Alternative Fund	USD	-	-	-	-	-	-	112,152

The following table provides an analysis of the currency, type and quality of collateral as at 31 March 2023.

Fund	Currency	Collateral Quality/Rating			
		Collateral Type	Investment grade	Below investment grade	Not rated
Lazard European Alternative Fund	EUR	Government Bonds	68,457,172	-	-
Lazard Rathmore Alternative Fund	USD	Government Bonds	980,363,931	-	-
Lazard Coherence Credit Alternative Fund	USD	Government Bonds	4,346,545	-	-

The following table provides an analysis of the maturity tenor of the collateral as at 31 March 2023.

Fund	Currency	Less than 1 day	1 day to 1 week	1 week to 1 month	1 to 3 months	3 months to 1 year	Greater than 1 year	Open Maturity
Lazard European Alternative Fund	EUR	-	-	-	11,492,845	56,964,327	-	-
Lazard Rathmore Alternative Fund	USD	-	-	175,955,454	312,341,650	492,066,827	-	-
Lazard Coherence Credit Alternative Fund	USD	-	-	1,916,393	262,172	2,167,980	-	-

Securities Financing Transactions Regulation Appendix (Unaudited) (continued)

The following table lists the ten largest collateral issuers as at 31 March 2023.

Collateral Issuers	Lazard European Alternative Fund	Lazard Rathmore Alternative Fund	Lazard Coherence Credit Alternative Fund
	EUR	USD	USD
Bank of America Merrill Lynch	35,775,775	-	-
Morgan Stanley	32,681,397	-	4,346,545
BNP Paribas	-	592,412,871	-
Nomura	-	299,214,923	-
Societe Generale	-	88,736,137	-

* These contracts can be closed out at an earlier date than the maturity date subject to Investment Managers' discretion.

The returns and costs of the total return swaps held by the Funds cannot be separately identified and are included in net gain/(loss) on financial assets at fair value through profit or loss in the Statement of Comprehensive Income.

UCITS V Remuneration Disclosure (Unaudited)

As a result of the implementation of the UCITS V Directive in March 2016, all authorised UCITS Management Companies must make certain disclosures in relation to the remuneration of 'UCITS Code Staff' (broadly defined as those staff whose professional activities have a material impact on the risk profiles of the funds managed by that UCITS Management Company). Staff remuneration is pro-rated based on the proportion of their time spent on the Funds.

Lazard Global Investment Funds plc (the "Company") is managed by Lazard Fund Managers (Ireland) Limited (the "Manager"), which is a subsidiary of the Lazard Asset Management LLC ("LAM Group").

The table below provides an overview of the following;

- Aggregate total remuneration paid by the Manager to its staff; and
- Aggregate total remuneration paid by the Manager to its UCITS Code Staff for activities in respect of the Fund.

	Headcount	Total Remuneration USD
Remuneration paid to staff of the Manager	95	14,624,027
<i>of which</i>		
Fixed remuneration	95	3,148,556
Variable remuneration	95	11,475,471
Aggregate remuneration paid to UCITS Remuneration Code staff	83	14,624,027
<i>of which</i>		
Senior Management	8	1,305,884
Other code staff/risk takers	75	13,318,143

- 1) 'UCITS Remuneration Code Staff' relates to the total number of UCITS Code Staff who are employed by the Manager, including directors and similar. It also includes employees of other entities within the LAM Group to whom certain functions in respect of the Fund (in particular investment management) have been delegated.
- 2) Please note, because of the global way in which LAM operates, the majority of these staff members provide services to more than one LAM Group entity.
- 3) The remuneration disclosed above only relates to the provision of services by these employees to the Fund (on a pro rata basis) rather than the total remuneration paid to those employees in the year. Remuneration is pro-rated on the basis of assets under management within the Fund.

Remuneration is made up of fixed pay (i.e. salary and benefits such as pension contributions) and performance-related pay (annual and long-term incentives). Annual incentives are designed to reward performance in line with the business strategy, objectives, values and long-term interests of the Manager and LAM. The annual incentive earned by an individual is dependent on the achievement of financial and non-financial objectives, including adherence to effective risk management practices. The Manager provides long-term incentives which are designed to link reward with long-term success and recognise the responsibility participants have in driving future success and delivering value. The structure of remuneration packages is such that the fixed element is sufficiently large to enable a flexible incentive policy to be operated.

Employees are eligible for an annual incentive based on their individual performance, and depending on their role, the performance of their business unit and/or the LAM Group. These incentives are managed within a strict risk framework. The LAM Group actively manages risks associated with delivering and measuring performance. Employee activities are carefully managed within the LAM risk management framework, and individual incentive outcomes are reviewed and may be reduced in light of any associated risk management issues.

LAM's Remuneration Committee operates on a global basis, across the Lazard Group as a whole. It reports to the Board of the Lazard Group. This Committee reviews risk and compliance issues in relation to remuneration (including deferred awards) for all employees.

These remuneration processes and oversight arrangements apply to all entities within the LAM Group, including those to which investment management of UCITS funds has been delegated. Those delegates are subject to contractual arrangements to ensure that policies which are regarded as equivalent are applied.

The general principles of the applicable remuneration policies, and the implementation of the remuneration policies is reviewed at least annually.

Sustainable Finance Disclosures Regulation Appendix (Unaudited)

LGIF funds in scope of SFDR were classified as Article 6 or 8 in March 2021 after a review process that included mandatory ESG signatures, an assessment how ESG factors are factored into the investment process, and how ESG research is actioned either through trading decisions and stewardship activities. Funds were also assessed against criteria across the different regulatory environments in Europe, including AMF (France) and MiFID requirements. As part of the classification process, all funds in scope of SFDR classified as Article 8 or 9 placed additional minimum exclusion screens on companies with tobacco production (5% of revenue or greater), military weapons production (10% of revenue or greater), thermal coal mining or production (30% of revenue or greater), and United Nations Global Compact principles violations.

To meet evolving SFDR requirements, LAM developed a firmwide approach for products categorized as Article 8 (and any future Article 9 funds), with specific binding criteria that must be met. LAM is currently developing the required tools to implement and monitor the SFDR binding criteria. Binding criteria will be monitored on a regular basis by LAM's Global Risk Management Team with support from the Sustainable Investment & ESG Team and also external ESG information sourced from third-party data providers. Trading and compliance systems and functions will support pre-trade compliance.

Given the continued delayed with the implementation of SFDR Level 2, which is now expected to come into force on 1 January 2023, Lazard Group is still in the process of completing the relevant pre-contractual disclosures for Funds classified as Article 8 and 9. The disclosures will detail the relevant binding criteria for each product and will be finalised in H2 2022. We expect to publish Annex II on the Lazard website in the second half of 2022.

The following table outlines the SFDR categorisation of the Funds as at the date of publication of the financials.

Fund	SFDR Categorisation
Lazard Global Quality Growth Fund	Article 8
Lazard Thematic Inflation Opportunities Fund*	Article 8
Lazard Global Convertibles Investment Grade Fund	Article 8
Lazard Global Convertibles Recovery Fund	Article 8
Lazard Emerging Markets Bond Fund***	Article 8
Lazard Emerging Markets Local Debt Fund	Article 8
Lazard Emerging Markets Total Return Debt Fund	Article 8
Lazard Emerging Markets Debt Blend Fund	Article 8
Lazard Emerging Markets Debt Unrestricted Blend Fund	Article 8
Lazard Emerging Markets Corporate Debt Fund	Article 8
Lazard Nordic High Yield Bond Fund**	Article 8
Lazard Scandinavian High Quality Bond Fund	Article 8
Lazard Commodities Fund	Article 6
Lazard Diversified Return Fund***	Article 8
Lazard European Alternative Fund	Article 8
Lazard Rathmore Alternative Fund	Article 8
Lazard Coherence Credit Alternative Fund	Article 6

* Lazard Thematic Inflation Opportunities Fund launched on 21 June 2022.

** Lazard Nordic High Yield Bond Fund launched on 1 November 2022.

*** Lazard Emerging Markets Bond Fund fully redeemed on 16 November 2022.

**** Lazard Diversified Return Fund fully redeemed on 13 January 2023.

Sustainable Finance Disclosures (“Annex IV”)

Periodic Disclosure (“ANNEX IV”)

Summary

When completing the template periodic disclosure for each of the sub-funds of the Company, a number of factors were taken into consideration, as follows:

When completing the section labelled:
“How did the sustainability indicators perform?”
<ul style="list-style-type: none"> - Where relevant, the sustainability indicators are calculated using a quarterly average over the financial year period (the reference period). - Data can be sourced from external data aggregation tools, third-party data providers, or internal data sources. As a result of differing data sources, there may be different calculation methodologies. Methodology documentation can be provided on request or sourced from the relevant third-party data provider. The Investment Manager has no ability to influence or amend the methodology set by third-party data providers.
“What were the top investments in this financial product?”
<ul style="list-style-type: none"> - The proportion of investments represent average position sizes using a quarterly average over the financial year period (the reference period). - Hedging and derivative exposures are not included in the top investments as these typically net to 0% and are not used to attain environmental and/or social characteristics of a Fund. They are typically only used for hedging exposure. - Cash positions are included within the top investments if relevant, however these positions are not used to attain the environmental and/or social characteristics of a Fund. - Data can be sourced from external data aggregation tools, third-party data providers, or internal data sources. As a result of differing data sources, there may be differences in the largest investments and the percentage of assets due to different calculation methodologies
“In which economic sectors were the investments made?”
<ul style="list-style-type: none"> - The proportion of investments represent average asset allocation using a quarterly average over the financial year period (the reference period). - Portfolio asset allocation is based on GICS sector definitions. For certain fixed income portfolios with sovereign exposures, asset allocation is also separated by government, government-related, and ‘Other Bonds’ which capture any supranational or other bond allocations. - Sector allocations are shown net of any cash or derivative exposures in a Fund, if relevant. The result being that figures may not always sum to 100% due to different calculation methodologies or rounding differences. - Data can be sourced from external data aggregation tools, third-party data providers, or internal data sources. As a result of differing data sources, there may be differences in the asset allocation and sector classifications aligned to economic sectors due to different calculation methodologies and availability of data.

