

Lazard

U.S. Intermediate Core 4Q11

Investment Objective and Strategy

Lazard U.S. Intermediate Core seeks to achieve two key objectives, which are to outperform the returns of the intermediate investment grade bond market as represented by the Barclays Capital U.S. Intermediate Aggregate Bond Index and to preserve capital. The strategy relies on fundamental security selection and disciplined portfolio construction as it seeks to generate excess returns within a volatility framework that is representative of intermediate investment grade active management.

Notes

- The allocations, investment characteristics, and specific securities mentioned are based upon a portfolio that represents the proposed investment for a fully discretionary account. Allocations and security selection are subject to change. The securities mentioned are not necessarily held by Lazard for all client portfolios, and their mention should not be considered a recommendation or solicitation to purchase or sell these securities. It should not be assumed that any investment in these securities was, or will prove to be, profitable, or that the investment decisions we make in the future will be profitable or equal to the investment performance of securities referenced herein. There is no assurance that any securities referenced herein are currently held in the portfolio or that securities sold have not been repurchased. The securities mentioned may not represent the entire portfolio.
- Source: Lazard, BofA Merrill Lynch
- Credit quality ratings on the underlying securities of the portfolio are obtained from three major reporting agencies – Standard & Poor's (S&P), Moody's, and Fitch. For U.S. government securities, the terms "Tsy" and "Agy" are utilized to differentiate the special standing of these securities. For nongovernment securities, the lower of Moody's or S&P is used when both are available. In the event the security is not rated by Moody's and S&P, Lazard uses Fitch. If a security is not explicitly rated, Lazard will use the underlying ratings assigned to the security's obligor. Lazard converts all ratings to the equivalent S&P major rating category for purposes of the categories shown. Ratings and the portfolio's credit quality distribution may change over time. The portfolio itself has not been rated by an independent rating agency.

Important Information

Published on January 31, 2012.

An investment in bonds carries risk. If interest rates rise, bond prices usually decline. The longer a bond's maturity, the greater the impact a change in interest rates can have on its price. If you do not hold a bond until maturity, you may experience a gain or loss when you sell. Bonds also carry the risk of default, which is the risk that the issuer is unable to make further income and principal payments. Other risks, including inflation risk, call risk, and pre-payment risk, also apply. Securities in certain non-domestic countries may be less liquid, more volatile, and less subject to governmental supervision than in one's home market. The values of these securities may be affected by changes in currency rates, application of a country's specific tax laws, changes in government administration, and economic and monetary policy.

GIPS Composite Information

Composite Name	Lazard U.S. Intermediate Core
Benchmark	Barclays Capital Intermediate U.S. Aggregate Bond Index
Reporting Date	September 30, 2011
Composite Inception Date	January 1, 2004
Reporting Currency	U.S. Dollar

Composite Description

The composite returns represent the total returns of all fully discretionary, fee-paying, portfolios with a U.S. Intermediate Core fixed income investment mandate and a minimum of \$5 million since inception through December 31, 2007, and \$50 million in assets under management from January 1, 2008, to the present. The primary objective of the U.S. Intermediate Core fixed income strategy is to outperform the returns of the intermediate investment grade bond market as represented by the Barclays Capital Intermediate U.S. Aggregate Bond Index. The U.S. Intermediate Core strategy relies on fundamental security selection and disciplined portfolio construction as it seeks to generate excess returns within a volatility framework that is representative of intermediate investment grade active management.

Calculation of Performance Returns

Lazard's account inclusion policy is the first full month or the end of the month in which the account is fully invested. The returns of the individual portfolios are time weighted, based upon monthly portfolio valuations and include the reinvestment of all earnings as of the payment date. The composite returns are asset-weighted based upon beginning period market values. Additional information regarding policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request. Composite returns are shown before taxes and the deduction of custody fees (except for mutual funds which includes all fees). The composite returns presented represent past performance and is not a reliable indicator of future results, which may vary. As of October 1, 2007, this composite has changed its name from Intermediate Aggregate Plus and as of September 30, 2009, from U.S. Enhanced Intermediate Core to U.S. Intermediate Core. Lazard's standard fee schedule for U.S. Intermediate Core accounts is 0.35% on the first \$100 million

of assets and 0.25% of the balance. (This fee schedule may be presented in non-U.S. local currency equivalents based on prevailing exchange rates.) Actual account fees, inclusive of performance-based fees (if applicable) are used in the construction of composite net of fee performance unless otherwise noted. A complete list and description of all Lazard composites is available upon request.

Fee Schedule

Lazard's standard fee schedule for U.S. Intermediate Core accounts is 0.35% on the first \$100 million of assets and 0.25% of the balance. (This fee schedule may be presented in non-U.S. local currency equivalents based on prevailing exchange rates.) Actual account fees, inclusive of performance-based fees (if applicable) are used in the construction of composite net of fee performance unless otherwise noted. A complete list and description of all Lazard composites is available upon request.

Benchmark Information

The Barclays Capital Intermediate U.S. Aggregate Bond Index is comprised of publicly traded bonds including U.S. Government, mortgage-backed, corporate, and yankee bonds with an approx. average maturity of 5 years.

GIPS Compliance and Verification Status

Lazard Asset Management claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Lazard Asset Management has been independently verified for the period of January 1, 1993 through December 31, 2010. The verification reports are available upon request. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. Verification does not ensure the accuracy of any specific composite presentation. Lazard Asset Management is the "Firm" to which the GIPS Standards apply (Frankfurt office included in Firm definition as of January 1, 2003). GIPS is a registered trademark of CFA Institute. CFA Institute has not been involved in the preparation or review of this presentation. The composite creation date is April 2005.
