*\* The net expenses reflect a contractual agreement by Lazard to waive its fee and, if necessary, to reimburse the Portfolio through April 30, 2011, to the extent the Total Annual Operating Expense Ratio exceeds 1.15% and 1.45% of the average daily net assets of the Portfolio's Institutional and Open Shares, respectively, exclusive of taxes, brokerage, interest on borrowings, fees and expenses of "Acquired Funds" and extraordinary expenses, and excluding shareholder redemption fees or other transaction fees. This agreement can only be amended by agreement of The Lazard Funds, Inc. and Lazard to lower the net amount shown and will terminate automatically in the event of termination of the Investment Management Agreement between Lazard and The Lazard Funds, Inc., on behalf of the Portfolio.*

## Fund Overview

### Description

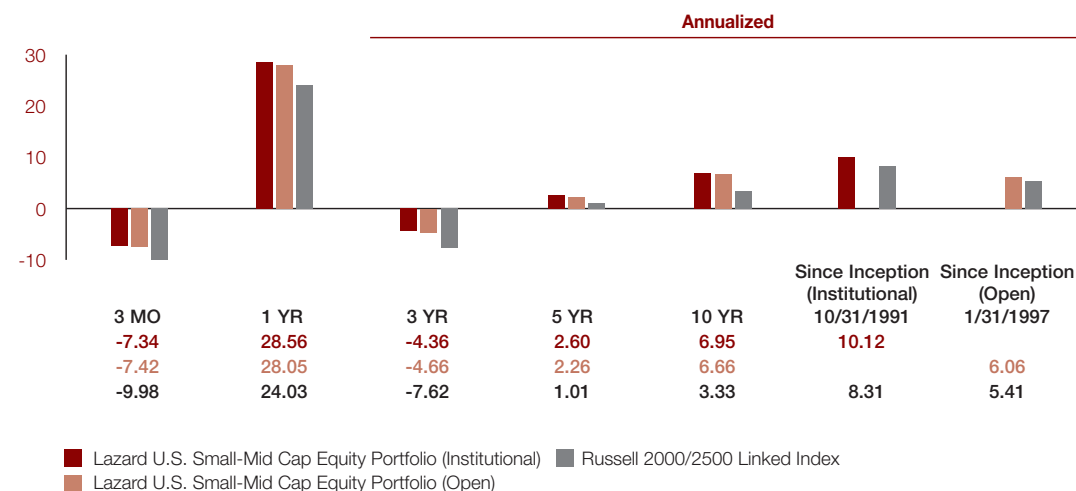

The Lazard U.S. Small-Mid Cap Equity Portfolio seeks long-term capital appreciation by investing in relatively small-to-mid U.S. companies with strong and sustainable financial productivity at attractive valuations. The Portfolio's returns are compared to the Russell 2500 Index.

### Strategy

- Bottom-up approach to stock selection, the hallmark of Lazard's relative-value investment style.
- Fundamental analysis considers sustainability of returns, while accounting validation examines companies' stated financial statistics.
- Screening seeks to identify companies that are attractively priced relative to their financial returns.
- Quantitative research techniques are used to monitor risks associated with industry concentrations in order to ensure diversification.

## Performance Review

**Understanding Investment Risk**

Beta is a relative measure of the sensitivity of a fund's return to changes in the benchmark's return. The beta of the fund versus its benchmark is the amount (and direction) the fund has historically moved when the benchmark moved by one unit.

Standard deviation measures the dispersion or "spread" of individual observations around their mean. Standard deviation of returns measures a fund's historical volatility, where a higher number is evidence of greater volatility (i.e., higher risk).

Equity securities will fluctuate in price; the value of your investment will thus fluctuate, and this may result in a loss. Small- and mid-capitalization stocks may be subject to higher degrees of risk, their earnings may be less predictable, their prices more volatile, and their liquidity less than that of large-capitalization or more established companies' securities.

The Portfolio invests in stocks believed by Lazard to be undervalued, but that may not realize their perceived value for extended periods of time or may never realize their perceived value. The stocks in which the Portfolio invests may respond differently to market and other developments than other types of stocks.

The Portfolio's investment strategy may involve high portfolio turnover. A portfolio turnover rate of 100%, for example, is equivalent to the Portfolio buying and selling all of its securities once during the course of the year. A high portfolio turnover rate (such as 100% or more) could result in high brokerage costs and an increase in taxable capital gains distributions to the Portfolio's shareholders.

The Russell 2000 Index includes approximately 2000 of the smallest securities in the Russell 3000 Index, representing roughly 8% of the total market capitalization of Russell 3000 companies. (The Russell 3000 Index measures the performance of the largest 3000 U.S. companies representing approximately 98% of the investable U.S. equity market.) The index is unmanaged and has no fees. One cannot invest directly in an index.

The Russell 2500 Index measures the performance of the small- to mid-cap segment of the U.S. equity universe, commonly referred to as "smid" cap. The Russell 2500 Index is a subset of the Russell 3000 Index. (The Russell 3000 Index measures the performance of approximately 3000 of the largest U.S. companies, representing approximately 98% of the investable U.S. equity market.) It includes approximately 2500 of the smallest securities based on a combination of their market cap and current index membership. The index is unmanaged and has no fees. One cannot invest directly in an index.

As of August 25, 2008, the Portfolio changed its name from U.S. Small Cap Equity Portfolio and adopted the Portfolio's current investment strategy which compares its performance to the Russell 2500 Index. Prior to August 25, 2008, the Portfolio focused on U.S. small cap companies and compared its performance to the Russell 2000 Index. The Portfolio's benchmark, the Russell 2000/2500 Linked Index, is comprised of the Russell 2000 index from inception to August 24, 2008 and the Russell 2500 index from August 25, 2008 to the present.