General Considerations
Data Sources and Processing
<p>The Investment Manager has access to ESG data from internal and external resources, including:</p> <ol style="list-style-type: none"> 1. Internal information, including: an ESG Watchlist report that flags companies scoring poorly on a selection of ESG risk factors and stewardship activity (engagement, proxy voting, shareholder resolution) related to ESG issues. 2. Third-party data and information, including: ESG ratings and risk scores for systematic comparison of ESG performance across companies, controversies analysis and information, global norms compliance screens, and a wider set of ESG metrics for corporates and sovereign issuers in the investible universe. External data

Sustainable Finance Disclosures (“Annex IV”) (continued)

providers include Sustainalytics, S&P Global Trucost, Bloomberg ESG, MSCI, Clarity AI.

The Investment Manager assesses data quality of third-party data providers during initial and periodic due diligence assessments. These data sets are expanding in coverage, although reporting the level of estimated data across all vendors and relevant data points is currently challenged without further disclosure across providers. Data processing internally can take place in different formats. For example, the Investment Manager has built internal data tools that are designed to combine both internal and external datasets from multiple third-party sources. Portfolio management teams can also access certain third-party datasets via online portals, systems, and reports.

SFDR Sustainability Risks Policy

<https://www.lazardassetmanagement.com/docs/-m0-/117535/LFMISFDRWebsitePolicy.pdf>

Methodologies

The Investment Manager may apply different methodologies to measure how the environmental or social characteristics promoted by the financial product are met. The methodology selected is dependent on the source of data used to measure the environmental or social characteristics, such as:

1. For characteristics that are supported by the Investment Manager’s proprietary processes and frameworks, the methodology will be detailed within product-specific documentation, such as the Fund’s Supplement. Any changes to specific methodologies will be included in future updates to relevant documentation.
2. For characteristics that are supported by third-party ESG data providers, each provider uses its own methodologies and set of internal processes. While there is limited influence over these methodologies (as an end consumer of this data), the Investment Manager aims to provide appropriate levels of oversight and due diligence to ensure services meet data quality expectations.

Limitations to Methodologies

The Investment Manager notes that a central limitation to ESG methodology or data sourcing is the lack of corporate disclosure. Other key issues with external data providers include data quality and the use of estimates. This is particularly relevant for data points identified as adverse sustainability impacts in the SFDR regulation. To address data challenges, the Investment Manager relies upon a combination of internal and external resources. Proprietary fundamental ESG assessments may also differ from that of external providers, possibly because of provider data gaps, or because the Investment Manager seeks to generate differentiated insights using fundamental analysis to supplement external data.

Sustainable Finance Disclosures (“Annex IV”) (continued)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

	Product name:	Lazard Global Quality Growth Fund	Legal entity identifier:	2549002AJXPA35OS780
<p>Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.</p> <p>The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.</p>	Environmental and/or social characteristics			
	Did this financial product have a sustainable investment objective			
	<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes		<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No	
	<input type="checkbox"/>	It made sustainable investments with an environmental objective : ___%	<input type="checkbox"/>	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
	<input type="checkbox"/>	in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/>	in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	
<input type="checkbox"/>	It made sustainable investments with a social objective : ___%	<input type="checkbox"/>	with a social objective	
<input type="checkbox"/>	It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/>	It promoted E/S characteristics, but did not make any sustainable investments	
	To what extent were the environmental and/or social characteristics promoted by this financial product met?			
<p>During the twelve-month period ended March 2023, the Fund sought to maintain a lower than benchmark Weighted Average Carbon Intensity (WACI) and better than benchmark ESG rating. The Fund also sought to avoid investing in companies deemed in violation of the UNGC principles and those materially involved in controversial weapons, military weapons, thermal coal, or tobacco production. The Fund achieved these environmental/social characteristics during the relevant period by maintaining lower WACI and a better ESG rating than the benchmark index, as well as not investing in excluded companies, as more fully explained in the section below on the sustainability indicators of the Fund.</p>				

Sustainable Finance Disclosures (“Annex IV”) (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● How did the sustainability indicators perform?

The Fund’s sustainability indicators performed as follows:

1. The Fund’s Weighted Average Carbon Intensity (WACI) outperformed the benchmark index (shown below).

As of March 2023. Based on twelve-month rolling average.
WACI methodology based on TCFD/SFDR approach.
Source: S&P Trucost.

2. The Fund’s ESG Risk Rating outperformed the benchmark index (shown below).

As of March 2023. Based on twelve-month rolling average.
Scores range from 0 (Negligible ESG Risk) to 40+ (Severe ESG Risk). Lower ESG Risk Ratings are better.
Source: Sustainalytics.

3. The Fund had no exposure to companies deemed by the Investment Manager to be breaching the UNGC principles.
4. The Fund had no exposure to companies excluded by the exclusion criteria relating to controversial weapons production, military weapons production, thermal coal mining or production, or tobacco production.

● ...and compared to previous periods?

N/A

Sustainable Finance Disclosures (“Annex IV”) (continued)

		<ul style="list-style-type: none"> ● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?
		N/A. The Fund did not make sustainable investments.
		<ul style="list-style-type: none"> ● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?
Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters		N/A
		<ul style="list-style-type: none"> --- How were the indicators for adverse impacts on sustainability factors taken into account?
		N/A
		<ul style="list-style-type: none"> --- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:
		N/A
		<p><i>The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.</i></p> <p>The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.</p> <p><i>Any other sustainable investments must also not significantly harm any environmental or social objectives.</i></p>

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (PAIs) on sustainability factors through several methods over the reference period.

Exclusions

Through pre-investment global norms and activity-based exclusions, investments in certain corporates or countries were avoided, mitigating potential adverse sustainability impacts. Specific exclusion criteria are available in the relevant pre-contractual disclosure for the Fund.

ESG integration and investment due diligence

Material environmental and social issues in the mandatory PAI indicators were incorporated as part of the Investment Manager’s proprietary research over the period, taking into consideration sector, geographical, and other factors that impact the materiality and relevance of PAIs to each investment. The Investment Manager also referenced third-party ESG research and data for additional information and relative industry and universe positioning. By integrating these ESG considerations within the investment process, the Investment Manager may reduce or avoid potential adverse sustainability impacts from investments.

Stewardship activities

Although engagement is not directly linked to the specific environmental or social characteristics of the Fund, the Investment Manager considered adverse impacts on sustainability factors through actions such as engagement and voting on ESG topics. Over the period, the Investment Manager conducted engagements focusing on material PAIs such as GHG emissions and other carbon metrics, board diversity and governance issues such as executive compensation and shareholder rights. Engagement activity is prioritised by considering both ESG and financial impacts, as well as sector and regional considerations.

Further information how PAIs can be found in the relevant pre-contractual disclosure for the Fund.

Sustainable Finance Disclosures (“Annex IV”) (continued)

What were the top investments of this financial product?

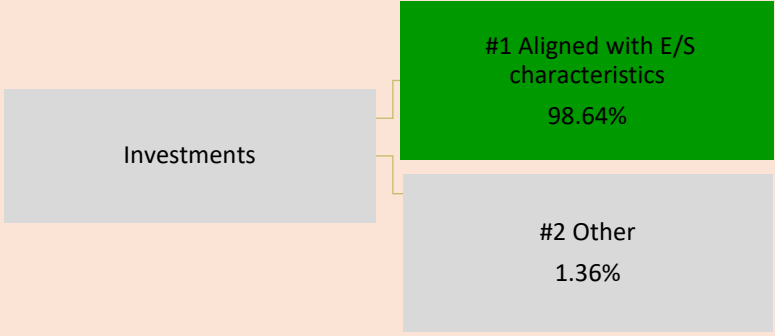

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:
01/04/2022-31/03/2023

The Fund had the following top investments over the reference period:

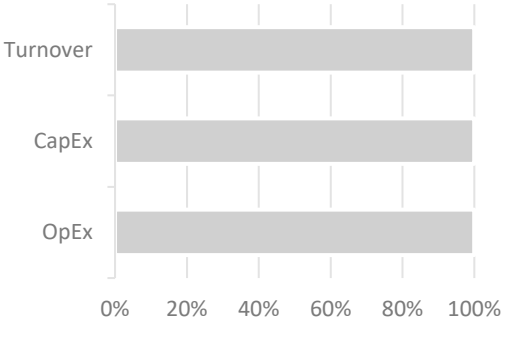

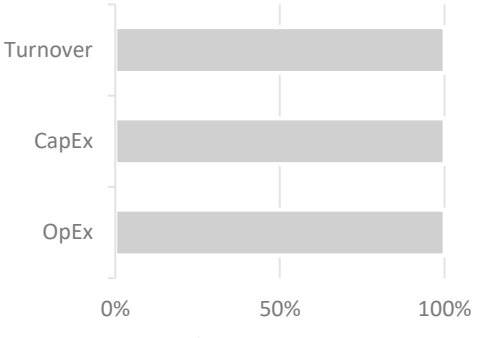

Largest investments	Sector	Assets (%)	Country
Microsoft Corporation	Information Technology	4.59	United States
Alphabet Inc. Class A	Communication Services	4.17	United States
Accenture Plc Class A	Information Technology	3.93	United States
Aon Plc Class A	Financials	3.66	United States
Coca-Cola Company	Consumer Staples	3.40	United States
Visa Inc. Class A	Information Technology	3.03	United States
Danaher Corporation	Health Care	3.02	United States
Thermo Fisher Scientific Inc.	Health Care	2.91	United States
S&P Global, Inc.	Financials	2.91	United States
LVMH Moët Hennessy Louis Vuitton SE	Consumer Discretionary	2.72	France
Dollarama Inc.	Consumer Discretionary	2.64	Canada
BRP, Inc.	Consumer Discretionary	2.59	Canada
Zoetis, Inc. Class A	Health Care	2.54	United States
Intuit Inc.	Information Technology	2.50	United States
IQVIA Holdings Inc	Health Care	2.49	United States

Note: Proportion of investments are shown as average position sizes over the reference period.

