*\*The net expenses reflect a contractual agreement by Lazard to waive its fee and, if necessary, to reimburse the Portfolio through April 30, 2011, to the extent the Total Annual Operating Expense Ratio exceeds 0.55% and 0.85% of the average daily net assets of the Portfolio's Institutional and Open Shares respectively, exclusive of taxes, brokerage, interest on borrowings, fees and expenses of "Acquired Funds" and extraordinary expenses, and excluding shareholder redemption fees or other transaction fees. This agreement can only be amended by agreement of The Lazard Funds, Inc. and Lazard to lower the net amount shown and will terminate automatically in the event of termination of the Investment Management Agreement between Lazard and The Lazard Funds, Inc., on behalf of the Portfolio.*

## Fund Overview

### Description

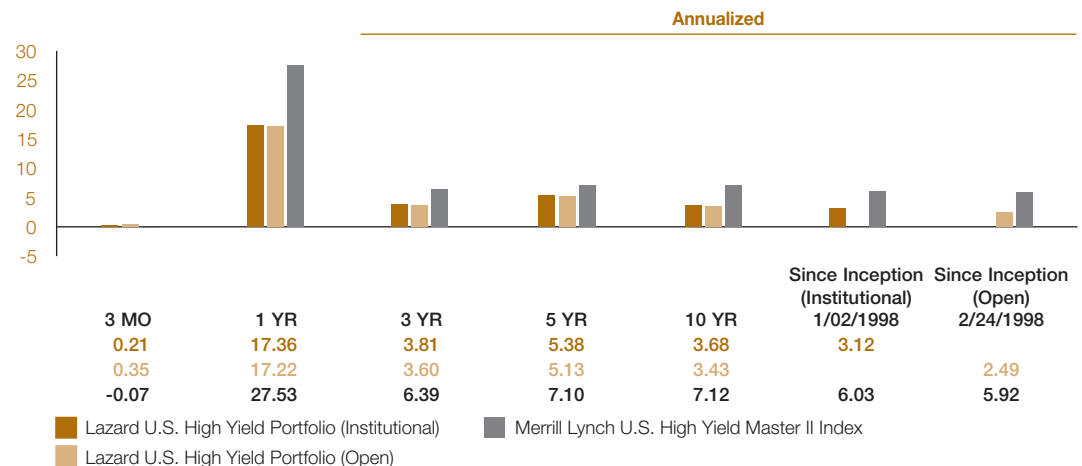

The Lazard U.S. High Yield Portfolio invests in U.S. corporate bonds generally rated below BBB, concentrating in BB and B rated issues. Securities rated B+ or better by Standard & Poor's are generally favored in the portfolio. Securities are selected based on credit fundamentals and relative value. The maturity of securities in the portfolio is generally 5 to 10 years.

### Strategy

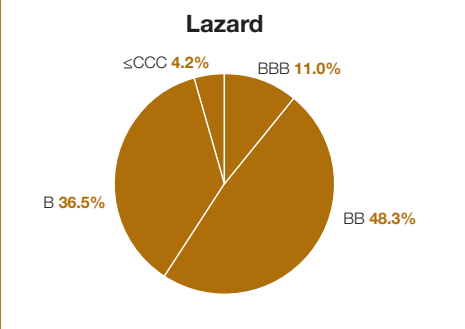

- Total return strategy focused on better-quality high yield.
- Seek to capture excess return available in better-quality high yield.
- Select diversified portfolio from securities having strong relative value and meeting our credit discipline.
- Bottom-up fundamental credit analysis drives security selection.
- Seek to reduce portfolio downside by employing risk control measures.

## Performance Review

(%; net of fees. As of June 30, 2010.)

## Quality Distribution<sup>2,3,4</sup>

The performance quoted represents past performance. Past performance does not guarantee future results. The current performance may be lower or higher than the performance data quoted. An investor may obtain performance data current to the most recent month-end online at [www.LazardNet.com](http://www.LazardNet.com). The investment return and principal value of the Portfolio will fluctuate; an investor's shares, when redeemed, may be worth more or less than their original cost. Returns reflect reimbursement of expenses as described in the prospectus. Had expenses not been reimbursed, returns would have been lower and the expense ratio would have been higher.

Effective Duration is a measure of the sensitivity of a fund's value to changes in interest rates and accounts for any option features embedded in the fund's holdings.

Effective Maturity is a measure of the average expected maturity of a fund's holdings and accounts for actual maturities as well as expected early redemptions.

An investment in bonds carries risk. If interest rates rise, bond prices usually decline. The longer a bond's maturity, the greater the impact a change in interest rates can have on its price. If you do not hold a bond until maturity, you may experience a gain or loss when you sell. Bonds also carry the risk of default, which is the risk that the issuer is unable to make further income and principal payments. Other risks, including inflation risk, call risk, and pre-payment risk, also apply. High yield securities (also referred to as "junk bonds") inherently have a higher degree of market risk, default risk, and credit risk.

Merrill Lynch U.S. High Yield Master II Index is a broad-based index consisting of all U.S. dollar-denominated high-yield bonds with a minimum outstanding amount of \$100 million and maturing over one year. The index is unmanaged and has no fees. One cannot invest directly in an index.
