Equity securities will fluctuate in price; the value of your investment will thus fluctuate, and this may result in a loss. Small- and mid-capitalization stocks may be subject to higher degrees of risk, their earnings may be less predictable, their prices more volatile, and their liquidity less than that of large-capitalization or more established companies' securities.

The Portfolio invests in stocks believed by Lazard to be undervalued, but that may not realize their perceived value for extended periods of time or may never realize their perceived value. The stocks in which the Portfolio invests may respond differently to market and other developments than other types of stocks.

The securities identified should not be considered a recommendation or solicitation to purchase or sell these securities. It should not be assumed that any of the referenced securities were or will prove to be profitable, or that the investment decisions we make in the future will be profitable or equal to the investment performance of securities referenced herein. There is no assurance that any securities referenced herein are currently held in the Portfolio or that securities sold have not been repurchased.