Sustainable Finance Disclosures (“Annex IV”) (continued)

	<p>What was the proportion of sustainability-related investments?</p>																										
	<p>● <i>What was the asset allocation?</i></p>																										
<p>Asset allocation describes the share of investments in specific assets.</p>	<div style="text-align: center;">  </div> <p>#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.</p> <p>#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.</p>																										
	<p>● <i>In which economic sectors were the investments made?</i></p> <p>The Fund made investments in the following economic sectors:</p> <table border="1" data-bbox="437 1211 1082 1879"> <thead> <tr> <th>Sector</th> <th>Portfolio weight (%)</th> </tr> </thead> <tbody> <tr> <td>Information Technology</td> <td>23.80</td> </tr> <tr> <td>Industrials</td> <td>19.73</td> </tr> <tr> <td>Financials</td> <td>15.11</td> </tr> <tr> <td>Health Care</td> <td>15.10</td> </tr> <tr> <td>Consumer Discretionary</td> <td>13.82</td> </tr> <tr> <td>Communication Services</td> <td>5.62</td> </tr> <tr> <td>Consumer Staples</td> <td>5.46</td> </tr> <tr> <td>[Cash]</td> <td>1.36</td> </tr> <tr> <td>Energy</td> <td>--</td> </tr> <tr> <td>Materials</td> <td>--</td> </tr> <tr> <td>Real Estate</td> <td>--</td> </tr> <tr> <td>Utilities</td> <td>--</td> </tr> </tbody> </table> <p>Note: Based on GICS sector definitions. Sustainable Finance Disclosures (“Annex IV”) (continued)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

	Product name:	Lazard Thematic Inflation Opportunities Fund	Legal entity identifier:	254900NTUCRQAW76BX30
<p>Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.</p> <p>The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.</p>	Environmental and/or social characteristics			
	Did this financial product have a sustainable investment objective			
	<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes		<input checked="" type="radio"/> <input type="radio"/> No	
	<input type="checkbox"/>	It made sustainable investments with an environmental objective : ___%	<input type="checkbox"/>	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
	<input type="checkbox"/>	in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/>	in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	
<input type="checkbox"/>	It made sustainable investments with a social objective : ___%	<input type="checkbox"/>	with a social objective	
<input checked="" type="checkbox"/>	It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/>	It promoted E/S characteristics, but did not make any sustainable investments	
	To what extent were the environmental and/or social characteristics promoted by this financial product met?			
	<p>During the period since inception on 14 September 2022 to the financial year-end of March 2023, the Fund sought to invest in companies assigned a net positive sustainability score under the Investment Manager's proprietary sustainability framework, maintain a better than benchmark ESG rating, and to avoid investing in companies deemed in violation of the UNGC principles and those involved in the controversial weapons, military weapons, thermal coal, or tobacco production. The Fund achieved these environmental/social characteristics during the relevant period by only investing in companies with a net positive score under the sustainability framework, maintaining a better weighted-average ESG rating than the benchmark index, and not investing in the excluded companies, as more fully explained in the section below on the sustainability indicators of the Fund.</p>			

Sustainable Finance Disclosures (“Annex IV”) (continued)

<p>Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.</p>	<p>● How did the sustainability indicators perform?</p> <p>The Fund’s sustainability indicators performed as follows:</p> <ol style="list-style-type: none"> 1. The Fund assessed all holdings against the Investment Manager’s proprietary sustainability framework and only those that were assigned a net positive score were eligible for investment. 2. The Fund’s ESG Risk Rating outperformed the benchmark index (shown below). <div data-bbox="533 443 1018 792" data-label="Figure"> <table border="1"> <caption>ESG RISK RATING</caption> <thead> <tr> <th>Category</th> <th>ESG Risk Rating</th> </tr> </thead> <tbody> <tr> <td>PORTFOLIO</td> <td>20.8</td> </tr> <tr> <td>BENCHMARK</td> <td>21.9</td> </tr> </tbody> </table> <p><i>As of March 2023. Based on rolling average since inception on 14 September 2022. Scores range from 0 (Negligible ESG Risk) to 40+ (Severe ESG Risk). Lower ESG Risk Ratings are better. Source: Sustainalytics.</i></p> </div> <ol style="list-style-type: none"> 3. The Fund had no exposure to companies deemed by the Investment Manager to be breaching the UNGC principles. 4. The Fund had no exposure to companies excluded by the exclusion criteria relating to controversial weapons production, military weapons production, thermal coal mining or production, or tobacco production. 	Category	ESG Risk Rating	PORTFOLIO	20.8	BENCHMARK	21.9

	<p>N/A</p>						
	<p>● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?</p>						
	<p>N/A. The Fund did not make sustainable investments.</p>						
	<p>● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?</p>						
<p>Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee</p>	<p>N/A</p> <p>--- How were the indicators for adverse impacts on sustainability factors taken into account?</p>						

Sustainable Finance Disclosures (“Annex IV”) (continued)

<p>matters, respect for human rights, anti-corruption and anti-bribery matters</p>	<p>N/A</p>
	<p>--- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:</p>
	<p>N/A</p>
	<p><i>The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.</i></p> <p>The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.</p> <p><i>Any other sustainable investments must also not significantly harm any environmental or social objectives.</i></p> <p>How did this financial product consider principal adverse impacts on sustainability factors?</p> <p>The Fund considered principal adverse impacts (PAIs) on sustainability factors through several methods over the reference period.</p> <p>Exclusions</p> <p>Through pre-investment global norms and activity-based exclusions, investments in certain corporates or countries were avoided, mitigating potential adverse sustainability impacts. Specific exclusion criteria are available in the relevant pre-contractual disclosure for the Fund.</p> <p>ESG integration and investment due diligence</p> <p>Material environmental and social issues in the mandatory PAI indicators were incorporated as part of the Investment Manager’s proprietary research over the period, taking into consideration sector, geographical, and other factors that impact the materiality and relevance of PAIs to each investment. The Investment Manager also referenced third-party ESG research and data for additional information and relative industry and universe positioning. By integrating these ESG considerations within the investment process, the Investment Manager may reduce or avoid potential adverse sustainability impacts from investments.</p> <p>Stewardship activities</p> <p>Although engagement is not directly linked to the specific environmental or social characteristics of the Fund, the Investment Manager considered adverse impacts on sustainability factors through actions such as engagement and voting on ESG topics. Over the period, the Investment Manager conducted engagements focusing on material PAIs such as GHG emissions and other carbon metrics, board diversity and governance issues such as executive compensation and shareholder rights. Engagement activity is prioritised by considering both ESG and financial impacts, as well as sector and regional considerations.</p> <p>Further information how PAIs can be found in the relevant pre-contractual disclosure for the Fund.</p>

Sustainable Finance Disclosures (“Annex IV”) (continued)

What were the top investments of this financial product?

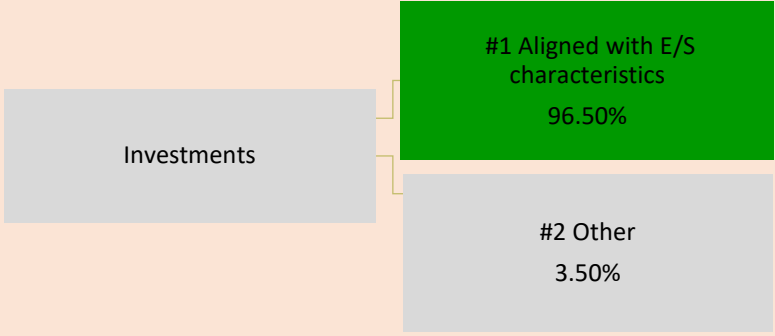

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:
14/09/2022-31/03/2022
 (Since Fund inception)

The Fund had the following top investments over the reference period:

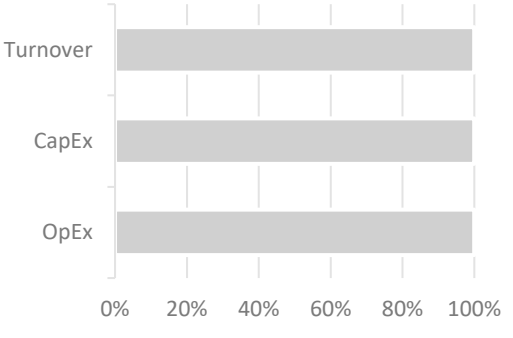

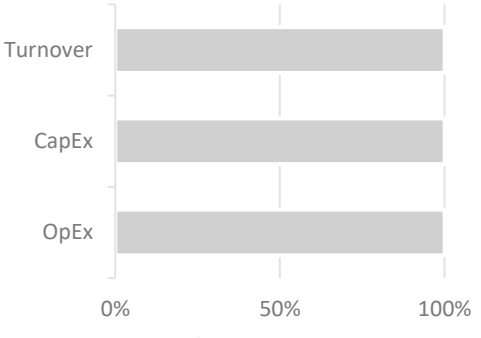

Largest investments	Sector	Assets (%)	Country
U.S. Dollar	[Cash]	3.24	[Cash]
BP p.l.c.	Energy	2.48	United Kingdom
Shell Plc	Energy	2.47	United Kingdom
McDonald's Corporation	Consumer Discretionary	2.37	United States
Thermo Fisher Scientific Inc.	Health Care	2.34	United States
TotalEnergies SE	Energy	2.33	France
Costco Wholesale Corporation	Consumer Staples	2.31	United States
Caterpillar Inc.	Industrials	2.18	United States
Martin Marietta Materials, Inc.	Materials	2.18	United States
L'Oreal S.A.	Consumer Staples	2.13	France
Vestas Wind Systems A/S	Industrials	2.11	Denmark
Equinor ASA	Energy	2.11	Norway
CSX Corporation	Industrials	2.10	United States
Compagnie Financiere Richemont SA	Consumer Discretionary	2.09	Switzerland
Vulcan Materials Company	Materials	2.07	United States

Note: Proportion of investments are shown as average position sizes over the reference period.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

	Product name:	Lazard Global Convertibles Investment Grade Fund	Legal entity identifier:	254900AJOIQYHH23WS22	
<p>Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.</p> <p>The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.</p>	Environmental and/or social characteristics				
	Did this financial product have a sustainable investment objective				
	●● <input type="checkbox"/> Yes		●○ <input checked="" type="checkbox"/> No		
	<input type="checkbox"/>	It made sustainable investments with an environmental objective : ___%	<input type="checkbox"/>	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments	
	<input type="checkbox"/>	in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy	
<input type="checkbox"/>	in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy		
<input type="checkbox"/>	It made sustainable investments with a social objective : ___%	<input type="checkbox"/>	with a social objective		
<input type="checkbox"/>	It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/>	It promoted E/S characteristics, but did not make any sustainable investments		
	To what extent were the environmental and/or social characteristics promoted by this financial product met?				
<p>During the twelve-month period ended March 2023, the Fund sought to maintain a better than universe ESG rating and to avoid investing in companies deemed in violation of the UNGC principles and those involved in the controversial weapons, military weapons, thermal coal, or tobacco production. The Fund achieved these environmental/social characteristics during the relevant period by maintaining a better weighted-average ESG rating than the Global Convertibles universe and not investing in the excluded companies, as more fully explained in the section below on the sustainability indicators of the Fund.</p>					

Sustainable Finance Disclosures (“Annex IV”) (continued)

<p>Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.</p>	<p>● How did the sustainability indicators perform?</p> <p>The sustainability indicators performed as follows:</p> <ol style="list-style-type: none"> The Fund’s ESG rating outperformed the reference Global Convertibles universe (referred to as the ‘Benchmark’ in pre-contractual documentation). <div data-bbox="533 376 981 728" data-label="Figure"> <table border="1"> <caption>ESG SCORE</caption> <thead> <tr> <th>Category</th> <th>Score</th> </tr> </thead> <tbody> <tr> <td>PORTFOLIO</td> <td>3.05</td> </tr> <tr> <td>BENCHMARK</td> <td>2.60</td> </tr> </tbody> </table> <p><i>As of March 2023. ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

	Product name:	Lazard Global Convertibles Recovery Fund	Legal entity identifier:	254900BF3YG57YQDQU37
<p>Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.</p>	Environmental and/or social characteristics			
<p>The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.</p>	Did this financial product have a sustainable investment objective			
	●● <input type="checkbox"/> Yes		●○ <input checked="" type="checkbox"/> No	
	<input type="checkbox"/>	It made sustainable investments with an environmental objective : ___%	<input type="checkbox"/>	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
	<input type="checkbox"/>	in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
	<input type="checkbox"/>	in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	<input type="checkbox"/>	It made sustainable investments with a social objective : ___%	<input type="checkbox"/>	with a social objective
	<input type="checkbox"/>	It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/>	It promoted E/S characteristics, but did not make any sustainable investments
	To what extent were the environmental and/or social characteristics promoted by this financial product met?			
<p>Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.</p>	<p style="text-align: center;">● How did the sustainability indicators perform?</p> <p>The sustainability indicators performed as follows:</p> <ol style="list-style-type: none"> 1. The Fund had no exposure to companies deemed by the Investment Manager to be breaching the UNGC principles. 2. The Fund had no exposure to companies excluded by the exclusion criteria relating to controversial weapons production, military weapons production, thermal coal mining or production, or tobacco production. 			

Sustainable Finance Disclosures (“Annex IV”) (continued)

		● <i>...and compared to previous periods?</i>
		N/A
		● <i>What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?</i>
		N/A. The Fund did not make sustainable investments.
<p>Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters</p>		● <i>How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?</i>
		N/A
		--- <i>How were the indicators for adverse impacts on sustainability factors taken into account?</i>
		N/A
		--- <i>Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:</i>
		N/A
		<p><i>The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.</i></p> <p>The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.</p> <p><i>Any other sustainable investments must also not significantly harm any environmental or social objectives.</i></p>

Sustainable Finance Disclosures (“Annex IV”) (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Fund considered a selection of the principal adverse impacts (PAIs) on sustainability factors through several methods over the reference period, where data was available.

Exclusions

Through pre-investment global norms and activity-based exclusions, investments in certain corporates or countries were avoided, mitigating potential adverse sustainability impacts. Specific exclusion criteria are available in the relevant pre-contractual disclosure for the Fund.

ESG integration and investment due diligence

Material environmental and social issues in the mandatory PAI indicators were incorporated as part of the Investment Manager’s proprietary research over the period, taking into consideration sector, geographical, and other factors that impact the materiality and relevance of PAIs to each investment. The Investment Manager also referenced third-party ESG research and data for additional information and relative industry and universe positioning. By integrating these ESG considerations within the investment process, the Investment Manager may reduce or avoid potential adverse sustainability impacts from investments.

Stewardship activities

Although engagement is not directly linked to the specific environmental or social characteristics of the Fund, the Investment Manager considered adverse impacts on sustainability factors through actions such as engagement on ESG topics. Over the period, the Investment Manager conducted engagements focusing on material PAIs such as GHG emissions and other carbon metrics, board diversity and governance issues such as executive compensation and shareholder rights. Engagement activity is prioritised by considering both ESG and financial impacts, as well as sector and regional considerations.

Further information on the PAIs considered can be found in the relevant pre-contractual disclosure for the Fund.

Sustainable Finance Disclosures (“Annex IV”) (continued)

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:
01/04/2022 - 31/03/2023

The Fund had the following top investments over the reference period:

Largest investments	Sector	Assets (%)	Country
IAGLN 1.125 05/18/28 IAG	Industrials	2.91%	Spain
IWGLN 0.5 12/09/27	-	2.48%	Luxembourg
DUFNSW 0.75 03/30/26	Financials	2.4%	Netherlands
AMG CAPITAL TRUST II	Financials	2.34%	United States
PEB 1.75 12/15/26	Real Estate	2.24%	United States
HTHT 3 05/01/26	Consumer Discretionary	2.21%	China
ACFP 0.7 12/07/27	Consumer Discretionary	2.13%	France

BWONO 2.5 11/12/24	Energy	2.06%	Bermuda
EXPE 0 02/15/26	Consumer Discretionary	2.02%	United States
AMSSM 1.5 04/09/25	Consumer Discretionary	1.94%	Spain
RCL 2.875 11/15/23	Consumer Discretionary	1.93%	Liberia
NCLH 1.125 02/15/27	Consumer Discretionary	1.89%	Bermuda
SIASP 1.625 12/03/25	Industrials	1.76%	Singapore
MTXGR 0.05 03/18/27 MTX	Industrials	1.72%	Germany

Note: Proportion of investments are shown as average position sizes over the reference period.

Sustainable Finance Disclosures (“Annex IV”) (continued)

What was the proportion of sustainability-related investments?

● **What was the asset allocation?**

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● **In which economic sectors were the investments made?**

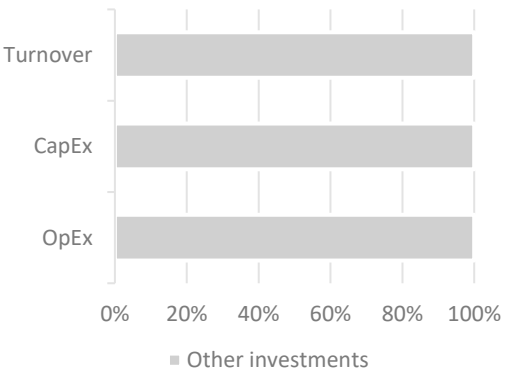

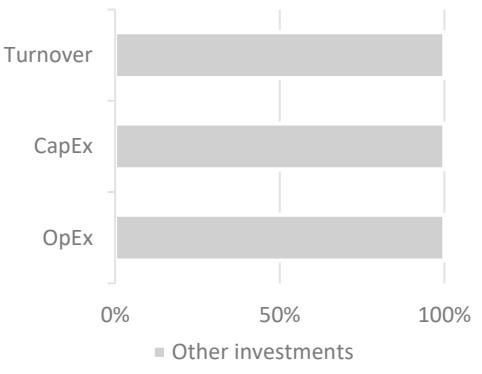

The Fund made investments in the following economic sectors:

Sector	Portfolio weight (%)
Consumer Discretionary	32.16%
Industrials	16.5%
Unassigned	9.33%
Communication Services	9.13%
Information Technology	7.04%
Financials	6.93%
Health Care	5.54%
Real Estate	3.6%
Energy	3.5%
Consumer Staples	2.82%
Utilities	2.06%
Materials	1.13%
Cash	2.72%

Note: Based on GICS sector definitions. Sectors allocations shown net of any cash or derivative exposures in the Fund.

The average exposure to fossil fuels activities was 3.90% over the period.

Sustainable Finance Disclosures (“Annex IV”) (continued)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

	Product name:	Lazard Emerging Markets Bond Fund	Legal entity identifier:	8UAV1RTSVKD4L4PZ1H52	
<p>Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.</p> <p>The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.</p>	Environmental and/or social characteristics				
	Did this financial product have a sustainable investment objective				
	<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes		<input checked="" type="radio"/> <input type="radio"/> No		
	<input type="checkbox"/>	It made sustainable investments with an environmental objective : ___%	<input type="checkbox"/>	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments	
	<input type="checkbox"/>	in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy	
<input type="checkbox"/>	in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy		
<input type="checkbox"/>	It made sustainable investments with a social objective : ___%	<input type="checkbox"/>	with a social objective		
<input type="checkbox"/>		<input checked="" type="checkbox"/>	It promoted E/S characteristics, but did not make any sustainable investments		
	To what extent were the environmental and/or social characteristics promoted by this financial product met?				
<p>During the period from 1 April 2022 to 17 November 2022 (Fund closure date), the Fund sought to maintain a better than benchmark ESG rating and to avoid investing in companies deemed in violation of the UNGC principles and those involved in the controversial weapons, military weapons, thermal coal, or tobacco production. The Fund achieved these environmental/social characteristics during the relevant period by maintaining a better weighted-average ESG rating than the benchmark index and not investing in the excluded companies, as more fully explained in the section below on the sustainability indicators of the Fund.</p>

Sustainable Finance Disclosures (“Annex IV”) (continued)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

	Product name:	Lazard Emerging Markets Local Debt Fund	Legal entity identifier:	J5Y4Q8S1ET6FCZ1QY415
<p>Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.</p> <p>The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.</p>	Environmental and/or social characteristics			
	Did this financial product have a sustainable investment objective			
	<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes		<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No	
	<input type="checkbox"/>	It made sustainable investments with an environmental objective : ____%	<input type="checkbox"/>	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments
	<input type="checkbox"/>	in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/>	in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	
<input type="checkbox"/>	It made sustainable investments with a social objective : ____%	<input type="checkbox"/>	with a social objective	
<input checked="" type="checkbox"/>	It made sustainable investments with a social objective : ____%	<input checked="" type="checkbox"/>	It promoted E/S characteristics, but did not make any sustainable investments	
	To what extent were the environmental and/or social characteristics promoted by this financial product met?			
	During the twelve-month period ended March 2023, the Fund sought to maintain a better than benchmark ESG rating and to invest in government and government-related securities of countries assigned a risk score of no higher than 35 (being a Mid-High ESG Risk Score) by the Investment Manager using its proprietary Country Risk Assessment (CRA) scoring tool. The Fund achieved these environmental/social characteristics during the relevant period by maintaining a better weighted-average ESG rating than the benchmark index and not investing in any countries with an ESG Risk Score of 35 or above, as more fully explained in the section below on the sustainability indicators of the Fund.			

Sustainable Finance Disclosures (“Annex IV”) (continued)

<p>Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.</p>	<p>● How did the sustainability indicators perform?</p> <p>The Fund’s sustainability indicators performed as follows:</p> <ol style="list-style-type: none"> 1. The Fund’s ESG Risk Rating outperformed the benchmark index (shown below). <div data-bbox="533 394 991 741" data-label="Figure"> <table border="1"> <caption>ESG RISK RATING</caption> <thead> <tr> <th>Category</th> <th>ESG Risk Rating</th> </tr> </thead> <tbody> <tr> <td>PORTFOLIO</td> <td>25.5</td> </tr> <tr> <td>BENCHMARK</td> <td>26.2</td> </tr> </tbody> </table> <p><i>As of March 2023. Based on twelve-month rolling average. Scores range from 0 (Negligible ESG Risk) to 40+ (Severe ESG Risk). Lower ESG Risk Ratings are better. Source: Sustainalytics.</i></p> </div> <ol style="list-style-type: none"> 2. The Fund had no exposure to countries with an ESG Risk Score higher than 35 or above, as assessed by the Investment Manager’s proprietary CRA tool. Sustainable Finance Disclosures (“Annex IV”) (continued)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

	Product name:	Lazard Emerging Markets Total Return Debt Fund	Legal entity identifier:	32HKU43X2ML57P9Z9Z27	
<p>Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.</p> <p>The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.</p>	Environmental and/or social characteristics				
	Did this financial product have a sustainable investment objective				
	<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes		<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No		
	<input type="checkbox"/>	It made sustainable investments with an environmental objective : ___%	<input type="checkbox"/>	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments	
	<input type="checkbox"/>	in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy	
<input type="checkbox"/>	in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy		
<input type="checkbox"/>	It made sustainable investments with a social objective : ___%	<input type="checkbox"/>	with a social objective		
<input type="checkbox"/>		<input checked="" type="checkbox"/>	It promoted E/S characteristics, but did not make any sustainable investments		
	To what extent were the environmental and/or social characteristics promoted by this financial product met?				
	<p>During the twelve-month period ended March 2023, the Fund sought to maintain a better ESG rating than the JP Morgan Emerging Market Bond Index Global Diversified (Ticker: JPEIDIVR). The Fund also sought to invest in government and government-related securities of countries assigned a risk score of no higher than 35 (being a Mid-High ESG Risk Score) by the Investment Manager using its proprietary Country Risk Assessment (CRA) scoring tool. The Fund sought to avoid investing in companies deemed in violation of the UNGC principles and those involved in the controversial weapons, military weapons, thermal coal, or tobacco production. The Fund achieved these environmental/social characteristics during the relevant period by maintaining a better weighted-average ESG rating than the index, by not investing in any countries with an ESG Risk Score of 35 or above, and not investing in the excluded companies, as more fully explained in the section below on the sustainability indicators of the Fund.</p>				

Sustainable Finance Disclosures (“Annex IV”) (continued)

<p>Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.</p>	<p style="text-align: center;">● How did the sustainability indicators perform?</p> <p>The Fund’s sustainability indicators performed as follows:</p> <ol style="list-style-type: none"> The Fund’s ESG Risk Rating outperformed the benchmark index (shown below). <div style="text-align: center;">  <table border="1" style="margin: 0 auto;"> <caption>ESG RISK RATING</caption> <thead> <tr> <th>Category</th> <th>ESG Risk Rating</th> </tr> </thead> <tbody> <tr> <td>PORTFOLIO</td> <td>25.2</td> </tr> <tr> <td>BENCHMARK</td> <td>27.1</td> </tr> </tbody> </table> <p><i>As of March 2023. ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

	Product name:	Lazard Emerging Markets Debt Unrestricted Blend Fund	Legal entity identifier:	5493003WQKFO1YWQVQ55	
<p>Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.</p> <p>The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.</p>	Environmental and/or social characteristics				
	Did this financial product have a sustainable investment objective				
	<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes		<input checked="" type="radio"/> <input type="radio"/> No		
	<input type="checkbox"/>	It made sustainable investments with an environmental objective : ___%	<input type="checkbox"/>	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments	
	<input type="checkbox"/>	in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy	
<input type="checkbox"/>	in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy		
<input type="checkbox"/>	It made sustainable investments with a social objective : ___%	<input type="checkbox"/>	with a social objective		
<input type="checkbox"/>	It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/>	It promoted E/S characteristics, but did not make any sustainable investments		
	To what extent were the environmental and/or social characteristics promoted by this financial product met?				
	<p>During the twelve-month period ended March 2023, the Fund sought to maintain a better than benchmark ESG rating and to invest in government and government-related securities of countries assigned a risk score of no higher than 35 (being a Mid-High ESG Risk Score) by the Investment Manager using its proprietary Country Risk Assessment (CRA) scoring tool. The fund also sought to avoid investing in companies deemed in violation of the UNGC principles and those involved in the controversial weapons, military weapons, thermal coal, or tobacco production. The Fund achieved these environmental/social characteristics during the relevant period by maintaining a better weighted-average ESG rating than the benchmark index, not investing in any countries with an ESG Risk Score of 35 or above, and avoiding investment in the excluded companies, as more fully explained in the section below on the sustainability indicators of the Fund.</p>				

Sustainable Finance Disclosures (“Annex IV”) (continued)

<p>Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.</p>	<p>● How did the sustainability indicators perform?</p> <p>The Fund’s sustainability indicators performed as follows:</p> <ol style="list-style-type: none"> The Fund’s ESG Risk Rating outperformed the benchmark index (shown below). <div data-bbox="533 338 1018 696" data-label="Figure"> <table border="1"> <caption>ESG RISK RATING</caption> <thead> <tr> <th>Category</th> <th>ESG Risk Rating</th> </tr> </thead> <tbody> <tr> <td>PORTFOLIO</td> <td>24.1</td> </tr> <tr> <td>BENCHMARK</td> <td>25.4</td> </tr> </tbody> </table> <p><i>As of March 2023. Based on twelve-month rolling average. Scores range from 0 (Negligible ESG Risk) to 40+ (Severe ESG Risk). Lower ESG Risk Ratings are better. Source: Sustainalytics.</i></p> </div> <ol style="list-style-type: none"> The Fund had no exposure to countries with an ESG Risk Score higher than 35 or above, as assessed by the Investment Manager’s proprietary CRA tool. The assessment excluded investments in 8 countries of all sovereigns ranked by the CRA assessment. The Fund had no exposure to companies deemed by the Investment Manager to be breaching the UNGC principles. The Fund had no exposure to companies excluded by the exclusion criteria relating to controversial weapons production, military weapons production, thermal coal mining or production, or tobacco production. 	<p>● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?</p> <p>N/A</p>						
<p>Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters</p>	<p>--- <i>How were the indicators for adverse impacts on sustainability factors taken into account?</i></p> <p>N/A</p> <p>--- <i>Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:</i></p>						
	<p>N/A</p>						

Sustainable Finance Disclosures (“Annex IV”) (continued)

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (PAIs) on sustainability factors through several methods over the reference period.

Exclusions

Through pre-investment global norms and activity-based exclusions, investments in certain corporates or countries were avoided, mitigating potential adverse sustainability impacts. Specific exclusion criteria are available in the relevant pre-contractual disclosure for the Fund.

ESG integration and investment due diligence

Material environmental and social issues in the mandatory PAI indicators were incorporated as part of the Investment Manager’s proprietary research over the period, taking into consideration sector, geographical, and other factors that impact the materiality and relevance of PAIs to each investment. The Investment Manager also referenced third-party ESG research and data for additional information and relative industry and universe positioning. By integrating these ESG considerations within the investment process, the Investment Manager may reduce or avoid potential adverse sustainability impacts from investments.

Stewardship activities

Although engagement is not directly linked to the specific environmental or social characteristics of the Fund, the Investment Manager may consider adverse impacts on sustainability factors through stewardship activities conducted with issuers in the investible universe during the period.

Further information how PAIs can be found in the relevant pre-contractual disclosure for the Fund.

Sustainable Finance Disclosures (“Annex IV”) (continued)

What were the top investments of this financial product?

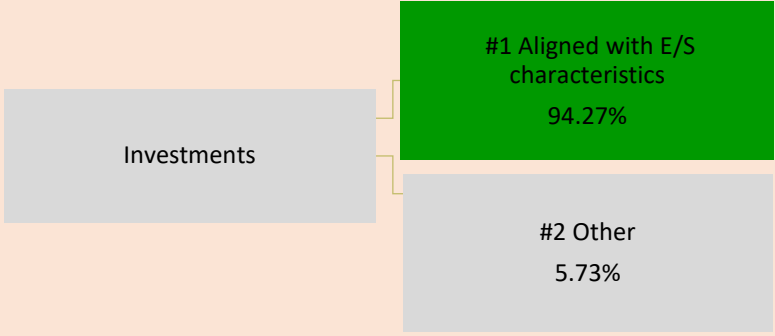

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:
01/04/2022-31/03/2023

The Fund had the following top investments over the reference period:

Largest investments	Sector	Assets (%)	Country
SAGB 8.5 01/31/37 2037	Government Bonds	1.86%	South Africa
INDON 2.15 07/28/31	Government Bonds	1.78%	Indonesia

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

	Product name:	Lazard Emerging Markets Corporate Debt Fund	Legal entity identifier:	549300WQFPQLPQ84WG72
<p>Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.</p> <p>The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.</p>	Environmental and/or social characteristics			
	Did this financial product have a sustainable investment objective			
	<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes		<input checked="" type="radio"/> <input type="radio"/> No	
	<input type="checkbox"/>	It made sustainable investments with an environmental objective : ____%	<input type="checkbox"/>	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments
	<input type="checkbox"/>	in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/>	in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	
<input type="checkbox"/>	It made sustainable investments with a social objective : ____%	<input type="checkbox"/>	with a social objective	
<input checked="" type="checkbox"/>		<input checked="" type="checkbox"/>	It promoted E/S characteristics, but did not make any sustainable investments	
	To what extent were the environmental and/or social characteristics promoted by this financial product met?			
	During the twelve-month period ended March 2023, the Fund sought to maintain a better than benchmark ESG rating and to avoid investing in companies deemed in violation of the UNGC principles and those involved in the controversial weapons, military weapons, thermal coal, or tobacco production. The Fund achieved these environmental/social characteristics during the relevant period by maintaining a better weighted-average ESG rating than the benchmark index and not investing in the excluded companies, as more fully explained in the section below on the sustainability indicators of the Fund.			

Sustainable Finance Disclosures (“Annex IV”) (continued)

<p>Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.</p>	<p>● How did the sustainability indicators perform?</p> <p>The Fund’s sustainability indicators performed as follows:</p> <ol style="list-style-type: none"> 1. ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

	Product name:	Lazard Scandinavian High Quality Fund	Legal entity identifier:	254900LQCD5S0KTSPU07
<p>Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.</p> <p>The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.</p>	Environmental and/or social characteristics			
	Did this financial product have a sustainable investment objective			
	<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes		<input checked="" type="radio"/> <input type="radio"/> No	
	<input type="checkbox"/>	It made sustainable investments with an environmental objective : ____%	<input type="checkbox"/>	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments
	<input type="checkbox"/>	in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/>	in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	
<input type="checkbox"/>	It made sustainable investments with a social objective : ____%	<input type="checkbox"/>	with a social objective	
<input type="checkbox"/>	It made sustainable investments with a social objective : ____%	<input checked="" type="checkbox"/>	It promoted E/S characteristics, but did not make any sustainable investments	
	To what extent were the environmental and/or social characteristics promoted by this financial product met?			
<p>During the twelve-month period ended March 2023, the Fund invest in securities of sovereign and corporate issuers which score in the top 75% of scores assigned to such issuers reviewed by the Investment Manager using its proprietary sustainability framework, which ranks issuers based on their performance against specific environmental, social and governance indicators. The Fund also sought to avoid investing in companies deemed in violation of the UNGC principles and those involved in the controversial weapons, military weapons, thermal coal, or tobacco production. The Fund achieved these environmental/social characteristics during the relevant period, as more fully explained in the section below on the sustainability indicators of the Fund.</p>				

Sustainable Finance Disclosures (“Annex IV”) (continued)

<p>Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.</p>	<p>● How did the sustainability indicators perform?</p>
	<p>The Fund’s sustainability indicators performed as follows:</p> <ul style="list-style-type: none"> 4. The Fund only invested in sovereign and corporate issuers that scored in the top 75% of the Investment Manager’s proprietary sustainability scoring framework across environmental, social, and governance indicators. 5. The Fund had no exposure to companies deemed by the Investment Manager to be breaching the UNGC principles. 6. The Fund had no exposure to companies excluded by the exclusion criteria relating to controversial weapons production, military weapons production, thermal coal mining or production, or tobacco production.
	<p>● ...and compared to previous periods?</p>
	<p>N/A</p>
	<p>● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?</p>
	<p>N/A. The Fund did not make sustainable investments.</p>
	<p>● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?</p>
<p>Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters</p>	<p>N/A</p>
	<p>--- How were the indicators for adverse impacts on sustainability factors taken into account?</p>
	<p>N/A</p>
	<p>--- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:</p>
	<p>N/A</p>

Sustainable Finance Disclosures (“Annex IV”) (continued)

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (PAIs) on sustainability factors through several methods over the reference period.

Exclusions

Through pre-investment global norms and activity-based exclusions, investments in certain corporates or countries were avoided, mitigating potential adverse sustainability impacts. Specific exclusion criteria are available in the relevant pre-contractual disclosure for the Fund.

ESG integration and investment due diligence

Material environmental and social issues in the mandatory PAI indicators were incorporated as part of the Investment Manager’s proprietary research over the period, taking into consideration sector, geographical, and other factors that impact the materiality and relevance of PAIs to each investment. The Investment Manager also referenced third-party ESG research and data for additional information and relative industry and universe positioning. By integrating these ESG considerations within the investment process, the Investment Manager may reduce or avoid potential adverse sustainability impacts from investments.

Stewardship activities

Although engagement is not directly linked to the specific environmental or social characteristics of the Fund, the Investment Manager may consider adverse impacts on sustainability factors through stewardship activities conducted with issuers in the investible universe during the period.

Further information how PAIs can be found in the relevant pre-contractual disclosure for the Fund.

Sustainable Finance Disclosures (“Annex IV”) (continued)

What were the top investments of this financial product?

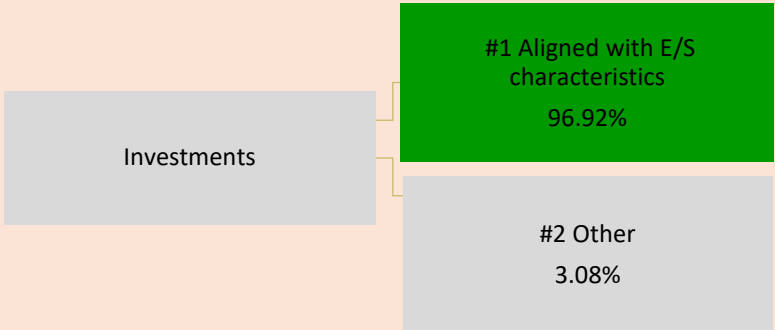

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:
01/04/2022-31/03/2023

The Fund had the following top investments over the reference period:

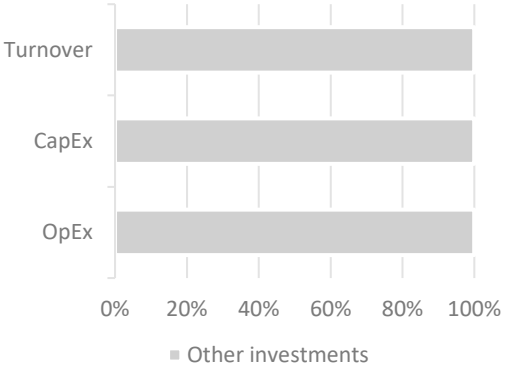

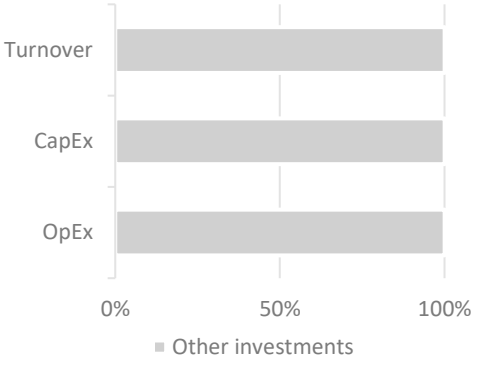

Largest investments	Sector	Assets (%)	Country

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

	Product name:	Lazard Nordic High Yield Fund	Legal entity identifier:	254900LQCD5S0KTSPU07	
<p>Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.</p> <p>The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.</p>	Environmental and/or social characteristics				
	Did this financial product have a sustainable investment objective				
	<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes		<input checked="" type="radio"/> <input type="radio"/> No		
	<input type="checkbox"/>	It made sustainable investments with an environmental objective : ____%	<input type="checkbox"/>	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments	
	<input type="checkbox"/>	in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy	
<input type="checkbox"/>	in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy		
<input type="checkbox"/>	It made sustainable investments with a social objective : ____%	<input type="checkbox"/>	with a social objective		
<input type="checkbox"/>	It made sustainable investments with a social objective : ____%	<input checked="" type="checkbox"/>	It promoted E/S characteristics, but did not make any sustainable investments		
	To what extent were the environmental and/or social characteristics promoted by this financial product met?				
	<p>During the twelve-month period ended March 2023, the Fund to invest in the securities of corporate issuers which score in the top 75% of scores assigned to corporate issuers reviewed by the Investment Manager using its proprietary Sustainability Framework, which ranks issuers based on their performance against specific environmental, social and governance indicators. The fund also sought to avoid investing in companies deemed in violation of the UNGC principles and those involved in the controversial weapons, military weapons, thermal coal, or tobacco production. The Fund achieved these environmental/social characteristics during the relevant period, as more fully explained in the section below on the sustainability indicators of the Fund.</p>				

Sustainable Finance Disclosures (“Annex IV”) (continued)

<p>Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.</p>	<p>● How did the sustainability indicators perform?</p>
	<p>The Fund’s sustainability indicators performed as follows:</p> <ul style="list-style-type: none"> 7. The Fund only invested in corporate issuers that scored in the top 75% of the Investment Manager’s proprietary sustainability scoring framework across environmental, social, and governance indicators. 8. The Fund had no exposure to companies deemed by the Investment Manager to be breaching the UNGC principles. 9. The Fund had no exposure to companies excluded by the exclusion criteria relating to controversial weapons production, military weapons production, thermal coal mining or production, or tobacco production.
	<p>● ...and compared to previous periods?</p>
	<p>N/A</p>
	<p>● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?</p>
	<p>N/A. The Fund did not make sustainable investments.</p>
<p>Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters</p>	<p>● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?</p>
	<p>N/A</p>
	<p>--- How were the indicators for adverse impacts on sustainability factors taken into account?</p>
	<p>N/A</p>
	<p>--- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:</p>
	<p>N/A</p>

Sustainable Finance Disclosures (“Annex IV”) (continued)

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (PAIs) on sustainability factors through several methods over the reference period.

Exclusions

Through pre-investment global norms and activity-based exclusions, investments in certain corporates or countries were avoided, mitigating potential adverse sustainability impacts. Specific exclusion criteria are available in the relevant pre-contractual disclosure for the Fund.

ESG integration and investment due diligence

Material environmental and social issues in the mandatory PAI indicators were incorporated as part of the Investment Manager’s proprietary research over the period, taking into consideration sector, geographical, and other factors that impact the materiality and relevance of PAIs to each investment. The Investment Manager also referenced third-party ESG research and data for additional information and relative industry and universe positioning. By integrating these ESG considerations within the investment process, the Investment Manager may reduce or avoid potential adverse sustainability impacts from investments.

Stewardship activities

Although engagement is not directly linked to the specific environmental or social characteristics of the Fund, the Investment Manager may consider adverse impacts on sustainability factors through stewardship activities conducted with issuers in the investible universe during the period.

Further information how PAIs can be found in the relevant pre-contractual disclosure for the Fund.

Sustainable Finance Disclosures (“Annex IV”) (continued)

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:
01/04/2022-31/03/2023

The Fund had the following top investments over the reference period:

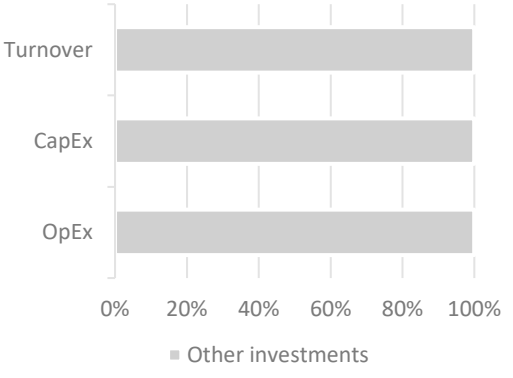

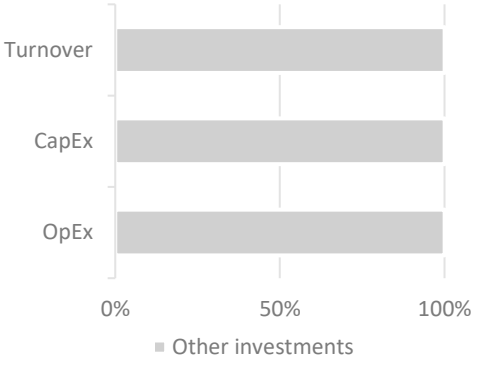

Largest investments	Sector	Assets (%)	Country
AMSCNO 7.75 07/02/25	Financials	4.63%	United States
GLOG F 11/27/24	Energy	3.95%	Bermuda

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

	Product name:	Lazard European Alternative Fund	Legal entity identifier:	549300MOW4JOB6PQ9K89
<p>Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.</p> <p>The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.</p>	Environmental and/or social characteristics			
	Did this financial product have a sustainable investment objective			
	<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes		<input checked="" type="radio"/> <input type="radio"/> No	
	<input type="checkbox"/>	It made sustainable investments with an environmental objective : ___%	<input type="checkbox"/>	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
	<input type="checkbox"/>	in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/>	in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	
<input type="checkbox"/>	It made sustainable investments with a social objective : ___%	<input type="checkbox"/>	with a social objective	
<input type="checkbox"/>	It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/>	It promoted E/S characteristics, but did not make any sustainable investments	
	To what extent were the environmental and/or social characteristics promoted by this financial product met?			
<p>During the twelve-month period ended March 2023, the Fund sought to maintain a better than benchmark ESG rating and to avoid investing in companies deemed in violation of the UNGC principles and those involved in the controversial weapons, military weapons, thermal coal, or tobacco production. The Fund achieved these environmental/social characteristics during the relevant period by maintaining a better weighted-average ESG rating than the benchmark index and not investing in the excluded companies, as more fully explained in the section below on the sustainability indicators of the Fund.</p>				

Sustainable Finance Disclosures (“Annex IV”) (continued)

<p>Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.</p>	<p>● How did the sustainability indicators perform?</p> <p>The Fund’s sustainability indicators performed as follows:</p> <p>5. The Fund’s ESG Risk Rating outperformed the benchmark index (shown below).</p> <div data-bbox="533 394 1018 741" data-label="Figure"> <table border="1"> <caption>ESG RISK RATING</caption> <thead> <tr> <th>Category</th> <th>ESG Risk Rating</th> </tr> </thead> <tbody> <tr> <td>PORTFOLIO</td> <td>19.1</td> </tr> <tr> <td>BENCHMARK</td> <td>20.3</td> </tr> </tbody> </table> </div> <p><i>As of March 2023. Based on twelve-month rolling average. Scores range from 0 (Negligible ESG Risk) to 40+ (Severe ESG Risk). Lower ESG Risk Ratings are better. Based on long-only positions only. Source: Sustainalytics.</i></p> <p>6. The Fund had no exposure to companies deemed by the Investment Manager to be breaching the UNGC principles.</p> <p>7. The Fund had no exposure to companies excluded by the exclusion criteria relating to controversial weapons production, military weapons production, thermal coal mining or production, or tobacco production.</p>	Category	ESG Risk Rating	PORTFOLIO	19.1	BENCHMARK	20.3
Category	ESG Risk Rating						
PORTFOLIO	19.1						
BENCHMARK	20.3						
	<p>● ...and compared to previous periods?</p>						
	<p>N/A</p>						
	<p>● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?</p>						
	<p>N/A. The Fund did not make sustainable investments.</p>						
	<p>● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?</p>						
<p>Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee</p>	<p>N/A</p> <p>--- How were the indicators for adverse impacts on sustainability factors taken into account?</p>						

Sustainable Finance Disclosures (“Annex IV”) (continued)

<p>matters, respect for human rights, anti-corruption and anti-bribery matters</p>	<p>N/A</p>
	<p>--- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:</p>
	<p>N/A</p>
	<p><i>The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.</i></p> <p>The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.</p> <p><i>Any other sustainable investments must also not significantly harm any environmental or social objectives.</i></p> <p>How did this financial product consider principal adverse impacts on sustainability factors?</p> <p>The Fund considered principal adverse impacts (PAIs) on sustainability factors through several methods over the reference period.</p> <p>Exclusions</p> <p>Through pre-investment global norms and activity-based exclusions, investments in certain corporates or countries were avoided, mitigating potential adverse sustainability impacts. Specific exclusion criteria are available in the relevant pre-contractual disclosure for the Fund.</p> <p>ESG integration and investment due diligence</p> <p>Material environmental and social issues in the mandatory PAI indicators were incorporated as part of the Investment Manager’s proprietary research over the period, taking into consideration sector, geographical, and other factors that impact the materiality and relevance of PAIs to each investment. The Investment Manager also referenced third-party ESG research and data for additional information and relative industry and universe positioning. By integrating these ESG considerations within the investment process, the Investment Manager may reduce or avoid potential adverse sustainability impacts from investments.</p> <p>Stewardship activities</p> <p>Although engagement is not directly linked to the specific environmental or social characteristics of the Fund, the Investment Manager considered adverse impacts on sustainability factors through actions such as engagement and voting on ESG topics. Over the period, the Investment Manager conducted engagements focusing on material PAIs such as GHG emissions and other carbon metrics, board diversity and governance issues such as executive compensation and shareholder rights. Engagement activity is prioritised by considering both ESG and financial impacts, as well as sector and regional considerations.</p> <p>Further information how PAIs can be found in the relevant pre-contractual disclosure for the Fund.</p>

Sustainable Finance Disclosures (“Annex IV”) (continued)

What were the top investments of this financial product?

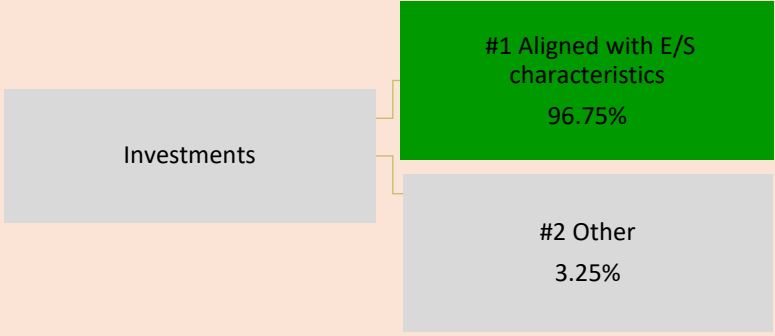

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:
01/04/2022-31/03/2023

The Fund had the following top investments over the reference period:

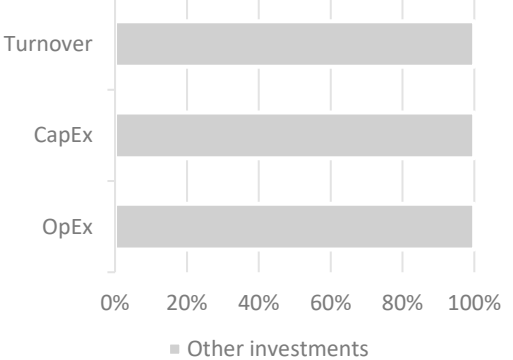

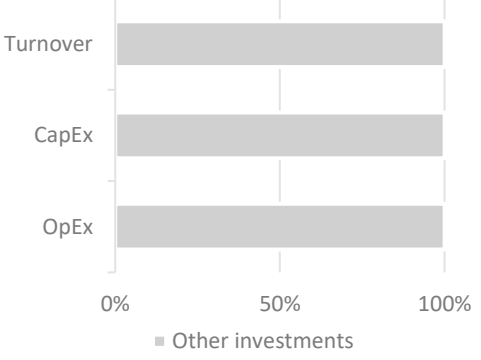

Largest investments	Sector	Assets (%)	Country
Government Of Germany 0.0% Bond	Government Bonds	49.70	Germany
Euro	[Cash]	3.25	[Cash]
Heineken NV	Consumer Staples	1.78	Netherlands
Novo Nordisk A/S Class B	Health Care	1.65	Denmark
Unilever PLC	Consumer Staples	1.56	United Kingdom
SAP SE	Information Technology	1.53	Germany
Nexi S.p.A.	Information Technology	1.24	Italy
Allianz SE	Financials	1.19	Germany
adidas AG	Consumer Discretionary	1.18	Germany
Sonova Holding AG	Health Care	1.16	Switzerland
Universal Music Group N.V.	Communication Services	1.09	Netherlands
DNB Bank ASA	Financials	1.03	Norway
Henkel AG & Co. KGaA Pref	Consumer Staples	0.95	Germany
Bankinter SA	Financials	0.87	Spain
Scout24 SE	Communication Services	0.87	Germany

Note: Proportion of investments are shown as average position sizes over the reference period. Based on net long positions. Investments in short-term government bonds, which are typically used for hedging/collateral, are aggregated.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

	Product name:	Lazard Rathmore Alternative Fund	Legal entity identifier:	2549000BM63Q5YC1MW54	
<p>Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.</p> <p>The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.</p>	Environmental and/or social characteristics				
	Did this financial product have a sustainable investment objective				
	<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes		<input checked="" type="radio"/> <input type="radio"/> No		
	<input type="checkbox"/>	It made sustainable investments with an environmental objective : ____%	<input type="checkbox"/>	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments	
	<input type="checkbox"/>	in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy	
<input type="checkbox"/>	in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy		
<input type="checkbox"/>	It made sustainable investments with a social objective : ____%	<input type="checkbox"/>	with a social objective		
<input type="checkbox"/>		<input checked="" type="checkbox"/>	It promoted E/S characteristics, but did not make any sustainable investments		
	To what extent were the environmental and/or social characteristics promoted by this financial product met?				
	During the twelve-month period ended March 2023, the Fund sought to limit investments in companies that were rated ‘Severe’ on ESG Risk Rating, and to avoid investing in companies deemed in violation of the UNGC principles and those involved in the controversial weapons, military weapons, thermal coal, or tobacco production. The Fund achieved these environmental/social characteristics during the relevant period by having no exposure to companies rated ‘Severe’ and not investing in the excluded companies, as more fully explained in the section below on the sustainability indicators of the Fund.				

Sustainable Finance Disclosures (“Annex IV”) (continued)

<p>Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.</p>	<p>● How did the sustainability indicators perform?</p> <p>The Fund’s sustainability indicators performed as follows:</p> <p>12. The Fund had 2% exposure to issuers that were rated ‘Severe’ on ESG Risk Rating, resulting in the Fund being in line with its maximum 10% threshold of portfolio holdings with a ‘Severe’ ESG Risk Rating (see below).</p>  <p>As of March 2023. Scores range from 0 (Negligible ESG Risk) to 40+ (Severe ESG Risk). Lower ESG Risk Ratings are better. Source: Sustainalytics.</p> <p>13. The Fund had no exposure to companies deemed by the Investment Manager to be breaching the UNGC principles.</p> <p>14. The Fund had no exposure to companies excluded by the exclusion criteria relating to controversial weapons production, military weapons production, thermal coal mining or production, or tobacco production.</p>
	<p>● ...and compared to previous periods?</p> <p>N/A</p>
	<p>● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?</p> <p>N/A. The Fund did not make sustainable investments.</p>
<p>Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee</p>	<p>● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?</p> <p>N/A</p> <p>--- How were the indicators for adverse impacts on sustainability factors taken into account?</p>

Sustainable Finance Disclosures (“Annex IV”) (continued)

<p>matters, respect for human rights, anti-corruption and anti-bribery matters</p>	<p>N/A</p>
	<p>--- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:</p>
	<p>N/A</p> <p><i>The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.</i></p> <p>The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.</p> <p><i>Any other sustainable investments must also not significantly harm any environmental or social objectives.</i></p>
	<p>How did this financial product consider principal adverse impacts on sustainability factors?</p> <p>The Fund considered principal adverse impacts (PAIs) on sustainability factors through several methods over the reference period.</p> <p>Exclusions</p> <p>Through pre-investment global norms and activity-based exclusions, investments in certain corporates or countries were avoided, mitigating potential adverse sustainability impacts. Specific exclusion criteria are available in the relevant pre-contractual disclosure for the Fund.</p> <p>ESG integration and investment due diligence</p> <p>Material environmental and social issues in the mandatory PAI indicators were incorporated as part of the Investment Manager’s proprietary research over the period, taking into consideration sector, geographical, and other factors that impact the materiality and relevance of PAIs to each investment. The Investment Manager also referenced third-party ESG research and data for additional information and relative industry and universe positioning. By integrating these ESG considerations within the investment process, the Investment Manager may reduce or avoid potential adverse sustainability impacts from investments.</p> <p>Stewardship activities</p> <p>Although engagement is not directly linked to the specific environmental or social characteristics of the Fund, the Investment Manager considered adverse impacts on sustainability factors through actions such as engagement on ESG topics. Over the period, the Investment Manager conducted engagements focusing on material PAIs such as GHG emissions and other carbon metrics, board diversity and governance issues such as executive compensation and shareholder rights. Engagement activity is prioritised by considering both ESG and financial impacts, as well as sector and regional considerations.</p> <p>Further information how PAIs can be found in the relevant pre-contractual disclosure for the Fund.</p>

Sustainable Finance Disclosures (“Annex IV”) (continued)

What were the top investments of this financial product?

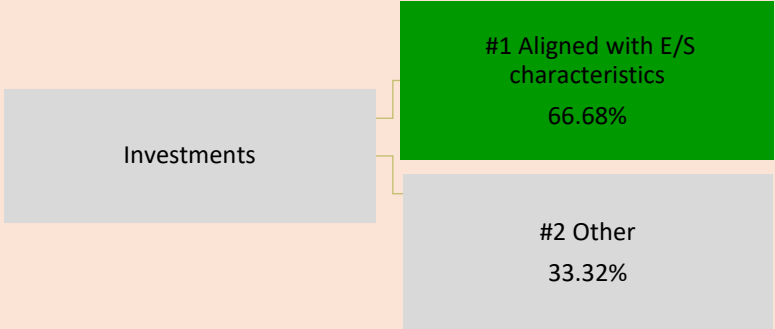

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:
March 2022 - March 2023

The Fund had the following top investments over the reference period:

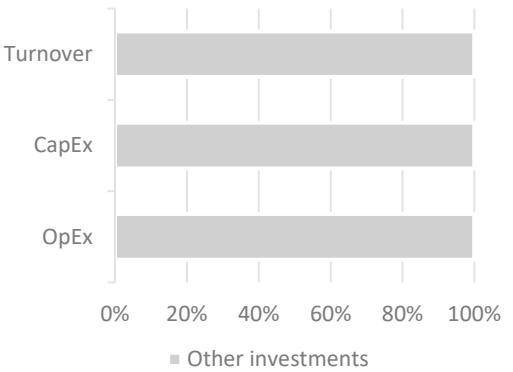

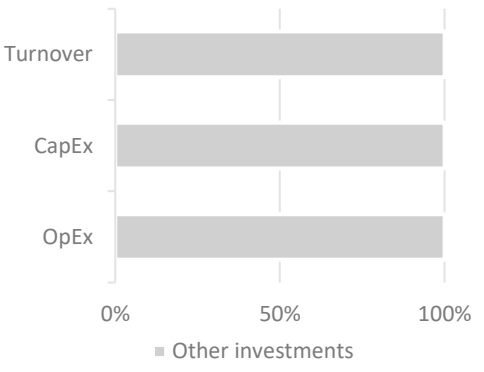

Largest investments	Sector	Assets (%)	Country
B 0 07/27/23	Government Bonds	16.45%	United States
B 0 07/18/23	Government Bonds	7.34%	United States

¹⁵ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Sustainable Finance Disclosures (“Annex IV”) (continued)

<p>Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.</p>		<ul style="list-style-type: none"> ● What was the share of investments made in transitional and enabling activities?
	N/A	
<p>Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.</p>		<ul style="list-style-type: none"> ● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?
	N/A	
		<p>What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?</p>
<p> are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.</p>	N/A. The Fund did not make any sustainable investments over the reference period.	
		<p>What was the share of socially sustainable investments?</p>
	N/A. The Fund did not make sustainable investments over the reference period.	
		<p>What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?</p>
		<p>“#2 Other” included other investments and instruments of the Fund that cannot be aligned with the environmental and/or social characteristics of the Fund. These included, cash, and cash equivalents, which are used for the purpose of efficient portfolio management and liquidity.</p>
		<p>What actions have been taken to meet the environmental and/or social characteristics during the reference period?</p>
		<p>Over the reference period, the Investment Manager incorporated ESG considerations into research and investment due diligence, selecting investments to promote the relevant environmental and/or social characteristics of the Fund based on the specific investment strategy and applying binding criteria set out in the Fund’s pre-contractual disclosure.</p> <p>Although engagement is not directly linked to the specific environmental or social characteristics of the Fund, the Investment Manager may have undertaken certain stewardship activities, through constructive dialogue with senior management representatives, to share views when given the opportunity, and to support companies undertaking positive changes. The Investment Manager seeks to incorporate the insights from stewardship activities into investment decisions, and vice versa, to enhance long-term value.</p>

Sustainable Finance Disclosures (“Annex IV”) (continued)

	<p>How did this financial product perform compared to the reference benchmark?</p>
<p>Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.</p>	<p>The Fund did not designate an index as a reference benchmark to attain the environmental or social characteristics it promotes.</p>
	<p>● How does the reference benchmark differ from a broad market index?</p>
	<p>N/A</p>
	<p>● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?</p>
	<p>N/A</p>
	<p>● How did this financial product perform compared with the reference benchmark?</p>
	<p>N/A</p>
	<p>● How did this financial product perform compared with the broad market index?</p>
<p>N/A</p>
